**Office for the Web Made Easy** James Bernstein, 2021-04-13 With the growing trend of everything being online and people working from home as well as taking their school classes online, there is a growing need to be able to work in the cloud and be able to access your files from any location as well as share them with others so they can work on them as well. Microsoft Office has been around since 1990 with various versions and improvements throughout the years and lately Microsoft has really been pushing their user base to use their online subscription based versions rather than the desktop versions we are all used to. You might have heard of Office 365 or Microsoft 365 which are the subscription based (pay for) versions but there is also another option that you can use for free called Office for the Web (previously named Office Online), and this version just might have enough features to allow you to get your work done without costing you any money. The goal of this book is to get you up and running with Office for the Web and cover all the things you need to know to get you working with these online productivity applications. It sticks with the basics yet covers all aspects of the application to help you accomplish your goals without needing to be a computer genius. The content of this book will also apply to Office 365 users. The chapters in the book cover the following topics: Chapter 1 - Getting Started Chapter 2 - OneDrive Chapter 3 - Word Chapter 4 - Excel Chapter 5 - PowerPoint Chapter 6 - Outlook, Calendar and People Chapter 7 - OneNote Chapter 8 - Additional Apps Chapter 9 - Sharing, Downloading and Printing Your Files Chapter 10 - Extras About the Author James Bernstein has been working with various companies in the IT field for over 20 years, managing technologies such as SAN and NAS storage, VMware, backups, Windows Servers, Active Directory, DNS, DHCP, Networking, Microsoft Office, Exchange, and more. He has obtained certifications from Microsoft, VMware, CompTIA, ShoreTel, and SNIA, and continues to strive to learn new technologies to further his knowledge on a variety of subjects. He is also the founder of the website [OnlineComputerTips.com](http://OnlineComputerTips.com), which offers its readers valuable information on topics such as Windows, networking, hardware, software, and troubleshooting. Jim writes much of the content himself and adds new content on a regular basis. The site was started in 2005 and is still going strong today.

*Quick Course in Microsoft Office 2000* Joyce Cox, Christina Dudley, Polly Urban, 1999 The authors teach Office applications by showing how to create documents people can use in their work. **Microsoft Word for Seniors Made Easy** James Bernstein,2023-06-06 Since Windows and Word were both created by Microsoft, it makes sense that they would want to push Windows users to use Word as their word processing software. You might have heard of other word processing software such as Google Docs, LibreOffice, WordPerfect and Apple Pages. Even though these are powerful full featured word processing programs, they are nowhere near as popular as Microsoft Word.If you have Word installed on your computer, you most likely have other Microsoft programs such as Excel and PowerPoint installed as well since most of the time, people buy Word as part of the Microsoft Office suite of apps even though it is possible to buy Word as a standalone product.Speaking of Office, you might have heard or read about Office 365. This is Microsoft's subscription-based Office suite that you can use online via your web browser and also as installed programs on your computer. You pay yearly for the subscription but that gets you all the updates for all the Office software as they come out. There is also a free version of Word and other Office apps you can use online called Office for the Web but it's not as powerful as the Office 365 version yet can be just fine for many users.In this book I will be using the desktop version of Word which most people prefer since it's a bit easier to use and you don't need to worry about storing documents in the cloud unless you really want to since it will be an option for you. Once you get the hang of the desktop version of Word, you should also be able to apply your knowledge to the online version and adapt just fine.
