Jesus in the Manichaeian Writings Majella

Franzmann, 2003-11-01 Manichaeism was a dualistic religious system with Christian, Gnostic and pagan elements, founded in Persia in the third century by Manes. This is the first full-length study of the Manichaeian Jesus, since the publication of

several major Manichaeian texts such as the Homilies, Psalm Book and Kephalaia in the 1930s and 1940s. A knowledge of Manichaeian Christology is important for any understanding of the development of Christologies in the early centuries CE, whether within mainstream Christianity or within associated heterodox groups. This book undertakes a comprehensive study of six distinct figures of Jesus that can be found in both Eastern and Western Manichaeian literature. Previous partial studies of Manichaeian Christology have tended to restrict their focus to texts from either Eastern or Western traditions alone. Majella Franzmann argues that a single Manichaeian Jesus can be discerned behind the many different representations to be found.

Kernel-based Data Fusion for Machine Learning Shi Yu, Léon-Charles Tranchevent, Bart Moor, Yves Moreau, 2011-03-26 Data fusion problems arise frequently in many different fields. This book provides a specific introduction to data fusion problems using support vector machines. In the first part, this book begins with a brief survey of additive models and Rayleigh quotient objectives in machine learning, and then introduces kernel fusion as the additive expansion of support vector machines in the dual problem. The second part presents several novel kernel fusion algorithms and some real applications in supervised and unsupervised learning. The last

part of the book substantiates the value of the proposed theories and algorithms in MerKator, an open software to identify disease relevant genes based on the integration of heterogeneous genomic data sources in multiple species. The topics presented in this book are meant for researchers or students who use support vector machines. Several topics addressed in the book may also be interesting to computational biologists who want to tackle data fusion challenges in real applications. The background required of the reader is a good knowledge of data mining, machine learning and linear algebra.

Machine Learning: ECML 2004 Jean-Francois Boullicaut, Floriana Esposito, Fosca Giannotti, Dino Pedreschi, 2004-11-05 The proceedings of ECML/PKDD 2004 are published in two separate, albeit -
tertwinced, volumes: the Proceedings of the 15th European Conference on Machine Learning (LNAI 3201) and the Proceedings of the 8th European Conferences on Principles and Practice of

Knowledge Discovery in Databases (LNAI 3202). The two conferences were co-located in Pisa, Tuscany, Italy during September 20–24, 2004. It was the fourth time in a row that ECML and PKDD were co-located. After the successful co-locations in Freiburg (2001), Helsinki (2002), and Cavtat-Dubrovnik (2003), it became clear that researchers strongly supported the organization of a major scientific event about machine learning and data mining in Europe. We are happy to provide some statistics about the conferences. 581 different papers were submitted to ECML/PKDD (about a 75% increase over 2003); 280 were submitted to ECML 2004 only, 194 were submitted to PKDD 2004 only, and 107 were submitted to both. Around half of the authors for submitted papers are from outside Europe, which is a clear indicator of the increasing attractiveness of ECML/PKDD. The Program Committee members were deeply involved in what turned out to be a highly competitive selection process. We assigned each paper to 3 reviewers, deciding on the appropriate PC for papers submitted to both ECML and PKDD. As a result, ECML PC members reviewed 312 papers and PKDD PC members reviewed 269 papers. We accepted for publication regular papers (45 for ECML 2004 and 39 for PKDD 2004) and short papers that were associated with poster presentations (6 for ECML 2004 and 9 for PKDD 2004). The global acceptance rate was 14.5% for regular papers (17% if we include the short papers).

Most importantly, to get in this book they've got to be Killer Tips. The kind of tip that makes you smile, nod, and then call all your friends and tune them up with your new status as Photoshop guru. If you've wondered how the pros get twice the work done in half the time, it's because they know all the tips, and all the tricks. Now with this book, so will you.
