<u>Reckless</u> Thomas Clavin, Tom Clavin, 2014 Describes the story of a Korean race horse who was sold to an American Marine and trained to carry heavy loads of artillery up steep hills while under fire and whose perseverance and spirit inspired the entire corps during the Korean War.

Sgt. Reckless Robin Hutton, 2014-07-28 New York Times Bestseller! She wasn't a horse—she was a Marine. She might not have been much to look at—a small Mongolian mare, they called her—but she came from racing stock, and had the blood of a champion. Much more than that, Reckless became a war hero—in fact, she became a combat Marine, earning staff sergeant's stripes before her retirement to Camp Pendleton. This once famous horse, recognized as late as 1997 by Life Magazine as one of America's greatest heroes—the greatest war horse in American history, in fact—has unfortunately now been largely forgotten. But author Robin Hutton is set to change all that. Not only has she been the force behind recognizing Reckless with a monument at the National Museum of the Marine Corps and at Camp Pendleton, but she has now recorded the full story of this four-legged war hero who hauled ammunition to embattled Marines and inspired them with her relentless, and reckless, courage.

Neuropsychiatry and Behavioral Neuroscience Jeffrey L. Cummings, Michael S. Mega, 2003-01-23 This is the long-awaited successor to Jeffrey Cummings' classic work, Clinical Neuropsychiatry, published in 1985. That book represented an integration of behavioral neurology and biological psychiatry into a single volume devoted to explicating brain-behavior relationships. It was clinically oriented and intended for practitioners caring for patients with neuropsychiatric disorders. The new title reflects the authors' effort to link the recent explosion of new information from neurochemistry, neuroanatomy, genetics, neuropharmacology, neuropathology, and neuroimaging to the clinical descriptions. Yet the clinical emphasis of its predecessor has been maintained. Each chapter has a consistent approach and the book as whole provides a practical, easy-to-use synthesis of clinical advice and basic science. The volume is enhanced by 4-color images throughout. It is intended for students, residents, fellows, and practitioners of neurology, psychiatry, neuropsychology, and cognitive neuroscience. It will also be of interest to individuals in neuroimaging.

Men to Boys Gary Cross,2008-09-23 Adam Sandler movies, HBO's Entourage, and such magazines as Maxim and FHM all trade in and appeal to one character the modern boy-man. Addicted to video games, comic books, extreme sports, and dressing down, the boy-man would rather devote an afternoon to Grand Theft Auto than plan his next career move. He would rather prolong the hedonistic pleasures of youth than embrace the self-sacrificing demands of adulthood. When did maturity become the ultimate taboo? Men have gone from idolizing Cary Grant to aping Hugh Grant, shunning marriage and responsibility well into their twenties and thirties. Gary Cross, renowned cultural historian, identifies the boy-man and his habits, examining the attitudes and practices of three generations to make sense of this gradual but profound shift in American masculinity. Cross matches the rise of the American boy-man to trends in twentieth-century advertising, popular culture, and consumerism, and he locates the roots of our present crisis in the vague call for a new model of leadership that, ultimately, failed to offer a better concept of maturity. Cross does not blame the young or glorify the past. He finds that men of the Greatest Generation might have embraced their role as providers but were confused by the contradictions and expectations of modern fatherhood. Their uncertainty gave birth to the Beats and men who indulged in childhood hobbies and boyish sports. Rather than fashion a new manhood, baby-boomers held onto their youth and, when that was gone, embraced Viagra. Without mature role models to emulate or rebel against, Generation X turned to cynicism and sensual intensity, and the media fed on this longing, transforming a life stage into a highly desirable lifestyle. Arguing that contemporary American culture undermines both conservative ideals of male maturity and the liberal values of community and responsibility, Cross concludes with a proposal for a modern marriage of personal desire and ethical adulthood.

The Longest Line on the Map Eric Rutkow,2019-01-08 From the award-winning author of American Canopy, a dazzling account of the world's longest road, the Pan-American Highway, and the epic quest to link North and South America, a dramatic story of commerce, technology, politics, and the divergent fates of the Americas in the nineteenth and twentieth centuries. The Pan-American Highway, monument to a century's worth of diplomacy and investment, education and engineering, scandal and sweat, is the longest road in the world, passable everywhere save the mythic Darien Gap that straddles Panama and Colombia. The highway's history, however, has long remained a mystery, a story scattered among government archives, private papers, and fading memories. In contrast to the Panama Canal and its vast literature, the Pan-American Highway—the United States' other great twentieth-century hemispheric infrastructure project—has become an orphan of the past, effectively erased from the story of the "American Century." The Longest Line on the Map uncovers this incredible tale for the first time and weaves it into a tapestry that fascinates, informs, and delights. Rutkow's narrative forces the reader to take seriously the question: Why couldn't the Americas have become a single region that "is" and not two near irreconcilable halves that "are"? Whether you're fascinated by the history of the Americas, or you've dreamed of driving around the globe, or you simply love world records and the stories behind them, The Longest Line on the Map is a riveting narrative, a lost epic of hemispheric scale.

The Race Tim Zimmermann,2004-01-01 A contributing editor for Outside magazine provides a behind-the-scenes look at the fast-paced, around-the-world sailing race. An invigorating behind-the-scenes look at the world of extreme sailing, The Race is also a taut, engrossing account of the first running of the competition called "The Race," which began on December 31, 2000, in Barcelona and ended sixty-two days later in Marseilles. The most intense event of its

kind—a nonstop circumnavigation of the globe in the fastest boats ever built—The Race attracts some of the world's best sailors and arguably its most eccentric personalities. Tim Zimmermann, an experienced blue-water sailor, relates in knuckle-whitening detail how and why sailors risk millions of dollars and their lives to dash around the world in record time. He garnishes this story with a chronicle of the tumultuous history of extreme sailing from the nineteenth century to today. Zimmermann "puts the reader right on board with the tough, colorful crews as they take a crash course (sometimes literally) in how to handle these astonishing machines" (Derek Lundy, author of Godforsaken Sea). Praise for The Race "Zimmerman turns a daring race of unthinkably fast, high-tech sailing machines into a page-turner." —Bruce Knecht, author of The Proving Ground "This is probably the finest account of the history of the circumnavigator's quest yet written, refreshingly free of hyperbole and false expectation. Zimmerman's pace matches that of The Race itself, though he never puts his bow under." —Lincoln P. Paine, author of Ships of the World "Zimmerman's behind-the-scenes look at the characters, boats, and technology in The Race—as well as the rich sailing history that preceded it—captures the nuances of adventure only a masochist could love. The Race was a wild ride, and The Race is a fine read." —Herb McCormick, sailing correspondent of the New York Times, editor of Cruising World

Another Life Andrew R B Simpson,2011-08-31 T.E. Lawrence found global recognition for his leadership of the Arab Revolt during World War I, preparing the ground for the final Allied offensive in 1918. He was hailed as a hero, but little is known about this mysterious and charismatic man after those events. Here is Lawrence's life after Arabia, his service in the RAF and the Tank Corps as a mere ranker, and how he became an expert in the technology of the new RAF. The book examines the work he did for the 1929 Schneider Trophy Race, the development of the new RAF 200 seaplane tender, and the development of its armour plated offspring, the Armoured Target Boat. It also investigates his literary endeavours and his tragically early death, a sad end to a Renaissance man of all talents, an academic, a talented engineer and a soldier sans pareil. T.E. was offered exalted diplomatic positions by Churchill, implored by Nancy Astor to re-enter the fray as the Nazi threat grew, socialised with the Cliveden set, argued with the Archbishop of Canterbury. He made lasting friendships with humble squaddies. His self-loathing was expressed physically. Consulting primary sources and also having interviewed some of those who knew Lawrence after Arabia the author portrays the last years of one of the most astonishing figures of the 20th century.
