Discourse and Identity on Facebook Mariza Georgalou,2017-06-15 Social network sites are dynamic online socio-cultural arenas which give users ample and unprecedented opportunities for self-presentation through the meshing of language with other semiotic modes. With a focus on Facebook, one of the most widely-used online social network sites, this book brings together ideas and concepts related to language online, multimodality, and identity through five topical issues. These include place, time, profession and education, stance-taking, and privacy. The book features a discourse-centred online ethnography that provides authentic verbal and multimodal Facebook posts in both Greek and English . These are complemented with insights from interviews with Facebook participants. The examples bring to life various engaging instances of self- and other-presentation on Facebook identifying the ways in which users can: - locate themselves in terms of place and time; - announce activities, share and broaden their expertise and buttress solidarity among colleagues and fellow students; - communicate emotions, tastes, thoughts, opinions and assessments; - control the flow of textual information on their Facebook profiles to secure their privacy. Focusing on discourse manifestations of identity, this book also shows how Facebook can function as a space for vernacular literacy practices, a silo of relationships, a digital memory bank, a research tool, a knowledge forum, a cardiograph of a society, and a grassroots channel.

Mobile learning Raúl Santiago, Susana Trabeldo, 2015-03-01 El esfuerzo que se está haciendo en los últimos años por acercar a los profesores y a las escuelas elementos que favorezcan un cambio que les permita responder de manera adecuada a las diferentes necesidades sociales y educativas es grande, y prueba de ello tiene el lector en este libro, que aborda una cuestión de gran relevancia: el aprendizaje móvil y las herramientas para llevarlo a cabo, materia que forma equipo con otros de esta serie como el referido a la Flipped Classroom o aquel otro relativo a las Metodologías inductivas. Todos ellos tienen, desde sus ángulos de análisis respectivo, un denominador común: el cambio de paradigma de una escuela transmisora de

información, centrada en el profesor y la enseñanza, a otra parcialmente productora de conocimientos y centrada en el alumno y el aprendizaje. Estamos pues ante un libro de vanguardia que realiza un recorrido completo no solo por los prados de las dimensiones más técnicas y arduas de la tecnología móvil, sino también por el sentido de esta en la promoción de un cambio de metodología, de enfoque, de modelo de enseñanza y de educación. Como ya he mencionado antes, forma un trío excelente con los libros ya publicados sobre el modelo flipped y los enfoques metodológicos inductivos; aquellos por su enfoque hacia la personalización y la centralidad del estudiante frente al profesor, el presente por su transversalidad, en la medida que hace posible un aprendizaje no solo centrado en el alumno, sino ubicuo.
