The LITA Guide to No- or Low-Cost Technology Tools for Libraries Breanne A. Kirsch, 2018-02-13 The LITA Guide to No- or Low-Cost Technology Tools for Libraries provides a practical guide on how to find and use technology tools for a variety of purposes in libraries and, more broadly, in education. Each topic showcases two technology tools in detail and discusses additional tools and provides examples of how librarians or educators are using them in libraries and schools. Types of tools covered are: Video creation tools, such as PowToon and Animaker, can be used to create animated videos to tell patrons about a new service or teach students about search strategies. Screencasts includes tools like Jing or Screencast-O-Matic, which can be used to show how to use a new library database or service. Collaboration tools, including tools such as Padlet or Lino It, can be used for student collaboration or teamwork with colleagues and sharing project ideas quickly and easily. Assessment tools such as Quizizz and Kahoot allow for gamified assessment of student or patron knowledge.

Mobile learning Raúl Santiago,Susana Trbaldo,2015-03-01 El esfuerzo que se está haciendo en los últimos años por acercar a los profesores y a las escuelas elementos que favorezcan un cambio que les permita responder de manera adecuada a las diferentes necesidades

sociales y educativas es grande, y prueba de ello tiene el lector en este libro, que aborda una cuestión de gran relevancia: el aprendizaje móvil y las herramientas para llevarlo a cabo, materia que forma equipo con otros de esta serie como el referido a la Flipped Classroom o aquel otro relativo a las Metodologías inductivas. Todos ellos tienen, desde sus ángulos de análisis respectivo, un denominador común: el cambio de paradigma de una escuela transmisora de información, centrada en el profesor y la enseñanza, a otra parcialmente productora de conocimientos y centrada en el alumno y el aprendizaje. Estamos pues ante un libro de vanguardia que realiza un recorrido completo no solo por los prados de las dimensiones más técnicas y arduas de la tecnología móvil, sino también por el sentido de esta en la promoción de un cambio de metodología, de enfoque, de modelo de enseñanza y de educación. Como ya he mencionado antes, forma un trío excelente con los libros ya publicados sobre el modelo flipped y los enfoques metodológicos inductivos; aquellos por su enfoque hacia la personalización y la centralidad del estudiante frente al profesor, el presente por su transversalidad, en la medida que hace posible un aprendizaje no solo centrado en el alumno, sino ubicuo.
