Innovation in Methodology and Practice in Language Learning Christopher Williams, 2015-09-04

This volume is composed of 24 papers originally presented as talks at the VIII National Conference of the Italian Association of University Language Centres (Associazione Italiana dei Centri Linguistici Universitari: AICLU), held at the University of Foggia, Italy, between 30 May and 1st June 2013. The contributions fall into five sections: 1) keynote addresses from plenary speakers; 2) innovative challenges for language centres; 3) new developments in teaching language for specific purposes; 4) proposals and case studies in Content and Language Integrated Learning; and 5) the use of new technologies in language learning. 18 papers are in English, four in Italian, one in French and one in German. The fact that three-quarters of the papers are in English reflects the way English has become the lingua franca of academic conferences today. However, in keeping with the ethos of CercleS (Confédération Européenne des Centres de Langues de l'Enseignement Supérieur, the pan-European organisation to which AICLU belongs), which is strongly committed to promoting plurilingualism, it was crucial that contributions would also be accepted in other languages. The volume represents the 'state of the art' in the field of language teaching and theory in university language centres not only in Italy, but also in other parts of Europe and the Mediterranean, and testifies to the rich variety of ways in which these centres are adapting and thriving in rapidly changing times.

Il Ragazzini 2012. Dizionario inglese-italiano, italiano-inglese Giuseppe Ragazzini, 2011

Lexical collocations in bilingual dictionaries Barbara Berti, 2018-10-23T00:00:00+02:00 Elusive yet intuitive at the same time, the concept of collocation has attracted the attention of different branches of linguistics for many a year, owing to the proven pervasiveness of such combinations in languages. Although a universally accepted definition of collocation has not been reached as each attempted description is inextricably related to the linguist's standpoint, the development of a series of very workable ideas on the nature of these combinations has led to the production of worthy linguistic commodities. While English lexicography has kept pace with the development in lexicology and corpus linguistics, Italian lexicography has only recently started to look in that direction. The author investigates the treatment of lexical collocations in the major bilingual English-Italian dictionaries, looking closely at the lexicographers' choices while keeping the end users and their heuristics in mind.

Silence and Sacrifice Merav Shohet, 2021-04-20

How do families remain close when turbulent forces threaten to tear them apart? In this groundbreaking book based on more than a decade of research set in Vietnam, Merav Shohet explores what happens across generations to families that survive imperialism, war, and massive political and economic upheaval. Placing personal sacrifice at the center of her story, Shohet recounts vivid experiences of conflict, love, and loss. In doing so, her work challenges the idea that sacrifice is merely a blood-filled religious ritual or patriotic act. Today, domestic sacrifices—made largely by women—precariously knot family members together by silencing suffering and naturalizing cross-cutting gender, age, class, and political hierarchies. In rethinking ordinary ethics, this intimate ethnography reveals how quotidian acts of sacrifice help family members forge a sense of continuity in the face of trauma and decades of dramatic change.

Visual Sociology Douglas Harper, 2023-06-09 This new version of the authoritative textbook in the field of visual sociology focuses on the key topics of documentary photography, visual ethnography, collaborative visual research, visual empiricism, the study of the visual symbol and teaching sociology visually. This updated and expanded edition includes nearly twice as many images and incorporates new in-depth case studies, drawing upon the author's lifetime of pioneering research and teaching as well as the often neglected experiences of women and people of color. The book examines how documentary photography can be useful to sociologists, both

because of the topics examined by documentarians and as an example of how seeing is socially constructed. Harper describes the exclusion of women through much of the history of documentary photography and the distinctiveness of the female eye in recent documentary, a phenomenon he calls the gendered lens. The author examines how a visual approach allows sociologists to study conventional topics differently, while offering new perspectives, topics and insights. For example, photography shows us how perspective itself affects what we see and know, how abstractions such as ideal types can be represented visually, how social change can be studied visually and how the study of symbols can lead us to interpret public art, architecture and person-made landscapes. There is an extended study of how images can lead to cooperative research and learning; how images can serve as bridges of understanding, blurring the lines between researcher and researched. The important topic of reflexivity is examined by close study of Harper's own research experiences. Finally, the author focusses on teaching, offering templates for full courses, assignments and projects, and guides for teachers imagining how to approach visual sociology as a new practice. This definitive yet accessible textbook will be indispensable to teachers, researchers and professionals with an interest in visual sociology, research methods, cultural theory and visual anthropology.

Pseudo-English Cristiano Furiassi, Henrik Gottlieb, 2015-03-10 This volume focuses on how English, through false Anglicisms, influences

several European languages, including Italian, Spanish, French, German, Danish and Norwegian. Studies on false Gallicisms are also included, thus showing how English may be affected by false borrowings.

Archaeologies of the Heart Kisha Supernant, Jane Eva Baxter, Natasha Lyons, Sonya Atalay, 2020-02-13
Archaeological practice is currently shifting in response to feminist, indigenous, activist, community-based, and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people. Inspired by the calls for a different way of doing archaeology, this volume presents a case here for a heart-centered archaeological practice. Heart-centered practice emerged in care-based disciplines, such as nursing and various forms of therapy, as a way to recognize the importance of caring for those on whom we work, and as an avenue to explore how our interactions with others impacts our own emotions and heart. Archaeologists are disciplined to separate mind and heart, a division which harkens back to the origins of western thought. The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it. Scientific approaches to understanding the world assume there

is an objective world to be studied and that humans must remove themselves from that world in order to find the truth. An archaeology of the heart rejects this dualism; rather, we see mind, body, heart, and spirit as inextricable. An archaeology of the heart provides a new space for thinking through an integrated, responsible, and grounded archaeology, where there is care for the living and the dead, acknowledges the need to build responsible relationships with communities, and with the archaeological record, and emphasize the role of rigor in how work and research is conducted. The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart-centered practice can impact archaeological theory, methodology, and research throughout the discipline.

Engaging Ambience Brian McNely, 2024-04-22

Engaging Ambience is an in-depth exploration of contemporary rhetorical theory, drawing from rich traditions of visual and sensory research. It is the first book to develop comprehensive empirical approaches to ambient rhetoric and the first to offer systematic approaches to visual research in studies of rhetoric and writing. These approaches address the complexities of everyday life and offer practical advice for understanding the factors that shape individuals and communities, how they understand one another, and the kind of world they envision. By articulating theoretically sound methodologies and methods for the empirical study of rhetoric conceived as originary, immanent, and enveloping, Brian McNely contributes

a methodological perspective that furthers new materialist theories of rhetoric. McNely demonstrates how scholars' emergent theories of rhetoric call for new methodologies that can extend their reach, and in the process, he proposes a new conception of visual rhetoric. *Engaging Ambience* delineates methodologies and methods that help researchers in rhetoric and writing studies discover the ambient environments that condition and support everyday communication in all its forms. *Engaging Ambience* details and demonstrates visual and multisensory methodologies and methods for exploring the wondrous complexity of everyday communication. It will appeal to scholars and students of rhetorical theory, visual and multisensory rhetorics, and composition and writing studies.

Geotechnics and Heritage Renato

Lancellotta, Alessandro Flora, Carlo Viggiani, 2017-08-15 Conservation of monuments and historic sites is one of the most challenging problems facing modern civilization. It involves various cultural, humanistic, social, technical, economical and administrative factors, intertwining in inextricable patterns. The complexity of the topic is such that guidelines or recommendations for intervention techniques and design approaches are difficult to set. The Technical Committee on the Preservation of Monuments and Historic Sites (named TC19) was established by the International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE) in 1981, is supported by the Italian Geotechnical Society (AGI), and was renamed TC301 in 2010. This

book assesses the role of historic towers as symbols of community identity and how to best preserve this special cultural heritage. Well-documented, exemplary case histories highlight concepts of preservation, integrity, cultural heritage, dynamic identification techniques and techniques for long-term monitoring of historic towers, as well as provide examples of appropriate intervention measures. The book will be of interest to professionals and academics in the wider fields of civil engineering, architecture and cultural resources management, and particularly those involved in art history, history of architecture, geotechnical engineering, structural engineering, archaeology, restoration and cultural heritage management.

Trauma Narratives in Italian and Transnational Women's Writing Tiziana de Rogatis, Katrin Wehling-Giorgi ,2022-12-14 This edited volume is the first to propose new readings of Italian and transnational female-authored texts through the lens of Trauma Studies. Illuminating a space that has so far been left in the shadows, *Trauma Narratives in Italian and Transnational Women's Writing* provides new insights into how the trope of trauma shapes the narrative, temporal and linguistic dimension of these works. The various contributions delineate a landscape of female-authored Italian and transnational trauma narratives and their complex textual negotiation of suffering and pathos, from the twentieth century to the present day. These zones of trauma engender a new aesthetics and a new reading of history and cultural memory as an articulation of

female creativity and resistance against a dominant cultural and social order.

The Secret Lives of Adults Allison

Keating, 2018-09-14 People have been sharing their life stories with psychologist Allison Keating for the past eighteen years, and the words she hears most often are 'I feel overwhelmed,' followed by 'I thought I'd have it figured out by now.' Adulthood is tough. As we try to divide ourselves between our partner, children, parents, siblings, friends and colleagues, it is no wonder we can feel overwhelmed, often neglecting the most important relationship of all – the one we have with ourselves. The Secret Life of Adults invites you to audit and improve your seven key relationships, looking at how the experiences of your past impact on who you are today. Ask yourself: - Who are you in your relationships? - Are they supportive, nourishing and empowering – or draining and filled with anxiety? - Is there a big gap between your public and private self? - What are your expectations of others and of yourself? - Do you understand why you react to certain comments from family or friends? - Do you repeat patterns of behaviour in your relationships? The Secret Life of Adults has exercises and techniques to help you get to know yourself better and understand why you behave as you do in each part of your life, allowing you to unlock the secret to less stressful and more meaningful relationships.

Advances in Intelligent, Flexible, and Lean Management and Engineering Machado,
Carolina, Davim, J. Paulo, 2021-06-11 In

organizations today, knowledge on how to manage in a green environment is of a particular emphasis and is an important discussion topic amongst academics, researchers, and managers. Undertakings such as sustainability, not only in an environmental perspective but also in an organizational perspective; recycling; re-use; low costs; waste reduction; and high productivity are only some, among many others, that require a break in traditional management paradigms. Present organizations need to be managed with different models where innovation and change are key words as they drive the organization to success. At this level, green management appears as a new way to manage and understand organizations, making them more strategic and competitive in the markets where they are and where they will be in the future. Advances in Intelligent, Flexible, and Lean Management and Engineering introduces the newest models, theories, and tools along with the practices, policies, and strategies for management and engineering. This book reflects on the experiences and thoughts about the state-of-the-art research in the green management and engineering fields, as well as the future direction of this scope of research. It covers important topics such as green transformational leadership, artificial intelligence, production models, sustainable factories, and more. This book is an essential resource tool for engineers, executives, managers, economists, practitioners, researchers, academicians, and students looking for information on the advances in management and engineering for businesses.

The Routledge Handbook of Urban Design Research Methods Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field, urban design has been made, unmade, and remade at the intersections of multiple disciplines and professions. It is now a decisive moment for urban design to reflect on its rigour and relevance. This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research. This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field-specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus

on the related research designs and methods. The specific aim, scope, and structure of this handbook are appealing to a range of audiences interested and/or involved in shaping places and public spaces. What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency, affordance, place, informality, and performance. In addition to the introduction chapter, this handbook includes 80 contributors and 52 chapters organised into five parts. The commissioned chapters showcase a wide range of topics, research designs, and methods with references to relevant scholarly works on the related topics and methods.

Dalla Valdelsa al Conero. Ricerche di archeologia e topografia storica in ricordo di Giuliano de Marinis. Notiziario della Soprintendenza per i Beni Archeologici della Toscana. Supplemento 2 al n. 11/2015 Giacomo Baldini, Pierlugi Giroladini, 2016-12-29 Ad un anno dallo svolgimento del convegno "Dalla Valdelsa al Conero. Ricerche di archeologia e topografia storica in ricordo di Giuliano de Marinis" il Notiziario della Soprintendenza per i Beni Archeologici della Toscana dedica il suo secondo supplemento alla pubblicazione degli atti. Nel testo sono riportate le ricerche e gli studi che amici, colleghi e studiosi del settore hanno voluto dedicare al ricordo di Giuliano de Marinis, ripercorrendo idealmente le fasi del suo lavoro nei ruoli della Soprintendenza: dai primi studi

sulla Valdelsa fino al fondamentale apporto all'archeologia delle Marche, passando attraverso le ricerche su Firenze e sull'ager Faesulanus. Non poteva mancare una parte dedicata al restauro, alla valorizzazione ed ai temi di archeologia urbana, ambiti nei quali Giuliano de Marinis rappresenta ancora oggi un punto di riferimento essenziale. Il volume è diviso in due parti: nella sezione saggi sono riportati gli interventi presentati durante le sessioni di lavoro, mentre nella sezione poster trovano posto gli oltre trenta elaborati proposti da giovani studiosi o gruppi di ricerca sulle tematiche affrontate nel convegno.

Archaeology Outside the Box Hans

Barnard, 2022-12-31 Archaeology Outside the Box makes contemporary archaeology germane to the general public as well as to researchers in other disciplines. In thirty-one richly illustrated chapters, a wide variety of projects is presented by an international group of anthropologists, archaeologists, architects, and artists. These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways, or by addressing contemporary concerns with archaeological theory and research methods. Demonstrating the fascinating and pertinent nature of archaeology, the authors go far beyond its definition as a discipline that unearths objects of ancient material culture. Many chapters also provide arguments relevant to the soul-searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid-19

pandemic.
