Media and Society in Networked China Jack Linchuan Qiu,2018-01-09 Media and Society in Networked China is a collection of essays about China's transforming media industries, especially the digital media sector, how they are shaped institutionally and culturally, and how they give rise to interesting practices on the ground and online

Online Society in China David Kurt Herold,Peter Marolt,2011-03-25 This book discusses the rich and varied culture of China's online society, and its impact on offline China. It argues that the internet in China is a separate 'space' in which individuals and institutions emerge and interact. While offline and online spaces are connected and influence each other, the Chinese internet is more than merely a technological or media extension of offline Chinese society. Instead of following existing studies by locating online China in offline society, the contributors in this book discuss the carnival of the Chinese internet on its own terms. Examining the complex relationship between government officials and the people using the Internet in China, this book demonstrates that culture is highly influential in how technology is used. Discussing a wide range of different activities, the contributors examine what Chinese people actually do on the internet, and how their actions can be interpreted within the online society they are creating.

Development Report on China's New Media Xujun Tang,Xinxun Wu,Chuxin Huang,Ruisheng Liu,2017-03-07 In this book, specialists and scholars present a comprehensive account of the latest developments in Chinese new media. The articles explore important areas such as security of cyberspace in China; the development of WeChat and micro-blogs; public opinions of social media and the transformation of traditional media. It also summarizes the development of the new-media industry, including digital TV, mobile games, the online video industry, IPTV, new-media advertising and mobile news applications. It is a valuable reference work for researchers and professionals working in media.

Technomobility in China Cara Wallis,2015-03-06 Winner of the 2014 Bonnie Ritter Book Award Winner of the 2013 James W. Carey Media Research Award As unprecedented waves of young, rural women journey to cities in China, not only to work, but also to “see the world” and gain some autonomy, they regularly face significant institutional obstacles as well as deep-seated anti-rural prejudices. Based on immersive fieldwork, Cara Wallis provides an intimate portrait of the social, cultural, and economic implications of mobile communication for a group of young women engaged in unskilled service work in Beijing, where they live and work for indefinite periods of time. While simultaneously situating her work within the fields of feminist studies, technology studies, and communication theory, Wallis explores the way in which the cell phone has been integrated into the transforming social structures and practices of contemporary China, and the ways in which mobile technology enables rural young women—a population that has been traditionally marginalized and deemed as “backward” and “other”—to participate in and create culture, allowing them to perform a modern, rural-urban identity. In this theoretically rich and empirically grounded analysis, Wallis provides original insight into the co-construction of technology and subjectivity as well as the multiple forces that shape contemporary China.

Revolutionizing the Interaction between State and Citizens through Digital Communications Edwards III, Sam B.,2014-07-31 Networked communication technologies have drastically changed the relationship between States and their citizens. This fundamental shift has eased civilians' ability to access information and organize groups like never before, creating the need to re-examine existing theories. Revolutionizing the Interaction between State and Citizens through Digital Communications evaluates the relationship between governments and their constituents, and how this relationship is impacted by emerging technologies. Discussing both developed and underdeveloped nations, this book provides a comparison for the ongoing shift in societies, serving as a critical reference for legal professionals, activists, government employees, academics, and students.

Digital Transformation and Its Role in Progressing the Relationship Between States and Their Citizens Edwards III, Sam B.,Santos, Diogo,2020-02-07 Countries at different points of development are affected differently by shifts in the ability to access information. These changes require the action of governments to cope in order to preserve accountability and information access. The progression of these changes could vary between countries based on the level of development. Digital Transformation and Its Role in Progressing the Relationship Between States and Their Citizens is a cutting-edge research publication that examines the relationship between government and citizens especially regarding accountability, communication, and access to information. Featuring a wide range of topics such as electoral reform, free speech, and citizen empowerment, this book is ideal for policymakers, researchers, legal professionals, activists, government employees, and academicians.

The SAGE Handbook of Social Media Jean Burgess,Alice Marwick,Thomas Poell,2017-03-30 The world is in the midst of a social media paradigm. Once viewed as trivial and peripheral, social media platforms like Twitter, Facebook and WeChat have become an important part of the information and communication infrastructure of society. They are bound up with business and politics as well as everyday life, work, and personal relationships. This international Handbook addresses the most significant research themes, methodological approaches and debates in the study of social media. It contains substantial chapters written especially for this book by leading scholars from a range of disciplinary perspectives, covering everything from computational social science to sexual self-expression. Part 1: Histories And Pre-Histories Part 2: Approaches And Methods Part 3: Platforms, Technologies And Business Models Part 4: Cultures And Practices Part 5: Social And Economic Domains

Mobile Technology and Place Rowan Wilken,Gerard Goggin,2013-05-07 An international roster of contributors come together in this comprehensive volume to examine the complex interactions between mobile media technologies and issues of place. Balancing philosophical reflection with empirical analysis, this book examines the specific contexts in which place and mobile technologies come into focus, intersect, and interact. Given the far-reaching impact of contemporary mobile technology use - and given the lasting importance of the concept and experiences of place - this book will appeal to a wide range of scholars in media and cultural studies, sociology, and philosophy of technology.

The SAGE Encyclopedia of Journalism Gregory A. Borchard,2022-01-28 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

The Transnational Experiences of Chinese Immigrant Youth in the US Xiangyan Liu,2021-02-09 Detailing ethnographic research conducted in U.S. public high schools, this text considers how Chinese immigrant youth's educational positionality and identity are shaped by diasporic and transnational migrant experiences. The Transnational Experiences of Chinese Immigrant Youth in the US presents a critical examination of themes relevant to Chinese immigrant education such as academic achievement, English language proficiency, and cultural and social capital. The intersection between diaspora and education is explored to highlight the existence of multi-layered youth identities, which exist beyond and between national boundaries, and which embody the concept of global citizenship. Building on this realization, chapters consider how institutional structures might be better designed to meet the needs of students who arrive in host countries due to larger global forces. This text will primarily be of interest to doctoral students, researchers, and scholars with an interest in multicultural education and the sociology of education. Those interested in the Asian diaspora, race and ethics, and educational research methods more broadly will also benefit from this volume.

New Connectivities in China Pui-lam Law,2012-03-31 The fast diffusion of information and communication technologies (ICTs) in China has

brought forth new forms of connection among the Chinese and has changed their social lives. Virtual networks have been developed and in turn have led to the formation of networks in the actual world. This collection explores the resultant complications in the relationship between virtual, actual, and local interactions. It discusses various aspects of the implications of the new connectivities on these three types of interactions in China. The topics examined include: the possibility of the development of civil society in China, the implications for the migrant workers in the south, the challenge posed to the traditional social order, and the relationship between the new connectivities and the Chinese social context.

Africa Now! Adebunsi Adeniran, Lanre Ikuteyijo, 2017-11-20 This book presents relevant and timely endogenous procedures for addressing the challenge of transforming ideas into sustainable opportunities in Africa. It explores how Africa could be understood in the context of emerging global realities, providing alternative frameworks that will not just be participatory in conception and practice, but equally show a contextual workability for the varying aspects of the developmental enterprise in Africa. Despite having alternative and less cumbersome sources of funding, with commendable economic growth indices, and several economies among the fastest growing globally, African countries have been unable to transmute related opportunities into sustainable human development outcomes for majority of its citizenry. Over four rich sections the authors cover subjects ranging from environment and natural resource management, to governance, economy and sustainable development. The book continues with a section on Education and Human Development and a case study in transnationalism. The final section discusses crime, conflict and regional dynamics, including highly disputed topics such as forced migration and sex trade. This indispensable resource will be of great use to students and researchers globally in fields such as sociology, anthropology, environmental studies, politics and economics with a focus on contemporary Africa, as well as to policy planners and human rights activists invested in the future development of Africa.

Advances in Digital Forensics VI Kam-Pui Chow, Sujeet Shenoi, 2010-11-26 Advances in Digital Forensics VI describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Forensic Techniques, Internet Crime Investigations, Live Forensics, Advanced Forensic Techniques, and Forensic Tools. This book is the sixth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-one edited papers from the Sixth Annual IFIP WG 11.9 International Conference on Digital Forensics, held at the University of Hong Kong, Hong Kong, China, in January 2010.

Advances in Control and Communication Dehuai Zeng, 2012-01-21 With success of ICEEE 2010 in Wuhan, China, and December 4 to 5, 2010, the second International Conference of Electrical and Electronics Engineering (ICEEE 2011) will be held in Macau, China, and December 1 to 2, 2011. ICEEE is an annual conference to call together researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Electrical and Electronics Engineering along with Computer Science and Technology, Communication Technology, Artificial Intelligence, Information Technology, etc. This year ICEEE is sponsored by International Industrial Electronics Center, Hong Kong. And based on the deserved reputation, more than 750 papers have been submitted to ICEEE 2011, from which 92 high quality original papers have been selected for the conference presentation and inclusion in the “Future Information Technology and Computer Engineering” book based on the referees’ comments from peer-refereed. We expect that the Future Information Technology and Computer Engineering book will be a trigger for further related research and technology improvements in the importance subject including Database Management, Information Technology and System, Computing Methodologies, Computer Systems Organization, Computer Application, etc. We expect that the Future Information Technology and Computer Engineering book will be a trigger for further related research and technology improvements in the importance subject including Database Management, Information Technology and System, Computing Methodologies, Computer Systems Organization, Computer Application, etc.

Learner's Privilege and Responsibility Wen Ma, Chuang Wang, 2014-03-01 This book is about the learner side of the teaching and learning equilibrium, centering on the educational experiences and perspectives of Chinese students in the United States. These students ranged from kindergarteners, adolescents, undergraduate, graduate, to adult learners, across the educational spectrum. Because Chinese students are the largest cohort among all international students in the U.S., and their prior educational experiences and perspectives in China are so different from those in the U.S., exploring who they are, what their learning experiences have been, and how their learning needs can be better met, may not only allow U.S. educators to teach them more effectively, but also help the educational community in both countries better learn about and from each other. The chapters in the book examine the constructs of learner privilege and responsibility in the teaching and learning equation, cultural and linguistic challenges and transitional adjustments, self-concept, learning strategies, comparison and contrast of differences and similarities between Chinese and American students, and/or critical reflections on significant issues confronting Chinese learners. While each chapter is situated in its own research literature and connects with its own teaching and learning practices, all of them are united around the overarching themes of the book: the experiences and perspectives of diverse learners from Chinese backgrounds in the United States. The chapters also flesh out some of the larger theoretical/pedagogical issues between education in China and in the United States, provide useful lenses for rethinking about and better understanding their differences and similarities, as well as offer pertinent suggestions about how the educational community in both countries may benefit from learning about and from each other.

Religious Entrepreneurism in China's Urban House Churches Li Ma, 2019-06-27 This book offers a unique historical documentation of the development of the ambitious religious entrepreneurship by leaders of the Early Rain church (and later Western China Presbytery leadership), in an effort to gain social influence in China through local institution-building and global public image management. It unravels the social processes of how this Christian community with a public image of defending religious freedom in China was undermined by an internal loss of moral authority. Based on publicly available texts from Chinese social media that aren't readily available in the West as well as in-depth interviews, it is framed by existing scholarship in social theories of the public sphere, charismatic domination in social transition, and the role of power in organizational behaviour. These churches' stories show how Christianity, which has long been politically marginalized in communist China, has not only adapted and challenged the socio-political status quo, but how it was also ironically shaped by the political culture. This is an insightful and critical ethnographic study of one of modern China's most famous house churches. As such, it will be of great interest to scholars of Religion in China as well as those working in Religious Studies, Asian studies, Chinese studies, and Mission Studies more generally.

Advanced Multimedia and Ubiquitous Engineering James J. (Jong Hyuk) Park, Hai Jin, Young-Sik Jeong, Muhammad Khurram Khan, 2016-08-29 This volume presents selected papers from prominent researchers participating in the 11th International Conference on Future Information Technology and the 10th International Conference on Multimedia and Ubiquitous Engineering, Beijing, China, April 20-22, 2016. These large international conferences provided an opportunity for academic and industry professionals to discuss recent progress in the fields of multimedia technology and ubiquitous engineering including new models and systems and novel applications associated with the utilization and acceptance of ubiquitous computing devices and systems. The contributions contained in this book also provide more information about digital and multimedia convergence, intelligent applications, embedded systems, mobile and wireless communications, bio-inspired computing, grid and cloud computing, the semantic web, user experience and HCI, security and trust computing. This book describes the state of the art in multimedia and ubiquitous engineering, and future IT models and their applications.
