Epic Solitude Katherine Keith, 2020-02-04 All her life, Katherine Keith has hungered for remote, wild places that fill her soul with freedom and peace. Her travels take her across America, but it is in the vast and rugged landscape of Alaska that she finds her true home. Alaska is known as a place where people disappear—at least a couple thousand go missing each year. But the same vast and rugged landscape that contributed to so many people being lost is precisely what has gotten her found. She and her husband build a log cabin miles away from the nearest road and create a life of love. An idyllic existence, but with isolation and brutal living conditions can also come heartbreak. Chopping wood and hauling water are not just parts of a Zen proverb but a requirement for survival. Keith experiences tragic loss and must push on, with her infant daughter, alone in the Alaskan backcountry. Long-distance dog sledding opens a door to a new existence. Racing across the state of Alaska offers the best of all worlds by combining raw wilderness with solitude and athleticism. The Iditarod Trail Sled Dog Race, the “Last Great Race on Earth,” remains a true test of character and offers the opportunity to intimately explore the frontier that she has come to love. With every thousand miles of winter trail traversed in total solitude, she confronts challenges that awaken internal demons, summoning all the inner grief and rage that lies dormant. In the tradition of Cheryl Strayed’s *Wild* and John Krakauer’s *Into the Wild*, *Epic Solitude* is the powerful and touching story of how one woman found her way—both despite and because of—the difficulties of living and racing in the remote wilderness.

An Everest Survivor Hugo Rodriguez Barroso, 2015-09-21 Reaching the summit of Everest is a great achievement; getting down safely is even greater. Until 1996 one climber would die out of six, most of the time during their descent. Hugo Rodriguez Barroso proudly waved the Mexican flag on the top of the world on May the 23rd of 1997, at 2:12 p. m. Hugo became at that moment the first athlete in the world to accomplish the huge challenges of long distance swimming and mountain climbing: the solo swim of the English Channel and the summit of Mount Everest, a conqueror of both sea and land. After reaching the summit Hugo faced an unpredicted situation of extreme survival under difficult circumstances: with no oxygen, no tent, no sleeping bag at 28,000 feet caught in a storm that would take the temperature down to 49 F below zero. From Camp Four the news spread across the mountain all the way down to Base Camp and to the world; Hugo had perished, no one had ever survived a single night at such altitude under such conditions. Back in 1996 several climbers had been trapped in South Col to die in an event still considered the greatest tragedy in History of Everest. But the unthinkable happened, something never ever seen before. In a journey into himself that at times verged on delirium, Hugo not only survived one whole night above 28,000 feet in Everest but, near dawn, he climbed down to Camp Four, which for any other individual would have been impossible to perform after being at extreme altitude for more than 34 hours. Was it his willpower, his determination or his impeccable training? Or was it an exercise of certainty? Perhaps none of the above would have occurred if at the time he hadn't managed to become one with the mountain. While Hugo, a brave Mexican and human being, goes on the tale of his climb to the highest mountain in the world, we will be led along an experience that for sure will invite us to reflect, and certainly, to make us become one with Everest.

Frozen in Time Mitchell Zuckoff, 2013-04-23 NEW YORK TIMES BESTSELLER A gripping true story of survival, bravery, and honor in the vast Arctic wilderness during World War II, from Mitchell Zuckoff, the author of New York Times bestseller *Lost in Shangri-La* On November 5, 1942, a US cargo plane slammed into the Greenland Ice Cap. Four days later, the B-17 assigned to the search-and-rescue mission became lost in a blinding storm and also crashed. Miraculously, all nine men on board survived, and the US military launched a daring rescue operation. But after picking up one man, the Grumman Duck amphibious plane flew into a severe storm and vanished. *Frozen in Time* tells the story of these crashes and the fate of the survivors, bringing vividly to life their battle to endure 148 days of the brutal Arctic winter, until an expedition headed by famed Arctic explorer Bernt Balchen brought them to safety. Mitchell Zuckoff takes the reader deep into the most hostile environment on earth, through hurricane-force winds, vicious blizzards, and subzero temperatures. Moving forward to today, he recounts the efforts of the Coast Guard and North South Polar Inc.—led by indefatigable dreamer Lou Sapienza—who worked for years to solve the mystery of the Duck’s last flight and recover the remains of its crew. A breathtaking blend of mystery and adventure Mitchell Zuckoff's *Frozen in Time: An Epic Story of Survival and a Modern Quest for Lost Heroes of World War II* is also a poignant reminder of the sacrifices of our military personnel and a tribute to the everyday heroism of the US Coast Guard.

Hegemony or Survival Noam Chomsky, 2007-04-01 From the world's foremost intellectual activist, an irrefutable analysis of America's pursuit of total domination and the catastrophic consequences that are sure to follow The United States is in the process of staking out not just the globe but the last unarmed spot in our neighborhood—the heavens—as a militarized sphere of influence. Our earth and its skies are, for the Bush administration, the final frontiers of imperial control. In *Hegemony or Survival*, Noam Chomsky investigates how we came to this moment, what kind of peril we find ourselves in, and why our rulers are willing to jeopardize the future of our species. With the striking logic that is his trademark, Chomsky dissects America's quest for global supremacy, tracking the U.S. government's aggressive pursuit of policies intended to achieve full spectrum dominance at any cost. He lays out vividly how the various strands of policy—the militarization of space, the ballistic-missile defense program, unilateralism, the dismantling of international agreements, and the response to the Iraqi crisis—cohere in a drive for hegemony that ultimately threatens our survival. In our era, he argues, empire is a recipe for an earthly wasteland. Lucid, rigorous, and thoroughly documented, *Hegemony or Survival* promises to be Chomsky's most urgent and sweeping work in years, certain to spark widespread debate.

The Quest for Fitness Mark Michaels,2001-07 *The Quest for Fitness: A rational exploration into the new science of organizations* follows the tradition of Frederick Taylor and W. Edwards Deming by rationally applying scientific principles and processes to understanding the nature of organization. The book recognizes that the environment has changed drastically since Taylor applied Newtonian principles to describe the industrial organization. The synthesis forces the reader to change his/her view from considering how an organization can be created to take control of its environment to how one can be created to survive over time in a changing environment. *The Quest for Fitness* leaves the reader with a vision of organizations as complex adaptive organisms striving to stay fit on an ever-changing landscape. There is an ongoing search to optimize one's position in an uncharted wilderness. Survival is not dependent upon the strongest but upon the ability to adapt as the landscape changes. The leaders of such organizations are no longer commanders, but explorers, who create network infrastructures enabling information to be received, integrated, and shared throughout the organization so that individual parts can best respond to immediate conditions, without the total system flying apart.

Since John Got Sick Allison Greene,John Greene,2018-05-04 John was always healthy. Then at age twenty-six a rare autoimmune disease struck out of nowhere. "Idiopathic," doctors said of the phenomenon that tried to take his life violently several times and to destroy his spirit more quietly over the next several years. *Since John Got Sick: A Quest for Survival and Faith* is the story of a young man's heroic battle to survive both the initial onslaught and

the ongoing assault of a traumatic autoimmune disease and its ensuing consequences (including dialysis, disability, transplant, depression, opioid dependence, and post-traumatic stress disorder). Simultaneously, it is the story of a mother’s love and strength against daunting odds, including donating a kidney. Traumatic illness often ends in a relatively quick death or a sudden miraculous recovery. John’s was neither. His is a story, with parts written in his words, of courage, endurance, and patience, along with a stubborn refusal to quit. While his mother sought God and prayer, John’s will to live was based in something else—perhaps even more intrinsic. For anyone who has suffered a serious illness, whether personally or with a child; anyone facing the challenges of autoimmune disease; and any medical professionals who have worked to help them, this book provides insight from the patient’s perspective. Patient advocates, clergy, and community members may benefit from vicariously experiencing the multifaceted challenges—mental, emotional, spiritual, social, and financial—shown here. And likely any mother, or parent, will identify, feel the heartache, and wonder, Why not me?

KANCHENJUNGA! Ivan Molloy,2024-04-10 In a post-apocalyptic world of climate disaster and widespread human conflict, four mid age friends try to make their way from the ruins of England to the Great Southern Land (Australia) hoping to find safety. While in the foothills of the Himalayas, they find ancient scrolls of the Kanchen religious cult who believed human spirits could actually ‘body jump’ and increase their power to eventually dominant humankind. Not knowing the full incredible content of the scrolls, nor who else seeks them, the friends helped by a former monk continue their way across a world of massive chaos and conflict. Along the way Jack, the main character, endures attacks of a powerfully spirit of unknown origin, which seeks to absorb his power and destroy him. After weeks of travel and attacks by Nazis pirates, militant Islamic bands, warlord groups, crocodiles, Komodo dragons and female warriors known as the Amazons, among others, the group finally reach the flooded ruins of Melbourne. There among the wreckage of the former city they find ‘The Dome’ – a huge, inhabited fortress structure built on the top of a former massive sporting stadium. Here the group try to find sanctuary. The Dome however presets its own dangers to the travellers. The insular dome community led by the remnants of a former high-tech company survives by building (AI) androids for internal security, external defence and trade with outside warring groups. Heavily armed and constantly under attack by warring gangs, remnants of former states and others, and ruled by a pseudo dictator; it has an alliance with other similarly militarised population centres in the region. But the dome society also faces its own deadly internal threats. In this the first book of the series, the travellers with the help of others, find temporary shelter near the Dome. But now they need to gain entrance, and seek safety from the many external forces, both in human and spirit form, who seek to destroy them. And the group still need to learn the secrets of the Kanchen scrolls, and the deadly consequences of what such knowledge will bring to themselves, and those both within the dome and without.
