Kingdom of Nokia Carl-Gustav Lindén,2021-04-29 Kingdom of Nokia tells a fascinating story of corporatism in Finland. How did the mobile phone giant Nokia make the Finnish elite willing to serve the interests of the company? Nokia became a global player in mobile communications in the 1990s, and helped establish Anglo-Saxon capitalism in Finland. Through its success and strong lobbying, the company managed to capture the attention of Finnish politicians, civil servants, and journalists nationwide. With concrete detailed examples, Kingdom of Nokia illustrates how Nokia organised lavishing trips to journalists and paid direct campaign funding to politicians to establish its role at the core of Finnish decision-making. As a result, the company influenced important political decisions such as joining the European Union and adopting the euro, and further, Nokia even drafted its own law to serve its special interests. All this in a country considered one of the least corrupt in the world.

Research in Attacks, Intrusions, and Defenses Fabian Monrose,Marc Dacier,Gregory Blanc,Joaquin Garcia-Alfaro,2016-09-06 This book constitutes the refereed proceedings of the 19th International Symposium on Research in Attacks, Intrusions, and Defenses, RAID 2016, held in Evry, France, in September 2016. The 21 full papers presented were carefully reviewed and selected from 85 submissions. They are organized around the following topics: systems security; low-level attacks and defenses;

measurement studies; malware analysis; network security; systematization of knowledge and experience reports; Web and mobile security.

Advances in Data and Information Sciences Mohan L. Kolhe, Munesh C. Trivedi, Shailesh Tiwari, Vikash Kumar Singh, 2018-04-09 The book gathers a collection of high-quality peer-reviewed research papers presented at the International Conference on Data and Information Systems (ICDIS 2017), held at Indira Gandhi National Tribal University, India from November 3 to 4, 2017. The book covers all aspects of computational sciences and information security. In chapters written by leading researchers, developers and practitioner from academia and industry, it highlights the latest developments and technical solutions, helping readers from the computer industry capitalize on key advances in next-generation computer and communication technology.

Mobile Lightweight Wireless Systems Periklis Chatzimisios, Christos Verikoukis, Ignacio Santamaria, Massimiliano Laddomada, Oliver Hoffmann, 2010-10-21 Following the success of the First MOBILIGHT 2009 in Athens, Greece, the Second International Conference on Mobile Lightweight Systems (MOBILIGHT) was held in Barcelona, Spain on May 10-12, 2010. It was not an easy decision to carry on organizing a scientific event on wireless communications, where competition is really enormous. This decision was motivated by discussion with many colleagues about the current unprecedented demand for light-weight, wireless communication devices with high usability and performance able to support added-value services in a highly mobile environment. Such devices follow the users everywhere they go (at work, at home, while travelling, in a classroom, etc.) and result in exciting research, development and

business opportunities. Such scenarios clearly demand significant upgrades to the existing communication paradigm in terms of infrastructure, devices and services to support the “anytime, anywhere, any device” philosophy, providing novel and fast-evolving requirements and expectations on - search and development in the field of information and communication technologies. The core issue is to support wireless users' desire for 24/7 network availability and transparent access to their own services. In this context, we continue to envision an international forum where practitioners and researchers coming from the many areas involved in lightweight wireless systems' design and deployment would be able to interact and exchange experiences.

Communities Dominate Brands Tomi T. Ahonen, Alan Moore, 2005 Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding)

perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, *Communities Dominate Brands* arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. *Communities Dominate Brands* covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what

businesses need to do to make money in the new digitally converging environment. Communities Dominate Brands analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, Communities Dominate Brands is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Cultural Hijack Ben Parry, Sally Medlyn, Myriam Tahir, 2011-01-01 Working in cities from Liverpool and Glasgow to Paris and New York, the interventionist artist transforms ordinary urban spaces, disrupting everyday life in ways that reinvent the way we encounter and experience art and compelling people to act and think differently about the world around them. Providing incisive new insights into the work and life of the artist, Cultural Hijack examines how these artists use the city as a playground, a stage, or an instrument for unsanctioned artworks, informal creative practices, activist interventions, and political actions. Drawing on a series of essays, personal testimonies, and original interviews from artists such as Tatsuro Bashi, BGL, Gelitin, Michael Rakowitz, and Krzysztof Wodiczko, this illuminating work enlarges our understanding of the creative process and how artists are developing new weapons in the arsenal of

critical resistance, both emancipating and expanding the spaces of artistic and cultural production.

Fundamentals of Telemedicine and Telehealth Shashi Gogia, 2019-10-27 Fundamentals of Telemedicine and Telehealth provides an overview on the use of information and communication technologies (ICTs) to solve health problems, especially for people living in remote and underserved areas. With the advent of new technologies and improvement of internet connectivity, telehealth has become a new subject requiring a new understanding of IT devices and how to utilize them to fulfill health needs. The book discusses topics such as digitizing patient information, technology requirements, existing resources, planning for telehealth projects, and primary care and specialized applications. Additionally, it discusses the use of telemedicine for patient empowerment and telecare in remote locations. Authored by IMIA Telehealth working group, this book is a valuable source for graduate students, healthcare workers, researchers and clinicians interested in using telehealth as part of their practice or research. Presents components of healthcare that can be benefitted from remote access and when to rely on them Explains the current technologies and tools and how to put them to effective use in daily healthcare Provides legal provisions for telehealth implementation, discussing the risks of remote healthcare provision and cross border care

Your College Experience Gardner, A. Jerome Jewler, Betsy O. Barefoot, 2006 The most thoroughly revised edition yet! Featuring extensive revisions to the Learning chapters and a new chapter on memory, YOUR COLLEGE EXPERIENCE, 7e continues its 20-year tradition of providing straightforward,

intelligent coverage of the skills students need to succeed in college today. New co-author Betsy Barefoot has updated and added new research materials throughout, and worked to streamline the text. Now only 16 chapters, the book presents more current information in fewer chapters than ever before. Also new to this edition: iLrn College Success! Available with new copies of the book, this innovative teaching tool lets instructors create assignments that students can use to assess their mastery of topics covered in the book. Assignments are automatically graded, providing instructors and students with immediate feedback on student performance. iLrn gives students the power to prioritize and strategically use their study time, while it gives instructors the power to tailor their in-class time to meet their students' most pressing needs. Author John Gardner is a well-known proponent of the first-year seminar and was instrumental in creating the National Resource Center for the First-Year Experience and Students in Transition at the University of South Carolina. He and co-authors Jewler and Barefoot continue to write, research, and travel to support the First-Year Experience.

Cellular Internet of Things Olof Liberg, Marten Sundberg, Eric Wang, Johan Bergman, Joachim Sachs, Gustav Wikström, 2019-11-28 Cellular Internet of Things: From Massive Deployments to Critical 5G Applications, Second Edition, gives insights into the recent and rapid work performed by the 3rd Generation Partnership Project (3GPP) and the Multefire Alliance (MFA) to develop systems for the Cellular IoT. Beyond the technologies, readers will learn what the mMTC and cMTC market segments look like, deployment options and expected performance in terms of system capacity, expected battery lifetime, data throughput, access delay time and device cost, regulations for operation in unlicensed

frequency bands, and how they impact system design and performance. This new edition contains updated content on the latest EC-GSM IoT, LTE-M and NB-IoT features in 3GPP Release 15, critical communication, i.e. URLLC, specified in 3GPP Release 15 for both LTE and NR, LTE-M and NB-IoT for unlicensed frequency bands specified in the Multefire Alliance (MFA), and an updated outlook of what the future holds in Industrial IoT and drone communications, amongst other topics. Provides ubiquitous wireless connectivity for a diverse range of services and applications, describing their performance and how their specifications were developed to meet the most demanding requirements Describes licensed and unlicensed technologies based on 2G, 4G and 5G technologies and how they have evolved towards the Cellular IoT Presents the Narrowband Internet of Things technology and how GSM, LTE and NR have been designed to provide Cellular Internet of Things services Provides use cases that cover ultra-low complex systems connecting billions of devices (massive MTC, mMTC), critical MTC and cMTC based on Ultra-Reliable and Low Latency Communications (URLLC) to meet strict latency and reliability requirements

The Development of Africa Olayinka Akanle, Jimí Olálékan Adésinà, 2017-10-25 This volume analyses many of the real development challenges confronting the African continent, presenting fresh and current objective examinations, narratives, interpretations and pathways to the continent's development. It interrogates and answers established, critical, current and pragmatic problems confronting Africa today, and provides workable pathways out of the development problems, so that scholarship, policy and practice will be positively impacted. This volume adds great depth and extended breadth to the knowledge base on

development of Africa. It provides excellent resources for academics, scholars, student, policy makers and all those interested in issues affecting Africa's development.

Mobile Telecommunications Standards Rudi Bekkers, 2001 Gain a thorough understanding of the dynamics of today's mobile telecommunications standards with this unique new resource. The book examines the development and adoption trajectories of major European standards, such as UMTS, GSM, ERMES, and TETRA. It presents a framework that analyzes the factors that influenced each standard's level of success, and includes the most-comprehensive case studies on these standards.

Friction Is Fiction: the Future of Content, Media and Business (Black and White Edition) Gerd Leonhard, 2010-05-06 Futurist and Thought-Leader Gerd Leonhard (www.mediafuturist.com) shares his thoughts on the Future of Content, Media and Business. 'Friction is Fiction' presents a constantly updated compilation of Gerd's best essays, writings and most popular blog posts. The central meme is that the Internet has completely disrupted the traditional notion of generating higher income by simply taking advantage of possible friction points and hurdles within transactions or business processes, i.e. by controlling the 'people formerly known as consumers'. The Future is all about winning the trust, and turning attention into revenues.
