Jane Grey Swisshelm Sylvia D. Hoffert, 2011-01-20 Nineteenth-century newspaper editor Jane Grey Swisshelm (1815-1884) was an unconventionally ambitious woman. While she struggled in private to be a dutiful daughter, wife, and mother, she publicly critiqued and successfully challenged gender conventions that restricted her personal behavior, limited her political and economic opportunities, and attempted to silence her voice. As the owner and editor of newspapers in Pittsburgh; St. Cloud, Minnesota; and Washington, D.C.; and as one of the founders of the Minnesota Republican Party, Swisshelm negotiated a significant place for herself in the male-dominated world of commerce, journalism, and politics. How she accomplished this feat; what expressive devices she used; what social, economic, and political tensions resulted from her efforts; and how those tensions were resolved are the central questions examined in this biography. Sylvia Hoffert arranges the book topically, rather than chronologically, to include Swisshelm in the broader issues of the day, such as women's involvement in politics and religion, their role in the workplace, and marriage. Rescuing this prominent feminist from obscurity, Hoffert shows how Swisshelm laid the groundwork for the New Woman of the turn of the century.

Mechanical Ventilation Arthur S. Slutsky, Laurent Brochard, 2006-03-30 Mechanical ventilation is a life-saving procedure that has been used for decades to treat patients with respiratory failure. In recent years there have been major advances in our understanding of how to ventilate patients, when to initiate and discontinue ventilation, and importantly, the side effects of mechanical ventilation. This book represents a state-of-the-art review by the leading experts in this field and covers a number of important topics including epidemiology, underlying physiological concepts, and approaches to monitoring. The pros and cons of various modes of ventilation are reviewed, as are novel forms of ventilation that may play a role in the future management of patients with respiratory failure. The importance of patient-ventilator synchrony and ventilator-induced lung injury are reviewed, with a focus on recent clinical trials and the challenges of implementing the results into clinical practice.

Pediatric and Neonatal Mechanical Ventilation Peter C. Rimensberger, 2014-11-12 Written by outstanding authorities from all over the world, this comprehensive new textbook on pediatric and neonatal ventilation puts

the focus on the effective delivery of respiratory support to children, infants and newborns. In the early chapters, developmental issues concerning the respiratory system are considered, physiological and mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed. Thereafter, the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained, with the emphasis on a practical step-by-step approach. Respiratory monitoring and safety issues in ventilated patients are considered in detail, and many other topics of interest to the bedside clinician are covered, including the ethics of withdrawal of respiratory support and educational issues. Throughout, the text is complemented by numerous illustrations and key information is clearly summarized in tables and lists.

Combinatorial Pattern Matching Johannes Fischer, Peter Sanders, 2013-05-16 This book constitutes the refereed proceedings of the 24th Annual Symposium on Combinatorial Pattern Matching, CPM 2013, held in Bad Herrenalb (near Karlsruhe), Germany, in June 2013. The 21 revised full papers presented together with 2 invited talks were carefully reviewed and selected from 51 submissions. The papers address issues of searching and matching strings and more complicated patterns such as trees, regular expressions, graphs, point sets, and arrays. The goal is to derive non-trivial combinatorial properties of such structures and to exploit these properties in order to either achieve superior performance for the corresponding computational problem or pinpoint conditions under which searches cannot be performed efficiently. The meeting also deals with problems in computational biology, data compression and data mining, coding, information retrieval, natural language processing, and pattern recognition.

MEDIA SOURCES GO SOLO - the Emerging Practice of Embedded Publishing Sander Spek,Jan Bierhoff,2009-09-15 Digital

media have lowered the barriers for producing and distributing content. The active user, reader, viewer is born and receives proper attention. One other category however, with potentially a much higher impact, is mostly overlooked. These are the embedded publishers: the commercial entities, societal organisations and governmental bodies that do not have publishing as their main goal but nevertheless start controlling their communications with in-house produced, embedded information outlets. This publication explores the new phenomenon on the basis of a number of case studies in Belgium and the Netherlands, analyses the consequences for the information landscape and offers a range of response scenarios for the traditional media.
