**Metals in Cells** Valeria Culotta,Robert A. Scott,2016-03-16 Over the last three decades a lot of research on the role of metals in biochemistry and medicine has been done. As a result many structures of biomolecules with metals have been characterized and medicinal chemistry studied the effects of metal containing drugs. This new book (from the EIBC Book Series) covers recent advances made by top researchers in the field of metals in cells [the “metallome”] and include: regulated metal ion uptake and trafficking, sensing of metals within cells and across tissues, and identification of the vast cellular factors designed to orchestrate assembly of metal cofactor sites while minimizing toxic side reactions of metals. In addition, it features aspects of metals in disease, including the role of metals in neuro-degeneration, liver disease, and inflammation, as a way to highlight the detrimental effects of mishandling of metal trafficking and response to foreign metals. With the breadth of our recently acquired understanding of metals in cells, a book that features key aspects of cellular handling of inorganic elements is both timely and important. At this point in our understanding, it is worthwhile to step back and take an expansive view of how far our understanding has come, while also highlighting how much we still do not know. The content from this book will publish online, as part of EIBC in December 2013, find out more about the Encyclopedia of Inorganic and Bioinorganic Chemistry, the essential online resource for researchers and students working in all areas of inorganic and bioinorganic chemistry.

**Molecular Aspects of Iron Metabolism in Pathogenic and Symbiotic Plant-Microbe Associations** Dominique Expert,Mark R. O'Brian,2012-08-23 Iron plays a key role in biology as essential cofactor of numerous proteins. However, since it is only slightly soluble its bioavailability can be readily compromised under aerobic conditions. Moreover, due to its ability to catalyze the generation of free radicals, iron can also be toxic. Thus, it doesn’t surprise that living organisms have developed sophisticated means for acquiring iron whilst tightly controlling the intracellular concentrations of this metal in response to environmental conditions. Also, the critical role of iron has long been acknowledged in host vertebrate-parasite relationships where both partners compete for the acquisition of this essential element and activate complex signaling cascades to control their iron homeostasis during infection. Following the great interest that the mechanisms regulating the acquisition of iron and the control of iron homeostasis have generated among researchers studying plant-pathogen and legume-rhizobia interactions, this book offers a comprehensive analysis of irons’ various roles in the plant-microbial associations. The introductory chapter stresses the essentiality of iron in biological systems. The second chapter surveys the abundance of information on iron’s pivotal role in microbial plant pathogenesis and defence. Finally, the third chapter reviews the advances in our understanding of iron metabolism in the rhizobia, soil bacteria able to establish a symbiotic association with legumes and carry out nitrogen fixation. Molecular Aspects of Iron Metabolism in Pathogenic and Symbiotic Plant-Microbe Associations is a valuable resource to microbiologists, pathologists and scientists interested in iron uptake and metabolism in microbial pathogenesis, rhizobia legume associations, and plant physiology and immunity.

*Northern Ireland* Jonathan Tonge,2013-05-20 For almost three decades the troubles in Northern Ireland raged, claiming over 3,600 lives, with civilians accounting for almost half the fatalities. In this book, Jonathan Tonge examines the reasons for that conflict; the motivations of the groups involved and explores the prospects for a post-conflict Northern Ireland. The book: assesses the motivations and campaigns of the IRA, UVF and UDA and other armed groups discusses what each paramilitary group achieved through violence analyses the continuing controversies surrounding the Northern Ireland's dirty war outlines the extent of collusion between British security forces and loyalist paramilitaries explores how governments and political parties shaped the peace process scrutinizes prospects for the political development of unionism and nationalism within a devolved power sharing framework examines whether the sectarian divide is strengthening or weakening concludes by assessing whether Northern Ireland can move permanently from violence and instability to become a normal peaceful polity, in which the war is merely a historic relic Written by an acknowledged expert in the field, Northern Ireland combines incisive analysis, original research and a lucid style to provide an important assessment of what has been described as an 800 year old problem.

*Encyclopedia of Terrorism, Third Edition* Cindy Combs,Martin Slann,2021-08-01 The ongoing conflicts in the Middle East and the bombings overseas have shown that—despite the War on Terror—terrorism is still very much a part of daily life for many individuals. Encyclopedia of Terrorism, Third Edition provides students, researchers, journalists, and policymakers with a complete survey of what seems to be an intractable problem. More than 330 entries organized in an easily accessible, A-to-Z format offer comprehensive treatments of the events, people, organizations, and places that have played a major role in international terrorism. Each entry is placed within its appropriate historical context to help readers understand the wide-ranging motivations behind terrorist actions. New and updated entries include: Islamic State mass shootings narco-terrorism Paris attacks Pulse nightclub terrorist attack right-wing terrorism San Bernardino attacks school site analysis siege of the U.S. Capitol Special Projects Team-Special Air Service (SAS) state-sponsored terrorism white supremacist groups

**Divided, Not Conquered** Evan Perkoski,2022 From terrorist disputes to splinter offshoots, an inside look at how armed groups break apart.Terrorist, rebel, and insurgent groups are highly unstable. Amid fears of defeat and even death, intense disagreements have torn many organizations apart, from Syria to Iraq, Ireland to Spain. And while some of these divisions have preceded a group's decline and eventual defeat, others have launched some of the most notorious and deadly organizations in recent history.In Divided Not Conquered, Evan Perkoski analyzes how armed groups fracture and how breakaway splinter groups behave. Perkoski takes an unprecedented look inside these organizations to understand the specific disagreements that cause groups to break apart, like those over ideology, leadership, and strategy. Drawing on research from organizational studies to social psychology, and leveraging analogies from business firms to religious sects, Perkoski shows how these disputes uniquely shape the behavior and survivability of emerging splinters. When motivated by single, shared disagreements,splinters exhibit higher cohesion, clearer objectives, and greater survivability. When motivated by strategy, splinters attract hardline operatives who steer the group towards increasingly lethal tactics and strategies.Including case studies of republican militants in

Northern Ireland, Basque militants in Spain, and the Islamic State in Syria and Iraq, *Divided Not Conquered* demystifies a complex yet common phenomenon with ramifications for counterinsurgency, counterterrorism, and our understanding of increasingly fragmented conflicts around the globe.

*Biological Nitrogen Fixation, Sustainable Agriculture and the Environment* Yi-Ping Wang, Min Lin, Zhe-Xian Tian, Claudine Elmerich, William E. Newton, 2006-01-30 The 14th International Nitrogen Fixation Congress was held in Beijing, China from October 27th through November 1st, 2004. This volume constitutes the proceedings of the Congress and represents a compilation of the presentations by scientists from more than 30 countries around the World who came to Beijing to discuss the progress made since the last Congress and to exchange ideas and information. This year marked the 30th anniversary of the first Congress held in Pullman, Washington, USA, in 1974. Since then, this series of Congresses has met five times in North America (three in the United States and once each in Canada and Mexico), once in South America (Brazil), four times in Western Europe (once each in Spain, The Netherlands, Germany and France), once in Eastern Europe (Russia), and once in Australia; and now for the first time in Asia. China was a most appropriate choice because China is a big country with the largest population in the World, about 1.3 billion people, which is about 22% of the World's population. It is traditionally an agricultural country, even though China has only 7% of the available farming land. This situation explains why agriculture and its productivity are major issues for the Chinese people, its government and the scientists in the field.

**Lucio Fontana** Pia Gottschaller, 2012 Lucio Fontana (1899-1968) is widely regarded as one of the most influential and innovative post-World War II Italian artists. This title presents a technical study in English of this important painter and an informative overview of Fontana's life and work.

**Defense and Security [2 volumes]** Karl DeRouen Jr., Uk Heo, 2005-09-27 An authoritative, up-to-date examination of the national security and defense policies of 50 influential nations and regions across the globe. *Defense and Security: A Compendium of National Armed Forces and Security Policies* presents highly readable, authoritative essays profiling the defense and security policies of over 50 individual countries and regions, with a focus on present-day developments. Written by leading national and international scholars and edited by eminent political science experts Karl DeRouen and Uk Heo, the essays take an in-depth look at each nation's current security situation, defense spending, present and potential military confrontations, civil–military relations, alliances, relations to terrorism, and other topics of importance. Historical events and conflicts are highlighted as well, with emphasis on the post–Cold War era. The essays are parallel in structure, allowing readers to pinpoint similarities and draw comparisons among nations. The two-volume set also includes a detailed introduction featuring a cross-national comparison.

**Divided We Stand** John Horgan, 2012-12-11 Terrorism has returned to the streets of Northern Ireland. In the years after the 1998 Real IRA bombing of Omagh, which killed 29 people, violent dissident Republican groups have re-emerged as a major security threat to a region that has been denied peace, stability, and prosperity for too long. Those responsible have many names. They are breakaways, splinter factions, spoilers, and residual terrorists. The Real IRA, Continuity IRA, and Óglaigh na hÉireann are only some of the groups now responsible for a growing wave of bombings, shootings, threats, and intimidation across Northern Ireland. Commonly known as the dissidents, these are the rejectionists for whom there seems to be no negotiated settlement, no peace deal, no consensus solution that will convince them to accept the will of the majority of the people on the island of Ireland. *Divided We Stand: The Strategy and Psychology of Ireland's Dissident Terrorists* presents the results of meticulous research conducted by the International Center for the Study of Terrorism at the Pennsylvania State University. Since 2007, John Horgan, Director of the center, has led a research project to monitor the activities of Ireland's new terrorists. Drawing on one of the largest open-source militant databases ever assembled, *Divided We Stand* describes the activities, histories, motivations, psychology, and strategy of the small, dynamic, and rapidly evolving splinter groups that continue to erode peace, stability, and normalization in Northern Ireland.

**Dissident Irish Republicanism** Max Taylor, P.M. Currie, 2011-07-15 This collection of papers examines the current rise in violence by Dissident Irish Republicans and its impact on the Northern Ireland Peace Process.

**Terrorism, Law and Policy** David Lowe, 2022-04-25 *Terrorism, Law and Policy: A Comparative Study* is a textbook offering a comparative study of the terrorism-related legislation, policy and practice introduced from international governmental bodies such as the UN and the European Union, and individual states, with a focus on Australia, Canada, New Zealand, the UK and the US. It offers a uniquely legal perspective on key themes relating to terrorism and security. This new edition is brought fully up to date with the ever-changing developments in terrorist activity, as well as in states' approaches to anti-terrorism legislation and policy. It includes new chapters on the far-right and extreme far-right cause, one on offering a comparative study of the anti-terrorism policies of states and international bodies, and the role of international and national counter-terrorism agencies, planning and preparing acts of terrorism and a new chapter on freedom of expression, hate crime and proscribing groups as terrorist organisations. *Terrorism, Law and Policy: A Comparative Study* is ideally suited for terrorism and security modules at undergraduate and postgraduate levels, and will also be of interest to practitioners working on the legal aspects of these areas.

*Terrorism Studies* John Horgan, Kurt Braddock, 2011 This comprehensive reader seeks to equip the aspiring student, based anywhere in the world, with a comprehensive introduction to the study of terrorism.
