**What Brown V. Board of Education Should Have Said** Bruce A. Ackerman, 2001-08 Brown v. Board of Education, the Supreme Court's landmark 1954 decision ordering the desegregation of America's public schools, is perhaps the most famous case in American constitutional law. Criticized and even openly defied when first handed down, in half a century Brown has become a venerated symbol of quality and civil rights. Its meaning, however, remains as contested as the case is celebrated. In the decades since the original decision, constitutional interpreters of all stripes have found within it different meanings. Both supporters and opponents of affirmative action have claimed the mantle of Brown, criticizing the other side for betraying its spirit. Meanwhile, the opinion itself has often been criticized as bland and uninspiring, carefully written to avoid controversy and maintain unanimity among the Justices. In this volume, nine of America's top constitutional and civil rights experts have been challenged to rewrite the Brown decision as they would like it to have been written, incorporating what they now know about the subsequent history of the United States but making use of only those sources available at the time of the original decision. In addition, Jack Balkin gives a detailed introduction to the case, chronicling the history of the litigation in Brown and explaining the current debates over its legacy.

**The Architecture of Desire** Solangel Maldonado, 2024-05-21 Explores the reach of the law into our most personal and private romantic lives The Architecture of Desire examines how the law influences our most personal and private choices—who we desire and choose as intimate partners—and explores the psychological, economic, and social effects of these choices. Romantic preferences, as shaped by law, perpetuate segregation and subordination by limiting, on the basis of race, individuals' prospects for marriage and marriage-like commitments, as well as economic and social mobility. The book begins by tracing the legacy of slavery, anti-miscegenation, segregation, and racially discriminatory immigration laws to show how this legal landscape facilitated the residential, economic, and social distance between racial and ethnic groups, which in turn continue to shape romantic preferences today. Solangel Maldonado argues that the law further influences intimate choices by structuring the spaces within which individuals meet and interact via practices such as redlining, gentrification, and zoning. Maldonado includes studies of online and offline dating preferences to demonstrate that romantic predilections follow a gendered racial hierarchy in which Whites are at the top, African-Americans at the bottom, and—depending on skin tone—Asian-Americans and Latinos in the middle. These preferences may be explicit, implicit, or both, but they are usually the result of stereotypes reflected in social and cultural norms. Furthermore, since marriage confers substantial legal, economic, and social advantages, sexual racism further limits an individual's opportunity to find a partner and reap these benefits. Finally, the book proposes ways to minimize the law's influence over who we desire, love, and bring into our families, such as changes to dating platforms as well as to housing, education, and transportation policies.
