Calling All Cars Kathleen Battles, 2010 Calling All Cars shows how radio played a key role in an emerging form of policing during the turbulent years of the Depression. Until this time popular

culture had characterized the gangster as hero, but radio crime dramas worked against this attitude and were ultimately successful in making heroes out of law enforcement officers. Through close analysis of radio programming of the era and the production of true crime docudramas, Kathleen Battles argues that radio was a significant site for overhauling the dismal public image of policing. However, it was not simply the elevation of the perception of police that was at stake. Using radio, reformers sought to control the symbolic terrain through which citizens encountered the police, and it became a medium to promote a positive meaning and purpose for policing. For example, Battles connects the apprehension of criminals by a dragnet with the idea of using the radio network to both publicize this activity and make it popular with citizens. The first book to systematically address the development of crime dramas during the golden age of radio, *Calling All Cars* explores an important irony: the intimacy of the newest technology of the time helped create an intimate authority—the police as the appropriate force for control—over the citizenry.

**Lifehacked** Allen Wong, 2012-11-07 Allen Wong is the developer behind many best-selling apps such as 5-0 Radio and Police Scanner+. He became a self-made millionaire before he was 25. But, life wasn't always this grand for him. He was the only person in his family earning an income. And, he came from an oppressed family that grew up in the slums. Regardless, the apps he published were downloaded by over 25 million people. His apps have been featured in many places, including

Wired.com, NBC News, and CNN. Now he's sharing the story on how he did it, the crises he struggled with, and what his father taught him to be successful. App companies have paid him thousands of dollars for consultant work, and he has helped them increase their download numbers by over 1000%. One of those apps was downloaded by over 100,000 users in one day. And now he is revealing his marketing secrets for the first time in this book. This book was written with non-technical people in mind. The book covers both life and entrepreneurial lessons, and not all of the book is about app development.

**Tango Juliet Foxtrot** Iain Donnelly, 2021-11-09 In thirty years on the front line of British policing, there is very little that Iain Donnelly didn't do: from being a uniformed constable on the beat in London to running counter-terrorism and surveillance operations, combatting child sexual exploitation and overseeing the investigation of the most serious crimes. During that time, he saw the job change irrevocably, to the point where the public no longer knows what to expect from the police and the police service no longer knows what to expect of itself. Tango Juliet Foxtrot - police code for 'the job's fucked' - reveals how constant political meddling and a hostile media narrative have had a devastating impact on the morale of police officers and their ability to protect the public. With the organisation cut by 20,000 officers and 23,000 police staff, only 7 per cent of reported crime now results in a charge - compared with around 20 per cent ten years ago. By turns fascinating and funny, poignant and uplifting, this compelling account paints a vivid picture of what life is really like for those tasked with keeping us safe - and, crucially, explores what needs to change to secure the future of British policing.

**Striking a Balance** ,2004 Recently, the Queensland Police Service adopted encrypted digital radio communication technology to improve coverage and security of information. As a result, the public (including the media) will not have open access to police radio communications. This report discusses police radio systems and the media's role in a democratic state. The recommendations aim to balance considerations of individual privacy, operational security and public safety against transparency and accountability in policing.
