Kingdom of Nokia Carl-Gustav Lindén,2021-04-29 Kingdom of Nokia tells a fascinating story of corporatism in Finland. How did the mobile phone giant Nokia make the Finnish elite willing to serve the interests of the company? Nokia became a global player in mobile communications in the 1990s, and helped establish Anglo-Saxon capitalism in Finland. Through its success and strong lobbying, the company managed to capture the attention of Finnish politicians, civil servants, and journalists nationwide. With concrete detailed examples, Kingdom of Nokia illustrates how Nokia organised lavishing trips to journalists and paid direct campaign funding to politicians to establish its role at the core of Finnish decision-making. As a result, the company influenced important political decisions such as joining the European Union and adopting the euro, and further, Nokia even drafted its own law to serve its special interests. All this in a country considered one of the least corrupt in the world.

Communities Dominate Brands Tomi T. Ahonen,Alan Moore,2005 Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved.The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands.The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. Communities Dominate Brands covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK

and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. Communities Dominate Brands analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc.The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, Communities Dominate Brands is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Cultural Hijack Ben Parry,Sally Medlyn,Myriam Tahir,2011-01-01 Working in cities from Liverpool and Glasgow to Paris and New York, the interventionist artist transforms ordinary urban spaces, disrupting everyday life in ways that reinvent the way we encounter and experience art and compelling people to act and think differently about the world around them. Providing incisive new insights into the work and life of the artist,Cultural Hijack examines how these artists use the city as a playground, a stage, or an instrument for unsanctioned artworks, informal creative practices, activist interventions, and political actions. Drawing on a series of essays, personal testimonies, and original interviews from artists such as Tatsuro Bashi, BGL, Gelitin, Michael Rakowitz, and Krzysztof Wodiczko, this illuminating work enlarges our understanding of the creative process and how artists are developing new weapons in the arsenal of critical resistance, both emancipating and expanding the spaces of artistic and cultural production.
