A Case Study of Radar Determined Rainfall as Compared to Rain Gage Measurements Martin Ross,1971

Radar-computed Rainfall Compared with Observations from a Dense Network of Rain Gauges Martin Ross,1969 Using Wilson's Rainfall Rate - Echo Intensity (RR-EI) chart, based on the average relationship, radar data collected for 36 hours, using the US Weather Bureau's WSR-57 at Atlantic City, New Jersey, are compared with rainfall data from three tipping-bucket rain gauges. These tipping-bucket gauges are located within 60 nm of the radar and cover a 4.8 square-mile area. Comparisons between the radar and tipping-bucket gauges are shown. Radar measurements were within 2% of the total rain gauge average. The correlation coefficient was .91. Use of the US Weather Bureau's RR-EI chart would have underestimated the average areal precipitation. Hourly rainfall amounts of 0.01 inches were detected in 80% of the cases. Hourly amounts of 0.02 inches or more were detected in 100% of the cases. (Author).

Radar Hydrology Yang Hong,Jonathan J. Gourley,2018-09-03 Radar Hydrology: Principles, Models, and Applications provides graduate students, operational forecasters, and researchers with a theoretical framework and practical knowledge of radar precipitation estimation. The only text on the market solely devoted to radar hydrology, this comprehensive reference: Begins with a brief introduction to radar Focuses on the processing of radar data to arrive at accurate estimates of rainfall Addresses advanced radar sensing principles and applications Covers radar technologies for observing each component of the hydrologic cycle Examines state-of-the-art hydrologic models and their inputs, parameters, state variables, calibration procedures, and outputs Discusses contemporary approaches in data assimilation Concludes with methods, case studies, and prediction system design Includes downloadable MATLAB® content Flooding is the #1 weather-related natural disaster worldwide. Radar Hydrology: Principles, Models, and Applications aids in understanding the physical systems and detection tools, as well as designing prediction systems.

Investigation of the Quantitative Determination of Point and Areal Precipitation by Radar Echo Measurements A. L. Sims,1964 Two drop cameras were operated in Illinois and one at Flagstaff, Arizona. Data obtained from these installations are being reduced and analyzed. The rainfall rate-radar reflectivity relationships are summarized. The data from Miami, Florida, has been stratified by synoptic type, rainfall type, and by a measure of the instability. A brief description of an objective means of coalescence curve fitting is described. (Author).

Radar Rainfall Data Chandra S. Pathak,Ramesh S. V. Teegavarapu,2018 MOP 139 provides a flexible framework and practical guidance in the development, analysis and use of radar rainfall data sets.

Radar in Meteorology David Atlas,2015-03-30 This fully illustrated volume covers the history of radar meteorology, deals with the issues in the field from both the operational and the scientific viewpoint, and looks ahead to future issues and how they will affect the current atmosphere. With over 200 contributors, the volume is a product of the entire community and represents an unprecedented compendium of knowledge in the field.

Doppler Radar & Weather Observations Richard J. Doviak,Dusan S. Zrnica,2014-08-27 This book reviews the principles of Doppler radar and emphasizes the quantitative measurement of meteorological parameters. It illustrates the relation of Doppler radar data and images to atmospheric phenomena such as tornados, microbursts, waves, turbulence, density currents, hurricanes, and lightning. Radar images and photographs of these weather phenomena are included. Polarimetric measurements and data processing An updated section on RASS Wind profilers Observations with the WSR-88D An updated treatment of lightning Turbulence in the planetary boundary layer A short history of radar Chapter problem sets

Polarimetric Doppler Weather Radar V. N. Bringi,V. Chandrasekar,2001-08-30 This 2001 book provides a detailed introduction to the principles of Doppler and polarimetric radar, focusing in particular on their use in the analysis of weather systems. The design features and operation of practical radar systems are highlighted throughout the book in order to illustrate important theoretical foundations.

Radar and Atmospheric Science Roger Wakimoto,2015-03-30 This book is a tribute to one of the leading scientists in meteorology, Dr. David Atlas. It was written by a group of specialists and presented at a symposium to honor Dr. Atlas' life and career as meteorologist. It serves as a comprehensive resource for scientists and educators, and also as an inspiring historical record of scientific research and important discoveries in the field of meteorology.

A Rain Gage Evaluation of the Miami Reflectivity-rainfall Rate Relation W. L. Woodley,Alan Herndon,1979

Hydrometeor Parameters Determined from the Radar Data of the SAMS Rain Erosion Program V. G. Plank,1974 The traditional equations relating the radar reflectivity factor and the precipitation rate are reviewed. The hydrometeor and radar parameters involved in the AFCRL/SAMS program at Wallops Island, Virginia, are defined and the methods of measurement and correlation are explained. The hydrometeor regions and transition zones of the Wallops Island storms are discussed and the methods of computing the precipitation rate, the liquid-water-content, and the integral of the liquid-water-content along the trajectories of the SAMS missiles fired into the storms are demonstrated. A case example is presented to illustrate the details of the computational procedures. The uncertainties of the liquid-water-content values determined from radar measurements are assessed, to a first approximation. Size distribution information is also presented for the different types of hydrometeors, based on theoretical distribution functions.

Application of Radar to Measurement of Surface Precipitation Pauline M. Austin,1968 A remote PPI with display of three intensity levels in shades of gray and compensation for range variations in scope illumination has been set up for the WR-66 radar. Camera attachments have been added to both radars. Design of the data processor has been completed. Printed circuits have been drawn and chassis have been built. A sensing unit for a continuously and automatically recording raindrop

spectrometer has been built. Data taken in a number of storms show clearly that the WR-66 radar does not suffer from the limitations of attenuation, and low sensitivity and resolution which have been observed in the AN/CPS-9 and SCR-615-B radars. Applications and Analysis: Analysis of the mesoscale precipitation patterns in various types of storms and their relation to macroscale parameters is continuing. Coastal cyclones, some overland cyclones from the southwest, cold fronts and air mass storms have been analyzed. Results of a numerical analysis of snowflake aggregation are summarized. (Author).

Summary of Radar-rainfall Research, 1952-1968 Glenn Emanuel Stout,1968

Weather Tracking with the AFCRL Experimental 3-D Radar W. G. Mavroides,Elefterios J. Georgian,1970 Experimental work using the AFCRL 3-D Radar, based on the Phase-in-Space principle, as a Weather Radar is presented. Snow and rain storms are tracked and documented by photographs taken from a conventional plan-position-indicator display scope (PPI) and compared with the presentations from the 3-D Radar range-height-indicator scope (RHI). In addition, the sensitivity and response of the phase-in-space principle is clearly depicted with the detection of cloud areas and separation of cloud layers of different densities. Also, evidence is presented showing the superiority of the RHI presentations in differentiating targets in the midst of storms over the conventional PPI display.

Satellite Precipitation Measurement Vincenzo Levizzani,Christopher Kidd,Dalia B. Kirschbaum,Christian D. Kummerow,Kenji Nakamura,F. Joseph Turk,2020-04-10 This book offers a complete overview of the measurement of precipitation from space, which has made considerable advancements during the last two decades. This is mainly due to the Tropical Rainfall Measuring Mission (TRMM), the Global Precipitation Measurement (GPM) mission, CloudSat and a carefully maintained constellation of satellites hosting passive microwave sensors. The book revisits a previous book, Measuring Precipitation from Space, edited by V. Levizzani, P. Bauer and F. J. Turk, published with Springer in 2007. The current content has been completely renewed to incorporate the advancements of science and technology in the field since then. This book provides unique contributions from field experts and from the International Precipitation Working Group (IPWG). The book will be of interest to meteorologists, hydrologists, climatologists, water management authorities, students at various levels and many other parties interested in making use of satellite precipitation data sets.
