*Information Security* Jianying Zhou, Robert H. Deng, Feng Bao, 2005-08-29 This volume contains the proceedings of the 8th International Information Security Conference (ISC 2005), which took place in Singapore, from 20th to 23rd September 2005. ISC 2005 brought together individuals from academia and industry involved in many research disciplines of information security to foster the exchange of ideas. During recent years this conference has tried to place special emphasis on the practical aspects of information security, and since it passed from being an international workshop to being an international conference in 2001, it has become one of the most relevant forums at which researchers meet and discuss emerging security challenges and solutions. Advised by the ISC Steering Committee, and in order to provide students with more opportunities for publication, ISC 2005 accepted extra student papers – besides the regular papers. The initiative was very well accepted by the young sector of the scientific community, and we hope that the success of this idea will remain for next ISC events. Another important factor for the success of ISC 2005 was that selected papers in the proceedings will be invited for submission to a special issue of the International Journal of Information Security. The result was an incredible response to the call for papers; we received 271 submissions, the highest since ISC events started. It goes without saying that the paper selection process was more competitive and difficult than ever before – only 33 regular papers were accepted, plus 5 student papers for a special student session.
