Jeremy G. Butler

Rasta, Babylon, Jamming Robert Fleming, 2017-07-16 This book, *Rasta, Babylon, Jamming: The Music and Culture of Roots Culture*, has been a long time in coming. In the late 1970s, mainstream publishers didn't want any part of a music that spoke against colonialism, capitalism or social injustice. Viewed as a transcendent resource book, capable of enlightening and informing and providing a point of entry into the musical legacy of Rastafarians. Its message is one of a vital Afrocentric themes and the Rasta doctrine of resistance, political self-determinism and black survival. This is reggae at its best with no gimmicks, pure and unadulterated. This is reggae that belongs to everybody.

Television Jeremy G. Butler, 2012-02-20 For nearly two decades, *Television: Critical Methods and Applications* has served as the foremost guide to television studies. Designed for the television studies course in communication and media studies curricula, *Television* explains in depth how television programs and commercials are made and how they function as producers of meaning. Author Jeremy G. Butler shows the ways in which camera style, lighting, set design, editing, and sound combine to produce meanings that viewers take away from their television experience. He supplies students with a whole toolbox of implements to disassemble television and read between the lines, teaching them to incorporate critical thinking into their own television viewing. The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television. Highlights of the fourth edition include: New chapter and part organization to reflect the current approach to teaching television—with greatly expanded methods and theories chapters. An entirely new chapter on modes of

production and their impact on what you see on the screen. Discussions integrated throughout on the latest developments in television's on-going convergence with other media, such as material on transmedia storytelling and YouTube's impact on video distribution. Over three hundred printed illustrations, including new and better quality frame grabs of recent television shows and commercials. A companion website featuring color frame grabs, a glossary, flash cards, and editing and sound exercises for students, as well as PowerPoint presentations, sample syllabi and other materials for instructors. Links to online videos that support examples in the text are also provided. With its distinctive approach to examining television, *Television* is appropriate for courses in television studies, media criticism, and general critical studies.

Television Style Jeremy G. Butler, 2013-05-13 Style matters.

Television relies on style—setting, lighting, videography, editing, and so on—to set moods, hail viewers, construct meanings, build narratives, sell products, and shape information. Yet, to date, style has been the most understudied aspect of the medium. In this book, Jeremy G. Butler examines the meanings behind television's stylistic conventions. *Television Style* dissects how style signifies and what significance it has had in specific television contexts. Using hundreds of frame captures from television programs, *Television Style* dares to look closely at television. *Miami Vice*, *ER*, soap operas, sitcoms, and commercials, among other prototypical television texts, are deconstructed in an attempt to understand how style functions in television. *Television Style* also assays the state of style during an era of media convergence and the ostensible demise of network television. This book is a much needed introduction to television style, and essential reading at a moment when the medium is undergoing

radical transformation, perhaps even a stylistic renaissance. Discover additional examples and resources on the companion website: www.tvstylebook.com.

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—“In the future, everyone will be world-famous for 15 minutes.” Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I’ve never met a person I couldn’t call a beauty.New things are always better than old things.I’m still a commercial artist. I was always a commercial artist.

How to Think about Weird Things Schick, Jr. (Theodore),Lewis Vaughn,2010-05 This brief, inexpensive text helps the reader to think critically, using examples from the weird claims and beliefs that abound in our culture to demonstrate the sound evaluation of any

claim. The authors focus on types of logical arguments and proofs, making *How to Think about Weird Things* a versatile supplement for logic, critical thinking, philosophy of science, or any other science appreciation courses.

Snake Pit Therapy Sonny Vincent, 2021-04-10 A rough and tumble collection of memories, poetry, and fiction from Sonny Vincent, the legendary underground rock 'n' roller. Slinging newspapers at Playland. Meditations on Formica. Loud nights at Max's and C.B.G.B.'s. Evil karma from Page 1. The Moon Ticket & Sterling from the Velvet Underground. Visible Fictions John Ellis, 2002-01-04 This revised edition of a standard textbook combines an examination of the cinema and

television industries with a detailed analysis of their aesthetic and semiotic characteristics. John Ellis draws on his experience as an independent television producer to provide a comprehensive and challenging overview of the place of film, television and video in our daily lives and their future prospects in a changing media landscape.

Electronic Media Criticism Peter B. Orlik, 2001 Given the prominence of the electronic media in the 21st century, it is crucial that both media professionals and consumers know how to decipher and evaluate media content, the assumptions on which that content is based, and the constraints to which it is subject. *Electronic Media Criticism* offers a variety of critical approaches to audio and video discourse. Rather than restricting itself to one perspective, the book applies key aesthetic, sociological, philosophical, psychological, structural, and economic principles to arrive at a comprehensive evaluation of both programming and advertising content. Maintaining the approach of the original volume, this second edition includes: * updated chapters to reflect the current media world, including sample reviews and illustrations, * material pertaining to new media--because the book is process-oriented rather than medium-oriented, Internet referents are interspersed in discussion of the various critical perspectives, * two additional scripts for critical analysis--an episode of *The Simpsons* and an installment of the dark Canadian comedy *The Newsroom*, and * new exercises for further practice in applying critical procedures. Orlik interweaves the insights of industry and academic authorities, recognizing that both orientations are essential in the development of a valid and viable critical outlook. Written for media students and practitioners, all readers of this volume will gain feasible and flexible tools for focused and rational analysis of electronic

media products, as well as improved understanding of the role and essential ingredients of criticism itself.

Brutified Robert Benefiel,2020-11-27 Brutified is a collection of poetry written by the author Robert Benefiel. The poems contained within it are from a larger cache of poems written in 2019. The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.

Critical Ideas in Television Studies John Corner,1999 Television has radically reshaped the contours of knowledge and of pleasure in modern society and become a regular subject of scrutiny and argument. This important book, fully accesible to students yet a

contribution to international debate, is the first to offer a systematic review of the ideas which have been most influential across a full range of television criticism and research from the first pioneering studies to the most recent theory and analysis. In the course of exploring key ideas, John Corner develops a clear and close engagement with television itself and the way it is changing. After an Introduction which provides a concise overview of how television has been studied and why, ten chapters take key features of the medium in order to raise questions and and assess arguments. With its focused summaries and its scope of reference, *Critical Ideas in Television Studies* will help the teaching and study of television to enter a new phase of improved clarity and self-awareness.
