**Remotely Rich** Matt Vogel,2016-06-28 Web developers who work as employees of companies are limited in their potential earnings and subject to all of the typical issues of working for someone else. I've been there and done that. I wanted more income, more freedom and more variety of projects.Remote contract-based Web developer work offers all of these benefits to programmers who are willing to run their own business and work hard. I've created and tested a unique strategy to build a very high revenue business. It's the only method I've found that allows reasonably skilled developers to earn mid-six figure incomes. It isn't rocket science and you don't have to be a rock star level programmer to do it.In this book, I explain everything I did to build my \$450,000 a year Web developer business. I work mostly from a small, comfortable office (by choice) but I often get away to very nice destinations and take my work with me. Yes, one of the best perks of being in charge of your career.If you are a relatively new developer, I truly believe that you can build the core skills to accomplish what I have done. For more seasoned developers, I have no doubt that you can use my strategy to earn the income that you dream about.
