The Racing Game Marvin B. Scott, This study of a unique social world probes beneath the thrill and spectacle of horse racing into the lives of the honest boys, the gyps, the manipulators, the stoops, and the Chalk eaters--the constituents of race track society and the players of the racing game. With scientific precision and journalistic vigor, Scott describes the everyday activities--the objectives and strategies--of those whose lives are organized around track proceedings and who compete with chance and one another. The players in the racing game range from track owners to stable boys, from law enforcers to lawbreakers, and from casual sportsmen to pathologically addicted gamblers. Considering the self-interests, the normative and operational codes, and the interactional relationships among the major types and subtypes of participants, the author defines the components of strategic movement within the framework of rules and resources to show how a player's relations to the means of production governs his behavior. The fruitful application of sociological theory and method to an unusually interesting social context makes this particularly useful still for courses in social problems and the sociology of organizations and of leisure. ...when he was teaching at Berkeley, Goffman asked me to come to his seminar to hear a student, Marvin Scott, present his research on horse racing. ...in the course of his presentation, Scott suggested in passing that gamblers, including horse players, sometimes had winning streaks' or losing streaks.' Goffman, who had been listening appreciatively until that point, interrupted to say that of course Scott meant that they thought they had such streaks of good or bad luck. But Scott said no, these were observable facts.' Goffman, unwilling to accept such supernatural talk, persisted, appealing to the laws of probability to assure Scott that such streaks' were natural occurrences in any long run of tries in such a game as blackjack or craps.--Howard Becker Marvin B. Scott retired in 2001 as professor of sociology at Hunter College, City University of New York. He previously taught at San Francisco State College and received his Ph.D. in 1966 at the University of California, Berkeley. Jaime Suchlicki is Bacardi Professor of History at the Graduate School of International Studies at the University of Miami, and executive director of its Cuban-American and Cuban Center.

Designing Immersive Video Games Using 3DUI Technologies Arun K. Kulshreshth,Joseph J. LaViola Jr.,2018-05-29 A 3D user interface (3DUI) is an interface in which the user performs tasks in three dimensions. For example, interactions using hand/body gestures, interaction using a motion controller (e.g. Sony PlayStation Move), interaction with virtual reality devices using tracked motion controllers, etc. All these technologies which let a user interact in three dimensions are called 3D user interface technologies. These 3D user interfaces have the potential to make games more immersive & engaging and thus potentially provide a better user experience to gamers. Although 3D user interface technologies are available for games, it is unclear how their usage affects game play and if there are any user performance benefits. This book presents state of the art research on exploring 3D user interface technologies for improving video games. It also presents a review of research work done in this area and describes experiments focused on usage of stereoscopic 3D, head tracking, and hand gesture-based control in gaming scenarios. These experiments are systematic studies in gaming environments and are aimed at understanding the effect of the underlined 3D interface technology on the gaming experience of a user. Based on these experiments, several design guidelines are presented which can aid game designers in designing better immersive games.
