VUCA in Start-ups Dr. Aseem Chauhan, Prof. (Dr.) Manoj Joshi, Prof. (Dr.) Ashok Kumar & Suhayl Abidi, 2021-12-25 How to Thrive as a Start-Up in an Uncertain World What motivates a start-up in its journey? Wealth and fame? Or is it hunger for innovation? VUCA in Start-Ups attempts to capture a start-up's entrepreneurial journey and find out why some do well when others don't. It's a highly volatile environment out there for entrepreneurs and start-ups, thanks to the unprecedented Covid-19 crisis filled with volatility, uncertainty, complexity and ambiguity (VUCA). Many businesses that did well in the past had to shut shop as a result. So what went wrong? To find the answer, it's important to understand what worked in the past and why a new venture must discover fresh and innovative opportunities to survive. Learn from those who chose the road less travelled, including Zomato, Paytm, Flipkart, Ola Cabs and Quikr, and discover the underlying causes for start-up successes and failures. These well-researched case studies aim to inspire those who wish to embark on an entrepreneurial journey.

Bank Exam Pedia Bharath Seeman, 2015-02-17 In this present era of competition, every competitive examination consists of 5 sections Quantitative Aptitude, Reasoning, General English, Computer Science and General Awareness related to banking industry. After teaching more than 18,000 students in 28 years, we have seen a lot of students spending their time practicing aptitude and reasoning alone. But the students who cleared the exam would definitely say the above method of practicing would not help because merely passing in Aptitude and Reasoning sections will not help. Students should also think about the other sections and overall cut off. We know a lot of students who cleared all the sections but failed to clear the overall cut off. In fact, Practicing GK and English is the only way to raise the overall cut-off. So, we have decided to dedicate this entire magazine just for General Awareness & Banking awareness. We sincerely believe that students who practice the next 100 pages would secure 40 marks from the Banking awareness section. We thank Google Play for publishing our e-magazine on their mobile platform. We also thank our students who assisted to bring this magazine out.

Boom Country? Alan Rosling, 2017-05-20 In Boom Country?, Alan Rosling, entrepreneur and strategic advisor in India for over 35 years, explores an unmistakable and profound change that is underway in the Indian business landscape. A fresh wave of enterprise and start-ups; rapid advancements in technology; government reform; and recently developed pools of risk capital, he holds, are contributing increasingly to a massive expansion in new business ? all of it underpinned by a deep social change, a willingness to `do things differently?, especially among the young. Drawing upon his own experiences and more than 100 interviews with Indian entrepreneurs ? representing traditional leading business houses (Tata, Mahindra and Godrej), established first-generation entrepreneurs (Sunil Mittal, Kishore Biyani and Narayana Murthy, among others) and new-generation start-ups (including Sachin Bansal, Bhavish Aggarwal and Vijay Shekhar Sharma) ? as well as forces of the government, Rosling provides an incisive and in-depth analysis of the opportunities and challenges, both traditional and contemporary, of doing business in India. Yet, the growing uncertainty of global trends and India?s own record of under-performing despite its massive potential, lead him to one vital question: Can the current upsurge in entrepreneurial activity ? imperfect and early as it may be ? really reshape India?s economy and propel it towards becoming a true boom country for new enterprise?

Applied Computer Science for GGOS Observatories Alexander N.J. Neidhardt, 2017-08-08 This book combines elementary theory from computer science with real-world challenges in global geodetic observation, based on examples from the Geodetic Observatory Wettzell, Germany. It starts with a step-by-step introduction to developing stable and safe scientific software to run successful software projects. The use of software toolboxes is another essential aspect that leads to the application of generative programming. An example is a generative network middleware that simplifies communication. One of the book's main focuses is on explaining a potential strategy involving

autonomous production cells for space geodetic techniques. The complete software design of a satellite laser ranging system is taken as an example. Such automated systems are then combined for global interaction using secure communication tunnels for remote access. The network of radio telescopes is used as a reference. Combined observatories form coordinated multi-agent systems and offer solutions for operational aspects of the Global Geodetic Observing System (GGOS) with regard to "Industry 4.0".

Asymmetric information on non-cognitive skills in the Indian labor market: An experiment using an online job portal Yamauchi, Futoshi, Nomura, Shinsaku, Imaizumi, Saori, Areias, Ana, Chowdhury, Afra, 2018-07-20 This paper examines the impact of non-cognitive (socio-emotional) skills on job market outcomes using a randomized control trial implemented in an online job portal in India. Job seekers who registered in the portal were asked to take a Big Five type personality test and, for a random sub-sample of the test takers, the results were displayed to potential employers. Outcomes are measured by whether a potential employer shortlists a seeker by opening (unlocking) his/her application and background information. The results show that the treatment group for whom test results were shown generally enjoyed a higher probability of unlock. That is, employers are more interested in those for whom they can see personality test results. Such a relationship was not seen in the pre-test period, which confirms that the above results are unlikely to be spurious. We also found a significant impact among organized, calm, imaginative and/or quiet applicants (no effect was detected among easy-going, sensitive, realistic and/or out-going applicants), which seems to display employers' preferences.
