Curious Disciplines Sarah Hayden,2018-04-15 The transnational modernist Mina Loy (1882–1966) embodied the avant-garde in many literary and artistic media. This book positions her as a theorist of the avant-garde and of what it means to be an artist. Foregrounding Loy’s critical interrogation of Futurist, Dadaist, Surrealist, and “Degenerate” artisthood, and exploring her poetic legacies today, Curious Disciplines reveals Loy’s importance in an entirely novel way. Examining the primary texts produced by those movements themselves—their manifestos, magazines, pamphlets, catalogues, and speeches—Sarah Hayden uses close readings of Loy’s poetry, prose, polemics, and unpublished writings to trace her response to how these movements wrote themselves, collectively, into being.

Spy ,1988-01 Smart. Funny. Fearless.It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented --Dave Eggers. It's a piece of garbage --Donald Trump.

The Comfort Crisis Michael Easter,2021-05-11 “If you’ve been looking for something different to level up your health, fitness, and personal growth, this is it.”—Melissa Urban, Whole30 CEO and New York Times bestselling author of The Book of Boundaries “Michael Easter’s genius is that he puts data around the edges of what we intuitively believe. His work has inspired many to change their lives for the better.”—Dr. Peter Attia, #1 New York Times bestselling author of Outlive Discover the evolutionary mind and body benefits of living at the edges of your comfort zone and reconnecting with the wild—from the author of Scarcity Brain, coming in September! In many ways, we’re more comfortable than ever before. But could our sheltered, temperature-controlled, overfed, underchallenged lives actually be the leading cause of many our most urgent physical and mental health issues? In this gripping investigation, award-winning journalist Michael Easter seeks out off-the-grid visionaries, disruptive genius researchers, and mind-body conditioning trailblazers who are unlocking the life-enhancing secrets of a counterintuitive solution: discomfort. Easter’s journey to understand our evolutionary need to be challenged takes him to meet the NBA’s top exercise scientist, who uses an ancient Japanese practice to build championship athletes; to the mystical country of Bhutan, where an Oxford economist and Buddhist leader are showing the world what death can teach us about happiness; to the outdoor lab of a young neuroscientist who’s found that nature tests our physical and mental endurance in ways that expand creativity while taming burnout and anxiety; to the remote Alaskan backcountry on a demanding thirty-three-day hunting expedition to experience the rewilding secrets of one of the last rugged places on Earth; and more. Along the way, Easter uncovers a blueprint for leveraging the power of discomfort that will dramatically improve our health and happiness, and perhaps even help us understand what it means to be human. The Comfort Crisis is a bold call to break out of your comfort zone and explore the wild within yourself.

Basic Cinematography Kurt Lancaster,2019-03-07 The cinematographer must translate the ideas and emotions contained in a script into

something that can be physically seen and felt onscreen, helping the director to fulfil the vision of the film. The shots may look good, but they will not serve the story until the composition, lenses, and lighting express, enhance, and reveal the underlying emotions and subtext of the story. By making physical the ideas and emotions of the story, the cinematographer supports blocking as a visual form of the story through these tools. Rather than delve into technical training, Basic Cinematography helps to train the eye and heart of cinematographers as visual storytellers, providing them with a strong foundation for their work, so that they're ready with creative ideas and choices on set in order to make compelling images that support the story. The book includes tools, tables, and worksheets on how to enhance students and experienced filmmakers with strong visual storytelling possibilities, including such features as: Dramatic script analysis that will help unlock blocking, composition, and lighting ideas that reveal the visual story Ten tools of composition Psychological impact of lenses, shot sizes, and camera movement Six elements of lighting for visual storytelling What to look for beneath the hood of cameras, including using camera log, RAW, and LUTs Dramatic analysis chart and scene composition chart to help plan your shoots Case studies from such visually cinematic shows and documentaries as Netflix's Godless, Jessica Jones, The Crown, and Chef's Table, as well as examples from classroom exercises Features insights from the DP of Jessica Jones, Manuel Billeter, and the DP of Chef's Table, Adam Bricker.

How to Invest in Structured Products Andreas Bluemke,2009-09-15 This book is essential in understanding, investing and risk managing the holy grail of investments - structured products. The book begins by introducing structured products by way of a basic guide so that readers will be able to understand a payoff graphic, read a termsheet or assess a payoff formula, before moving on to the key asset classes and their peculiarities. Readers will then move on to the more advanced subjects such as structured products construction and behaviour during their lifetime. It also explains how to avoid important pitfalls in products across all asset classes, pitfalls that have led to huge losses over recent years, including detailed coverage of counterparty risk, the fall of Lehman Brothers and other key aspects of the financial crisis related to structured products. The second part of the book presents an original approach to implementing structured products in a portfolio. This makes it a great help to any buyer of structured products; Unbiased advice on product investments across several asset classes: equities, fixed income, foreign exchange and commodities; Guidance on how to implement structured products in a portfolio context; A comprehensive questionnaire that will help investors to define their own investment preferences, allowing for a greater precision when facing investment decisions; An original approach determining the typical distribution of returns for major product types, essential for product classification and optimal portfolio implementation purposes; Written in a fresh, clear and understandable style, with many figures illustrating the products and very little mathematics. You will be able to see the added value versus the cost of a product and if the payoff is compatible with the market expectations.

Transnational Television in Europe Jean K. Chalaby,2009-02-19 Today transnational TV networks count among television's most prestigious

brands and rank among Europe's leading TV channels. This is the first, dynamically told story of the extraordinary journey of transnational television in Europe from struggling origins to its present day boom. It is based in extensive research into the international television industry and makes full use of its author's remarkable access to leading industry figures, from Sky and Turner to Discovery and BBC World. The tale begins with a few cross-border TV channels, who fought hostile governments, faced antagonism from the broadcasting establishment and provoked the contempt of advertisers. But, Jean Chalaby argues, the planets came into alignment for pan-European television in the late 1990s, when a transnational shift in European broadcasting was produced. He shows how transnational television and globalization have transformed one another, and how transfrontier TV networks reflect - and help sustain - a global economic order in which the connection between national territory and patterns of production and distribution have broken down.
