The papers are organized in topical sections on support tools and environments; performance prediction and evaluation; scheduling and load-balancing; high-performance architectures and compilers; parallel and distributed data management; grid, cluster and cloud computing; peer to peer computing; distributed systems and algorithms; parallel and distributed programming; parallel numerical algorithms; multicore and manycore programming; theory and algorithms for parallel computation; high performance networks and mobile ubiquitous computing.

Visualizing Music Eric Isaacson,2023-05-02 -- Eric Isaacson is expertly trained to see the subtleties in how various kinds of visual images, representations, diagrams, and displays communicate, or fail to readily convey, crucial information according to praise from Robert Hatten. He has published, presented, and taught on visualizing music for over 28 years. -- This book serves music scholars by offering a guide to effectively communicate visually. It has the potential to spark further research leading to the development of new approaches in visualization and expansions to existing methodologies. -- Visualizations are powerful agents of musical meaning, so publication as part of IUP's Musical Meaning and Interpretation series is fitting. -- The target audience includes scholars and advanced students in music theory, musicology, and visualization in the arts.

Using Digital Humanities in the Classroom Claire Battershill,Shawna Ross,2022-03-24 Rooted in the day-to-day experience of teaching and written for those without specialist technical knowledge, this is a new edition of the go-to guide to using digital tools and resources in the humanities classroom. In response to the rapidly changing nature of the field, this new edition has been updated throughout and now features: - A brand-new Preface accounting for new developments in the broader field of DH pedagogy - New chapters on 'Collaborating' and on 'Teaching in a Digital Classroom' - New sections on collaborating with other teachers; teaching students with learning differences; explaining the benefits of digital pedagogy to your students; and advising graduate students about the technologies they need to master - New 'advanced activities' and 'advanced assignment' sections (including bots, vlogging, crowd-sourcing, digital storytelling, web scraping, critical making, automatic text generation, and digital media art) - Expanded chapter bibliographies and over two dozen tables offering practical advice on choosing software programs Accompanied by a streamlined companion website, which has been entirely redesigned to answer commonly asked questions quickly and clearly, this is essential reading for anyone looking to incorporate digital tools and resources into their daily teaching.

Visualization in Teaching and Learning Mathematics Walter Zimmermann,Steve Cunningham,Mathematical Association of America. Committee on Computers in Mathematics Education,1991 The twenty papers in the book give an overview of research analysis, practical experience, and informed opinion about the role of visualization in teaching and learning mathematics, especially at the undergraduate level. Visualization, in its broadest level. Visualization, in its broadest sense, is as old as mathematics, but progress in computer graphics has generated a renaissance of interest in visual representations and visual thinking in mathematics.

About Face Alan Cooper,Robert Reimann,David Cronin,Christopher Noessel,2014-09-02 The essential interaction design guide, fully revised and updated for the mobile age About Face: The Essentials of Interaction Design, Fourth Edition is the latest update to the book that shaped and evolved the landscape of interaction design. This comprehensive guide takes the worldwide shift to smartphones and tablets into account. New information includes discussions on mobile apps, touch interfaces, screen size considerations, and more. The new full-color interior and unique layout better illustrate modern design concepts. The interaction design profession is blooming with the success of design-intensive companies, priming customers to

expect design as a critical ingredient of marketplace success. Consumers have little tolerance for websites, apps, and devices that don't live up to their expectations, and the responding shift in business philosophy has become widespread. About Face is the book that brought interaction design out of the research labs and into the everyday lexicon, and the updated Fourth Edition continues to lead the way with ideas and methods relevant to today's design practitioners and developers. Updated information includes: Contemporary interface, interaction, and product design methods Design for mobile platforms and consumer electronics State-of-the-art interface recommendations and up-to-date examples Updated Goal-Directed Design methodology Designers and developers looking to remain relevant through the current shift in consumer technology habits will find About Face to be a comprehensive, essential resource.

A Brief History of Image Science and Technology in China Congyao Han, 2021-06-26 This book, within the vision of the study on the image history, clearly manifests the development of Chinese image science and technology of over 2000 years based on compendium, while having briefly sorted out expositions by scientists since ancient times in China, demonstrates the spiritual course, ideas of thinking and forms of life and reveals profound humane ideas, basis of sentiments and styles of the spirit featured by Chinese image culture. The historic outline of images is clear-cut along with authenticated inter-attestation for clues of images and texts. Historic facts concerning images are ecologically diversified, while historic documents about images are properly chosen, in addition to the integration between liberal arts and science and perfect combination between images and texts. Blessed with nice integration between images and texts, this book serves as reference to experts, scholars, undergraduates and postgraduates related to the study on image history, history of science and technology, study of history and news communication.

Creative Spaces Angie Myung, Ted Vakadan, 2019-08-27 This debut book from acclaimed Los Angeles lifestyle brand Poketo proves creativity can

be sparked anywhere. From a colorful desk in a tiny closet to expansive homes, Creative Spaces explores the lives, homes, and studios of 23 artistic entrepreneurs, authors, and designers through a collection of inspired interiors from across the country that brings art into the everyday. With stunning photography, intimate profiles, and unexpected takeaways, the book showcases an eclectic mix of creatives, including artist Adam J. Kurtz, ceramicist Helen Levi, and DJ Chris Manak, among others. Fusing lifestyle with interior design, this peek into the spaces and lives of creative professionals will motivate dreamers and thinkers to become doers and makers.

About Face 3 Alan Cooper, Robert Reimann, David Cronin, 2007 Aimed at software developers, this book proposes the creation of a new profession of software design. The examples in the text are updated to reflect new platforms along with additional case studies where appropriate.

CALL and complexity - short papers from EUROCALL 2019 Fanny Meunier, Julie Van de Vyver, Linda Bradley, Sylvie Thouësny, 2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was 'CALL and complexity'. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

Corporate Data Quality Boris Otto, Hubert Österle, 2015-12-08 Data is the foundation of the digital economy. Industry 4.0 and digital services are producing so far unknown quantities of data and make new business models possible. Under these circumstances, data quality has become the critical factor for success. This book presents a holistic approach for data quality management and presents ten case studies about this issue. It is intended for practitioners dealing with data quality management and data governance as well as for scientists. The book was written at the Competence Center Corporate Data Quality (CC CDQ) in close cooperation between researchers from the University of St. Gallen and Fraunhofer IML as well as many representatives from more than 20 major corporations. Chapter 1 introduces the role of data in the digitization of business and society and describes the most important business drivers for data quality. It presents the Framework for Corporate Data Quality Management and introduces essential terms and concepts. Chapter 2 presents practical, successful examples of the management of the quality of master data based on ten case studies that were conducted by the CC CDQ. The case studies cover every aspect of the Framework for Corporate Data Quality Management. Chapter 3 describes selected tools for master data quality management. The three tools have been distinguished through their broad applicability (method for DQM strategy development and DQM maturity assessment) and their high level of innovation (Corporate Data League). Chapter 4 summarizes the essential factors for the successful management of the master data quality and provides a checklist of immediate measures that should be addressed immediately after the start of a data quality management project. This guarantees a quick start into the topic and provides initial recommendations for actions to be taken by project and line managers. Please also check out the book's homepage at cdq-book.org/

Wicked Problems Worth Solving Jon Kolko, 2012 It feels like our world is spinning out of control. We see poverty, disease, and destruction all around us, and as we search for ways to make sense of the chaos, we're turning to new disciplines for answers and solutions. New, creative innovations are needed, and these new approaches demand different methods and different theories. This book is presented as a handbook for teaching and learning how to design for impact. In it, you'll learn how to apply the process of design to large, wicked problems, and how to gain control over complexity by acting as a social entrepreneur. You'll learn an argument for why design is a powerful agent of change, and you'll read practical methods for engaging with large-scale social problems. You can read this entire book online for free at <http://www.wickedproblems.com/>

Audio Mastering Jonathan Wyner, 2013 (Berklee Guide). Improve the sound of your recordings. Mastering is the art of optimizing recorded sound,

finding the ideal volume levels and tonal quality, and insuring data integrity necessary to produce a professional-quality duplication and distribution-ready master. This book introduces the techniques and tools of audio mastering, suitable for commercial and home/project studio environments. Technical discussions address gear, studio setup, methodologies, goals, and other considerations for making tracks sound their best, individually and in relationship to other tracks. The accompanying recording has audio examples that support two detailed case studies where readers can follow a mastering engineer's manipulations step by step.

Graphic Design Thinking Ellen Lupton, Jennifer Cole Phillips, 2011-07-27 Creativity is more than an inborn talent; it is a hard-earned skill, and like any other skill, it improves with practice. *Graphic Design Thinking: How to Define Problems, Get Ideas, and Create Form* explores a variety of informal techniques ranging from quick, seat-of-the-pants approaches to more formal research methods for stimulating fresh thinking, and ultimately arriving at compelling and viable solutions. In the style with which author Ellen has come to be known hands-on, up-close approach to instructional design writing brainstorming techniques are grouped around the three basic phases of the design process: defining the problem, inventing ideas, and creating form. Creative research methods include focus groups, interviewing, brand mapping, and co-design. Each method is explained with a brief narrative text followed by a variety of visual demonstrations and case studies. Also included are discussions with leading professionals, including Art Chantry, Ivan Chermayeff, Jessica Helfand, Steven Heller, Abott Miller, Christoph Niemann, Paula Scher, and Martin Venezky, about how they get ideas and what they do when the well runs dry. The book is directed at working designers, design students, and anyone who wants to apply inventive thought patterns to everyday creative challenges.

Cybersecurity and Privacy in Cyber Physical Systems Yassine Maleh, Mohammad Shojafar, Ashraf Darwish, Abdelkrim Haqiq, 2022-08-29 This book addresses significant issues in the cloud and the Internet of Things including personal information and identity crime for cloud of things, intellectual property-related issues in cyberspace, computer forensic investigation in cloud of things, hacking, cyber-terrorism, and intrusion detection.

Models@run.time Nelly Bencomo, Robert B. France, Betty H.C. Cheng, Uwe Aßmann, 2014-07-18 Traditionally, research on model-driven engineering (MDE) has mainly focused on the use of models at the design, implementation, and verification stages of development. This work has produced relatively mature techniques and tools that are currently being used in industry and academia. However, software models also have the potential to be used at runtime, to monitor and verify particular aspects of runtime behavior, and to implement self-* capabilities (e.g., adaptation technologies used in self-healing, self-managing, self-optimizing systems). A key benefit of using models at runtime is that they can provide a richer semantic base for runtime decision-making related to runtime system concerns associated with autonomic and adaptive systems. This book is one of the outcomes of the Dagstuhl Seminar 11481 on models@run.time held in November/December 2011, discussing foundations, techniques, mechanisms, state of the art, research challenges, and applications for the use of runtime models. The book comprises four research roadmaps, written by the original participants of the Dagstuhl Seminar over the course of two years following the seminar, and seven research papers from experts in the area. The roadmap papers provide insights to key features of the use of runtime models and identify the following research challenges: the need for a reference architecture, uncertainty tackled by runtime models, mechanisms for leveraging runtime models for self-adaptive software, and the use of models at runtime to address assurance for self-adaptive systems.
