Bank 3.0 Brett King, 2012-11-19 The first edition of BANK 2.0—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In BANK 3.0, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. BANK 3.0 shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. —Gerry McGovern, author of Killer Web Content

Scaffolding the Academic Success of Adolescent English Language Learners Aída Walqui, Leo Van Lier, 2010 This book is the result of a decade long effort in school districts such as New York City, Austin, and San Diego to implement challenging instruction that is designed for classrooms that include English learners and that raises the bar and increases engagement for all learners. Classroom vignettes, transcripts of student interactions, and detailed examples of intellectually engaging middle school and high school lessons provide a concrete picture of the instructional approach developed by coauthor Aida Walqui, founder and director of WestEd's Quality Teaching for English Learners (QTEL) initiative.

In Hard Times Manoj Joshi, Nishtha Gautam, Praveen Swami, 2022-11-28 Since the mid-1990s, Indian thinking on national security has been based on the assumption that the country would progress on a growth trajectory sufficient to modernise its defence capacities and thereby enable some form of parity with a rising China. The reality has been otherwise. China's spectacular growth – and accompanying military modernisation – has hugely outpaced that of India while the Indian military modernisation has moved fitfully. In the past several years, budgets have committed less than 2 per cent of GDP – the lowest levels since the war of 1962 – for the military. Even if spending were to rise to 3 per cent, little funding would be available for modernisation after allowing for rising pensions, salaries and other components of the budget. Put simply, the authors state, India needs a national security strategy for hard times. It would be a strategy grounded in reality – India's priority has to be the raising of vast numbers of its people out of abject poverty, even if the strategies of countries like China and the United States, economically more developed, can aim at being global powers. *In Hard Times* is an important collection that highlights the major challenges India confronts and the ways they can be tackled, especially in the light of the upheavals caused by the COVID-19 pandemic. Its contributors include former military officers, including Admiral Arun Prakash and Lt Gen. D.S. Hooda, whose views have helped shape discussions on strategy, as well as commentators such as Dr Sanjaya Baru. Experience tells us that in war it's often the smarter side that wins, not the stronger one. These essays point us in that direction.

Not a Self-help Book Yi Shun Lai, 2016 Fiction. Asian & Asian American Studies. Semi-Finalist, Thurber Prize for American Humor. Marty Wu, compulsive reader of advice manuals, would love to come across as a poised young advertising professional. Instead she trips over her own feet and blurts out inappropriate comments. The bulk of her brain matter, she decides, consists of gerbils spinning madly in alternating directions. Marty hopes to someday open a boutique costume shop, but it's hard to keep focused on her dream. First comes a spectacular career meltdown that sends her ricocheting between the stress of New York and the warmth of supportive relatives in Taiwan. Then she faces one domestic drama after another, with a formidable mother who's impossible to please, an annoyingly successful and well-adjusted brother, and surprising family secrets that pop up just when she doesn't want to deal with them. Mining the comedic potential of the 1.5-generation American experience, *NOT A SELF-HELP BOOK* is an insightful and witty portrait of a young woman scrambling to balance familial expectations and her own creative dreams. A breezy and charming tale ... Anyone who's grown up immersed in a profoundly rich old-world culture and feels its constant pull will commiserate--and be entertained.--Cheryl Lu-Lien Tan, author of *A Tiger in the Kitchen: A Memoir of Food and Family* Marty is a wonderful character who learns to stand up for herself and discovers what she really wants in life.--Booklist An expert combination of humor and deep feeling... Digs deep into the particular challenges of defining and asserting an artistic identity in the world.--PANK Magazine

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students. Among them have been issues related to population density; racial, ethnic, cultural, and linguistic diversity; poverty; racism (individual and institutional); and funding levels. Although urban educators have been addressing these issues for decades, placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent. Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels. In short, urban education remains an ill-defined concept. This comprehensive volume addresses this definitional challenge and provides a 3-part conceptual model in which the achievement of equity for all -- regardless of race, gender, or ethnicity -- is an ideal that is central to urban education. The model also posits that effective urban education requires attention to the three central issues that confronts all education systems (a) accountability of individuals and the institutions in which they work, (b) leadership, which occurs in multiple ways and at multiple levels, and (c) learning, which is the *raison d'être* of education. Just as a three-legged stool would fall if any one leg were weak or missing, each of these areas is essential to effective urban education and affects the others.

Facing Human Capital Challenges of the 21st Century Gabriella Gonzalez, 2008 Summarizes the education and labor market initiatives implemented or under way in four countries in the Arab region--Lebanon, Oman, Qatar, and the United Arab Emirates--to address the human resource issues they each face as they prepare their countries for a place in the 21st century global economy. Together, these countries highlight the variety of challenges faced by countries in the region and responses to those challenges.

Teacher Preparation for Linguistically Diverse Classrooms Tamara Lucas, 2010-09-13 Teacher educators today need knowledge and practical ideas about how to prepare all pre-service and in-service teachers (not just bilingual or ESL specialists) to teach the growing number of students in K-12 classrooms in the United States who speak native languages other than English. This book is at the forefront in focusing exclusively on the preparation of mainstream classroom teachers for this population of students. Part one provides the conceptual and contextual framework for the book, including a comprehensive discussion of relevant demographic trends and an analysis of national and state policies. Part two presents examples of initiatives in different institutional and geographic settings, highlighting three essential elements of teacher preparation: curriculum content, program design, and program coherence. Meeting a pressing need among teacher educators left to figure out, largely by trial and error, how best to prepare non-specialist classroom teachers to work with ELLs, this book both contributes to the research base and provides practical information to help readers envision possibilities they can apply in their own settings.

Research Anthology on Culturally Responsive Teaching and Learning Management Association, Information Resources,2021-05-28 As education continues to take great strides to become more inclusive and understanding of diverse students and cultures, teaching practices and methods for learning are an essential part of the puzzle and must be addressed to create culturally responsive educational experiences. Teachers must make meaningful connections between a student's culture, language, life experiences, and background to what the student is learning in the classroom. By integrating culture into the classroom, student achievement can be fostered, and students can excel. Underserved populations may face discrimination when it comes to culture, language, or race, and their needs can often be neglected. By implementing culturally responsive teaching, students can feel valued, motivated, understood, and included in their education. The Research Anthology on Culturally Responsive Teaching and Learning displays the best practices and lessons learned for culturally responsive teaching and learning across different types of institutions, classroom subjects, and with different types of students from diverse cultural backgrounds. The chapters focus on culturally responsive practices and how these methods for teaching can impact student success, empowerment, and cultural competence. This book is essential in understanding cultural diversity and inequity in education as well as the ways to address it. This book is ideal for faculty, teachers, counselors, administrators, principals, curriculum developers, instructional designers, professionals, researchers, and students seeking to improve their understanding of culturally responsive teaching and learning.

Passion for Adventure Saad Al Barrak,2012-06-01 As the Arab spring sweeps the Middle East, old ways are disappearing. Communications technology is breaking down national barriers and undermining rulers, while the youth look to new role models. Instead of the litany of Arab political failures, they look to business and the arts for inspiration. Saad al Barrak has been a pioneer of this Arab renaissance. In just seven years, he transformed a moribund ex-state-owned telecoms operator, MTC, from its base of 500,000 customers in Kuwait into the international giant Zain, a company with 72 million customers across 22 countries in the Middle East and Africa. Over the same period, revenues leapt from \$400 million to a staggering \$8 billion. Saad al Barrak has followed a distinctive philosophy of leadership and management, insisting that the purpose of business is to create a wonderful world. Indeed, leading global consultants McKinsey admit Saad al Barrak has changed their business models. His approach has its origins in the souks of his native Kuwait, but is shaped by a US education; by invasion, occupation, and war in the modern Middle East and by modern management gurus like Steve Jobs. His call to be bold, be daring, be different saw Zain operate in challenging markets like post-war Iraq and sub-Saharan Africa and, for the first time, in A *Passion for Adventure*, Saad al Barrak tells the inside story of the audacious, 2005 Easter weekend \$3.3billion purchase of the African operator Celtel.

Economic Development in the Middle East Rodney Wilson,2013 By examining economic development in the Middle East in the aftermath of the Arab Spring, this textbook introduces undergraduate and postgraduate students to the most pressing and topical economic issues in the contemporary Middle East. With comprehensive coverage of the entire region, the author examines the economic prospects for the Gulf and charts the growth of economic power in the region. Organised thematically, a full range of topics are discussed, including: the role of banks and capital markets in the region's development the impact of demographic changes, such as the dramatic decline in birth rates and the implications for future employment the development of economic advances in oil and gas production the effects of the region's economic development on international and inter-regional trade. Through discussing the region's problems of the past as well as the present and future challenges, this book provides students with a compact and manageable review of the state of economic development in the Middle East.

The Language of Schooling Mary J. Schleppegrell,2004-04-26 This book is about how language is used in the

context of schooling. It demonstrates that the variety of English expected at school differs from the interactional language that students use for social purposes outside of school, and provides a linguistic analysis of the challenges of the school curriculum, particularly for non-native speakers of English, speakers of non-standard dialects, and students who have little exposure to academic language outside of schools. The *Language of Schooling: A Functional Linguistics Perspective* builds on current sociolinguistic and discourse-analytic studies of language in school, but adds a new dimension--the framework of functional linguistic analysis. This framework focuses not just on the structure of words and sentences, but on how texts are constructed--how particular grammatical choices create meanings in the different kinds of texts students are asked to read and write at school. The *Language of Schooling: A Functional Linguistics Perspective* *provides a functional description of the kinds of texts students are expected to read and write at school; *relates research from other sociolinguistic and language development perspectives to research from the systemic functional linguistics perspective; *focuses on the increasing linguistic demands of contexts of advanced literacy (middle school through college); *analyzes the genres typically encountered at school, with extensive description of the grammatical features of the expository essay, a gatekeeping genre for secondary school graduates; *reviews the grammatical features of disciplinary genres in science and history; and *argues for more explicit attention to language in teaching all subjects, with a particular focus on what is needed for the development of critical literacy. This book will enable researchers and students of language in education to recognize how the grammatical and discourse features of the language of schooling construct the content areas, role relationships, and purposes and expectations of schools. It also will enable them to better understand the nature of language itself and how it emerges from and helps to maintain social structures and institutions, and to apply these understandings to creating classroom environments that build on the strengths students bring to school.
