Журнал «Игромания» No05/2016 Игромания,2018-03-30 В новом выпуске «Игромании» снова написано про боль и преодоление: вы только посмотрите на взгляд Дрейка – полон безысходности. Но наш шеф-редактор Захар одним из первых в мире сыграл в превью-версию и настроен более оптимистично, говорит: «Uncharted 4 будет либо хорошей игрой, либо великой». Больше JRPG! В номере масса подробностей о новой Final Fantasy – потому что на карту поставлено если не все, то слишком многое. С новой «Финалкой» выходят аниме, фильм и дополнительные игры-сателлиты – Square Enix делает все, чтобы заинтересовать разные аудитории. Больше рекламы! Выясняем, почему рекламные коллаборации – это здорово. Купи видеокарту, спаси тигра, посмотри на Лайтнинг – и бегом в бутик Louis Vuitton. Мы прекрасно понимаем, что целевой аудитории журнала Луи Вюиттон интересен в последнюю очередь, но вы только представьте – виртуальная женщина из японской Final Fantasy на улицах Москвы рекламирует одежду... Кажется, киберпанк уже наступил.

Advances on P2P, Parallel, Grid, Cloud and Internet Computing Fatos Xhafa, Fang-Yie Leu, Massimo Ficco, Chao-Tung Yang, 2018-10-16 This book presents the latest research findings, as well as innovative theoretical and practical research results, methods and development techniques related to P2P, grid, cloud and Internet computing. It also reveals the synergies among such large scale computing paradigms. P2P, Grid, Cloud and Internet computing technologies have rapidly become established as breakthrough paradigms for solving complex problems by enabling

aggregation and sharing of an increasing variety of distributed computational resources on a large scale. Grid computing originated as a paradigm for high-performance computing, offering an alternative to expensive supercomputers through different forms of large-scale distributed computing. P2P computing emerged as a new paradigm following on from client-server and web-based computing and has proved useful in the development of social networking, B2B (Business to Business), B2C (Business to Consumer), B2G (Business to Government), and B2E (Business to Employee). Cloud computing has been described as a “computing paradigm where the boundaries of computing are determined by economic rationale rather than technical limits”. Cloud computing has fast become the computing paradigm with applicability and adoption in all domains and providing utility computing at large scale. Lastly, Internet computing is the basis of any large-scale distributed computing paradigm; it has very quickly developed into a vast and flourishing field with enormous impact on today’s information societies and serving as a universal platform comprising a large variety of computing forms such as grid, P2P, cloud and mobile computing.
