## **The Visual Effects Producer Charles Finance, Susan**

Zwerman, 2015-02-11 First published in 2010. Go behind the scene of the behind the scenes to learn how the business of producing the dazzling visual effects we see in movies and on TV works. With decades of combined VFX production and supervisory experience in Hollywood, the authors share their experience with you, illuminating standard industry practices and tips on: \* preproduction planning \* scheduling \* budgeting \* evaluating vendors and the bidding process \* effective data management \* working on-set, off-set, or overseas \* dealing with changes in post-production \* legal issues (contracts, insurance, business ethics), and more. Also included are interviews with established, successful Hollywood VFX Producers about their career paths and how they got to where they are now. From pre-production to final delivery, this is your complete guide to visual effects production, providing insight on VFX budgeting and scheduling (with actual forms for your own use) and common production techniques such as motion control, miniatures, and pre-visualization.

## **Gardner's Guide to Writing and Producing Animation Shannon**

Muir, 2007 From the initial selection of an animation project to its

final marketing materials, the art and business of animation production are illuminated in this step-by-step guide, which includes interviews with industry professionals about the place of their work within the general production pipeline and profiles of commercial animation studios. Television specials, pilots, shorts, and independent features are among the projects covered, in addition to a discussion of career opportunities in the field and the creative partnership of artists and engineers.

Safer Systems Felix Redmill,Tom Anderson,2012-12-06 The

contributions to this book are the invited papers presented at the fifth annual Safety-critical Systems Symposium. They cover a broad spectrum of issues affecting safety, from a philosophical appraisal to technology transfer, from requirements analysis to assessment, from formal methods to artificial intelligence and psychological aspects. They touch on a number of industry sectors, but are restricted to none, for the essence of the event is the transfer of lessons and technologies between sectors. All address practical issues and offer useful information and advice.

Contributions from industrial authors provide evidence of both safety consciousness and safety professionalism in industry. Smith's on safety analysis in air traffic control and Rivett's on assessment in the automotive industry are informative on current practice; Frith's thoughtful paper on artificial intelligence in safety-critical systems reflects an understanding of questions which need to be resolved; Tomlinson's, Alvery's and Canning's papers report on collaborative projects, the first on results which emphasise the importance of human factors in system development, the second on the development and trial of a comprehensive tool set, and the third on experience in achieving technology transfer - something which is crucial to increasing safety.

Lifespan David A. Sinclair,Matthew D. LaPlante,2019-09-10 A

NEW YORK TIMES BESTSELLER “Brilliant and enthralling.” –The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time’s most influential people. It’s a seemingly undeniable truth that aging is inevitable. But what if everything we’ve been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: “Aging is a disease, and that disease is treatable.” This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair’s own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr.

Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, Lifespan will forever change the way we think about why we age and what we can do about it.
