James Moody, Paul Dexter

Concert Lighting James Moody, Paul Dexter, 2016-10-04 Concert Lighting: Tools, Techniques, Art, and Business Fourth Edition provides readers with an updated look at how to succeed in the complex world of concert lighting design and technology. The authors have reorganized the book into three comprehensive and thoroughly revised sections, covering history, equipment and technology, and design, and containing new information on LED technology, pixel mapping, projection options, media servers, automated lighting, solutions for moving lights, DMX, and Ethernet problems, and designer communication and collaboration. This book also explores the cross-media use of concert lighting techniques in film, video, theatre, and the corporate world, highlighted with advice from master designers such as Bruce Rodgers, Cosmo Wilson, and Sarah Landau. From securing precious contracts to knowing the best equipment to use to design a show, Concert Lighting covers everything a designer needs to know about working in the touring industry.

Media Servers for Lighting Programmers Vickie Claiborne, 2021-04-28 Media Servers for Lighting Programmers, Second Edition, is the reference guide for lighting programmers working with media servers – the digital media devices used to control and manipulate video, audio, lighting, and projection content that have become the industry standard for live events, broadcast, and theatre performances. This book contains all the information you need to begin working with these devices, with topics ranging from common video terminology and equipment to the workflows for setup, patching, programming, and operating a media server from a lighting console via DMX. It also features a brief history of where this unique market originated from and offers a look at the current trends in media server technology and the growing digital media industry. This second edition also includes more information on alternative methods of programming and operating a server beyond using DMX, along with new information on projection mapping workflows, content creation software, and media management techniques. Media Servers for Lighting Programmers, Second Edition, is a valuable resource for the lighting programmer working in live entertainment venues. The book includes access to additional online support material and links to industry sites and articles.

The Automated Lighting Programmer's Handbook Brad Schiller, 2021-11-29 The Automated Lighting Programmer's Handbook, fourth edition, provides respected and clear coverage of the process of programming automated lighting fixtures from basic principles to advanced production preparations. This guide helps lighting programmers and designers with the creative and operational challenges they face in their rapidly evolving industry. Concepts, procedures, and guidelines to ensure a successful production are covered as well as troubleshooting, much needed information on workflows, technology, work relationships, console networking, digital lighting, and more. Chapters are peppered with advice and war stories from some of the most prominent lighting designers and programmers of today. The fourth edition is the most comprehensive yet: added topics include programming structure, advanced recording/editing, cloning, multi-cell fixtures, safety routines, GDTF, and pre-visualization. Deep explorations into the work of programmers from Earlybird and Broadway provide readers with timely real-world scenarios and advice. The information in this book is perfect for anyone interested in the programming of automated lighting in any market. From the beginner to the expert, the methodologies within provide simple, yet powerful tools to assist with any production. Lighting designers also will gain important knowledge about the procedures and concepts utilized by lighting programmers.

Control Systems for Live Entertainment John Huntington, 2007 If you are interested in how control systems and computer networks are used in all areas of live entertainment, Control Systems for Live Entertainment is the industry standard reference. With a unique combined focus on computers, networking, art, and practice, this book offers an in-depth examination of control for lighting, lasers, sound, , stage machinery, animatronics, special effects, and pyrotechnics for concerts, theme parks, theatre, themed-retail, cruise ships, museums, special and other events. This new edition also includes: • expanded emphasis on networking technology and practice • complete coverage of important new protocols such as ACN and RDM • completely revised and updated case studies • a completely reorganized and revised structure Drawing on his extensive experience in the field and classroom, author John Huntington clearly explains everything that goes on behind the scenes and inside the machines to bring bold visions to life in real-world settings. * Author's website is a live, updated resource for this audience - visited from control systems technicians in countries around the globe! * Systems formerly solo are now being networked together and audio and lighting techs need this knowledge * Loaded with realistic examples that readers love

Introduction to Show Networking John Huntington, 2020-10-13 Introduction to Show Networking covers the basics of how Ethernet networks provide a platform for entertainment control and audio/video media distribution for concerts, theatre productions, corporate and special events, cruise ship revues, wrestling shows, houses of worship, museum presentations, fountain spectacles—any kind of show presented live for an audience. The book's bottom-up approach was designed with show technicians in mind, starting with the basics and then moving up through cables, network switches, and layering, and on through Ethernet, and network components like TCP, UDP, IP and subnet masks, all with a practical focus. More advanced concepts are introduced, including broadcast storms and VLANs, along with show networking best practices. Closing out the book is a network design process demonstrated through practical, real-world examples for lighting, sound, video, scenic automation, and show control networks. An appendix covering binary and hexadecimal numbers is also included. This easy-reading book draws from Huntington's Show Networks and Control Systems, the industry standard since 1994, but is completely re-focused, reorganized, and updated.

How I Taught My Grandmother to Read and other Stories Sudha Murty, 2015-02-06 These are just some of the questions you will find answered in this delightful collection of stories recounting real-life incidents from the life of Sudha Murty—teacher, social worker and bestselling writer. There is the engaging story about one of her students who frequently played truant from school. The account of how her mother's advice to save money came in handy when she wanted to help her husband start a software company, and the heart-warming tale of the promise she made—and fulfilled—to her grandfather, to ensure that her little village library would always be well supplied with books. Funny, spirited and inspiring, each of these stories teaches a valuable lesson about the importance of doing what you believe is right and having the courage to realize your dreams.

The Man Who Tasted Shapes, revised edition Richard E. Cytowic, 2008-07-01 In this medical detective adventure, Cytowic shows how synesthesia, or joined sensation, illuminates a wide swath of mental life and leads to a new view of what it means to be human. Richard Cytowic's dinner host apologized, "There aren't enough points on the chicken!" He felt flavor also as a physical shape in his hands, and the chicken had come out too round. This offbeat comment in 1980 launched Cytowic's exploration into the oddity called synesthesia. He is one of the few world authorities on the subject. Sharing a root with anesthesia (no sensation), synesthesia means joined sensation, whereby a voice, for example, is not only heard but also seen, felt, or tasted. The trait is involuntary, hereditary, and fairly common. It stayed a scientific mystery for two centuries until Cytowic's original experiments led to a neurological explanation—and to a new concept of brain organization that accentuates emotion over reason. That chicken dinner two decades ago led Cytowic to explore a deeper reality that, he argues, exists in everyone but is often just below the surface of awareness (which is why finding meaning in our lives can be elusive). In this medical detective adventure, Cytowic shows how synesthesia, far from being a mere curiosity, illuminates a wide swath of mental life and leads to a new view of what it means to be human—a view that turns upside down conventional ideas about reason, emotional knowledge, and self-understanding. This 2003 edition features a new afterword.

Jump Up and Kiss Me Jennifer Trainer Thompson, 1996 In *JUMP UP AND KISS ME*, Jennifer Trainer Thompson puts spice into vegetarian cuisine with nearly 200 full-flavored recipes for everything from vinegars (like Rosemary-Serrano Red Wine Vinegar) and condiments (like Curried Butter) to drinks (like the Ginger Cooler) and entrées (Poblano and Spinach Crepes). Recipes reflect a range of ethnic cuisines and are designed for vegetarians as well as the increasing number of people who just want to eat less meat. The author's line of foodstuffs (including a hot sauce) with the same name as the cookbook was introduced into gourmet markets last fall.

Current Issues in Computational Linguistics: In Honour of Don Walker Antonio Zampolli, Nicoletta Calzolari, Martha Palmer, 1994-06-30 With this volume in honour of Don Walker, *Linguistica Computazionale* continues the series of special issues dedicated to outstanding personalities who have made a significant contribution to the progress of our discipline and maintained a special collaborative relationship with our Institute in Pisa. I take

the liberty of quoting in this preface some of the initiatives Pisa and Don Walker have jointly promoted and developed during our collaboration, because I think that they might serve to illustrate some outstanding features of Don's personality, in particular his capacity for identifying areas of potential convergence among the different scientific communities within our field and establishing concrete forms of cooperation. These initiatives also testify to his continuous and untiring work, dedicated to putting people into contact and opening up communication between them, collecting and disseminating information, knowledge and resources, and creating shareable basic infrastructures needed for progress in our field. Our collaboration began within the Linguistics in Documentation group of the FID and continued in the framework of the ICCL (International Committee for Computational Linguistics). In 1982 this collaboration was strengthened when, at COLING in Prague, I was invited by Don to join him in the organization of a series of workshops with participants of the various communities interested in the study, development, and use of computational lexica.

Broadcast News Writing, Reporting, and Producing Frank Barnas, 2017-07-06 Broadcast News Writing, Reporting, and Producing, 7th Edition is the leading book covering all aspects of writing and reporting the news. It identifies the key concepts and terms readers need to know in the news gathering and dissemination process, and provides practical, real-world advice for operating in the modern day newsroom. New to the seventh Edition are profiles of working journalists who give readers a glimpse into the working life of modern reporters, producers, and directors. This new edition also covers important aspects of the use of social media, drone journalism, and digital technology. A new chapter on portfolio development will assist readers in developing the skills to advance in their careers. The text has also been updated to reflect new industry standards in modes of information gathering and delivery, writing style, and technology. Additional features include: Key words at the start of every chapter, identifying important terms and definitions; End of chapter summaries, which allows readers to review the chapter's main points; Text Your Knowledge, which helps readers quiz themselves on important concepts; Chapter-by-chapter exercises, which readers can apply to a chapter's themes; A companion website featuring video tutorials of necessary skills for journalists, including how to arrange lighting structures, how to hold a microphone, and how to properly conduct an interview.

Woman in Shadow Carrie Stuart Parks, 2021-07-13 Award-winning author Carrie Stuart Parks combines her expertise as a forensic artist with her talent for crafting a gripping story in this page-turning web of light and shadow. A woman off the grid. Darby Graham thinks she's on a much-needed vacation in remote Idaho to relax. But before she even arrives at the ranch, an earthquake strikes. Then a barn on the edge of town is engulfed in flames and strange problems at the ranch begin to escalate, and Darby finds herself immersed in a chilling mystery. A town on fire. More fires erupt around town, and a serial arsonist sends taunting letters to the press after each. As a forensic linguist, this is Darby's area of expertise . . . but the scars her work has caused her are also the reason she's trying to escape her life. A growing darkness. As the shadows continue moving in, pieces of the town around her come into sharper focus. To make it out alive, Darby must decide if she can trust the one man who sees her clearly. Praise for *Woman in Shadow*: "Unique, witty, and hilarious, Carrie's voice shines throughout *Woman in Shadow*. The perfect mix of intrigue, mystery and danger, this is most definitely a book for my keeper shelf." —Dani Pettrey, bestselling author of the Coastal Guardians series Full-length, stand-alone suspense novel Award-winning, bestselling author Also by Carrie Stuart Parks: *Relative Silence*, *Fragments of Fear*, *Formula of Deception*, and *A Cry from the Dust* Includes discussion questions for book clubs

Tasting the Universe Maureen Seaberg, 2011-03-15 "Explores a dimension of synesthesia long encountered in reports of synesthetes: its relation to mystical and artistic vision . . . fascinating accounts."—Patricia Lynne Duffy, author of *Blue Cats* and *Chartreuse Kittens* What happens when a journalist turns her lens on a mystery happening in her own life? Maureen Seaberg did just that and lived for a year exploring her synesthesia. The wondrous brain trait is often described as blended senses, but for Maureen, synesthesia is not an idle "brain tick" that can be explained away by

science (although it does offer some important clues). It is a unique ability to tap into and reveal a greater creative universe and even the divine. Join her as she visits top neuroscientists, rock stars, violinists, other synesthetes, philosophers, savants, quantum physicists and even Tibetan lamas in her journey toward the truth. Step into Maureen's shimmering alternate universe as she explores this fascinating subject, combining clear explanations of groundbreaking scientific research with an exploration of deeper spiritual truths. "Tasting the Universe is not only the brilliant writing of a top, professional journalist looking in on a strange but romantic phenomena, but it is the writing of a person who could embrace the feelings of those she interviews, because author Seaberg herself possesses this remarkable gift of synesthesia. I predict when you pick up this book, you will be unable to put it down, as it will open up for you a whole new world in our universe."—The Amazing Kreskin
