A Dissertation on the Metre of Homer Thomas Shaw Brandreth,1844

**Starstruck** Nina Erryck,2014-06-05 Roland Degraft likes his life just the way it is. He's got money, good looks, and a thriving football career and has no interest in love, marriage, and white picket fences. Until two girls breeze into his life in the most unconventional ways—at least as far as Roland is concerned—and he is thrown into a triple dilemma that threatens to change his life forever. Dilemma 1 He must make a choice. Getting this attracted to one girl is very disturbing, let alone two. Now he must make a choice, but based on what? He's equally attracted to both of them. Dilemma 2 He must find the girl he chooses. One thing the girls have in common—they both don't want him to find them. One uses the Internet as a shield, and the other uses the whole city. How does he find two girls who don't want to be found? Dilemma 3 He must make her starstruck. One girl thinks she's not good enough for him; the other believes she's too good for him. Either way, he must find a way to convince his choice that starstruck is the best thing to be.

**The Declaration of Independents** Nick Gillespie, Matt Welch, 2012-06-26 Everywhere in America, the forces of digitization, innovation, and personalization are expanding our options and bettering the way we live. Everywhere, that is, except in our politics. There we are held hostage to an eighteenth century system, dominated by two political parties whose ever-more-polarized rhetorical positions mask a mutual interest in maintaining a stranglehold on power. The Declaration of Independents is a compelling and extremely entertaining manifesto on behalf of a system better suited to the future--one structured by the essential libertarian principles of free minds and free markets. Gillespie and Welch profile libertarian innovators, identify the villains propping up the ancien regime, and take aim at do-something government policies that hurt most of those they claim to protect. Their vision will resonate with a wide swath of frustrated citizens and young voters, born after the Cold War's end, to whom old tribal allegiances, prejudices, and hang-ups about everything from hearing a foreign language on the street to gay marriage to drug use simply do not make sense.

**The Psychological Well-being of East Asian Youth** Chin-Chun Yi, 2012-10-12 The rapid social change in the East Asia has brought great research attention on the family, education and political impacts. The growth trajectory of the next generation is exposed to an entirely different context owing to the dual effects of traditional and modern values as well as practices. This book provides an overall picture of the developmental trajectory of Taiwanese youth as a typical example in the region. The time frame is set from early adolescence (13 years old) to young adulthood (22 years old). Individual psychological well-being in its broad definition will be used as the outcome indicator to reflect significant developmental processes during this important transitional life course. Benefitted from the rare panel datasets conducted from 2000-2009, this book has two major focuses: one is to explore the interplay among family, school and community with regard to their influence on the individual growth patterns; the other is to highlight the potential constraint and/or strength of the prevailing social norms and values shared among East Asian societies. To be specific, different chapters will describe and analyze the life chances and growth patterns among youth with different social capitals (including family SES, educational achievement, rural-urban residence, etc.). Their short-term versus long-term outcome, as indicated by various psychological well-being variables (e.g., depressive symptoms, deviant or problem behaviors, happiness, educational performance), will allow us to delineate the particular structural context that individual East Asian youth encounters and to offer constructive suggestions on family interaction, educational strategy as well as health related policies based on the scientific evidence. This book incorporates comparative reports from other East Asian societies, and from youth panel studies of Australia and the U.S.. The experience of their counter-part

in the advanced societies will contribute to readers' understanding of the particular social situation that East Asian youth is embedded in the growth process. In addition, comparative perspective will enable the reader to contemplate on the potential future development of the affluent generation in the region. Since changing social structure occurred in the last few decades in the East Asia has suffered inadequate investigation in the realm of family, education and community, this book provides timely information to fill up the gap. Analyses of the valuable dataset from early adolescents to young adults will attract those who are interested in family researches, in youth studies, in panel data analyses, as well as in the social development in Taiwan and in East Asia.
