The Weapon Wizards Yaakov Katz,Amir Bohbot,2017-01-31 A lively account of Israel's evolving military prowess...if The Weapon Wizards were a novel, it would be one written by Horatio Alger; if it were a biblical allegory, it would be the story of David and Goliath. —The New York Times Book Review From drones to satellites, missile defense systems to cyber warfare, Israel is leading the world when it comes to new technology being deployed on the modern battlefield. The Weapon Wizards shows how this tiny nation of 8 million learned to adapt to the changes in warfare and in the defense industry and become the new prototype of a 21st century superpower, not in size, but rather in innovation and efficiency—and as a result of its long war experience. Sitting on the front lines of how wars are fought in the 21st century, Israel has developed in its arms trade new weapons and retrofitted old ones so they remain effective, relevant, and deadly on a constantly-changing battlefield. While other countries begin to prepare for these challenges, they are looking to Israel—and specifically its weapons—for guidance. Israel is, in effect, a laboratory for the rest of the world. How did Israel do it? And what are the military and geopolitical implications of these developments? These are some of the key questions Yaakov Katz and Amir Bohbot address. Drawing on a vast amount of research, and unparalleled access to the Israeli defense establishment, this book is a report directly from the front lines.

United States Military Forces and Installations in Europe Simon Duke,1989 For many people who live in Europe, the presence of substantial US military forces is a matter of concern and debate, which has tended so far to centre around a few highly-visible bases, such as the cruise missile locations. Apart from these few bases, relatively little is known about the size and extent of the US military presence in Europe. This book aims to fill that gap by providing the raw data on what is where. The study also highlights the historical details behind the acquisition of bases in individual countries, and summarizes and analyses all of the basing agreements between the US and its host nations which are available to the public. The book a timely contribution to the debate: as discussions begin for possible post-INF cuts in superpower force levels in Europe, there is an urgent need for accurate and unbiased information on US forces in Western Europe and on the massive infrastructure that supports those forces.

Equations for Store Separation Motion Simulations and Instrumented Model Data Reduction K. S. Keen,1996 The mathematical equations of motion for ground simulation of the separation trajectories of stores from aircraft are developed in this document. The equations have application to both analytical and wind tunnel captive trajectory store separation testing. The equations of motion as presented here include features

not previously available in AEDC analytical and wind tunnel simulations such as arbitrary aircraft maneuvers, more rigorous models of the specific pivot hardware used by some aircraft, and downrail motions with all components of kinematic acceleration (including Coriolis effects) modeled. The data reduction equations for free-falling instrumented store models are also included.
