Mobile learning Raúl Santiago, Susana Trbaldo, 2015-03-01 El esfuerzo que se está haciendo en los últimos años por acercar a los profesores y a las escuelas elementos que favorezcan un cambio que les permita responder de manera adecuada a las diferentes necesidades sociales y educativas es grande, y prueba de ello tiene el lector en este libro, que aborda una cuestión de gran relevancia: el aprendizaje móvil y las herramientas para llevarlo a cabo, materia que forma equipo con otros de esta serie como el referido a la Flipped Classroom o aquel otro relativo a las Metodologías inductivas. Todos ellos tienen, desde sus ángulos de análisis respectivo, un denominador común: el cambio de paradigma de una escuela transmisora de información, centrada en el profesor y la enseñanza, a otra parcialmente productora de conocimientos y centrada en el alumno y el aprendizaje. Estamos pues ante un libro de vanguardia que realiza un recorrido completo no solo por los prados de las dimensiones más técnicas y arduas de la tecnología móvil, sino también por el sentido de esta en la promoción de un cambio de metodología, de enfoque, de modelo de enseñanza y de educación. Como ya he mencionado antes, forma un trío excelente con los libros ya publicados sobre el modelo flipped y los enfoques metodológicos inductivos; aquellos por su enfoque hacia la personalización y la centralidad del estudiante frente al profesor, el presente por su transversalidad, en la medida que hace posible un aprendizaje no solo centrado en el alumno, sino ubicuo.
