A Torrent of Faces James Blish, Norman L. Knight, 1967 In the year 2794, the greatest civilisation in Earth's history, ravaged by over-population and lack of food, faces almost certain destruction. The Flight of Uncontrolled Rockets F. R. Gantmakher, L. M. Levin, 2014-05-17 *International Series of Monographs on Aeronautics and Astronautics, Division VII, Volume 5: The Flight of Uncontrolled Rockets* focuses on external ballistics of uncontrolled rockets. The book first discusses the equations of motion of rockets. The rocket as a system of changing composition; application of solidification principle to rockets; rotational motion of rockets; and equations of motion of the center of mass of rockets are described. The text looks at the calculation of trajectory of rockets and the fundamentals of rocket dispersion. The selection further focuses on the dispersion of finned rockets. Topics include the critical section of the trajectory; standard formula for calculating angular deviation; dispersion of actual rockets; and effective launcher length. The text also describes the dispersion of finned rotated rockets and of finned anti-tank rockets. The book also examines the effect of wind on the flight of rockets. Topics include correction to the coordinates of the point of impact for finned rockets; general effect of

wind on dispersion; and general treatment of powered flight in the presence of wind. The text is important for readers interested in the ballistics of uncontrolled rockets.

Rockets and Missiles A. Bowdoin Van Riper, 2007-11-26 Beginning with World War II, missiles transformed the art of war. For the first time, cities of warring nations were vulnerable to sudden, unannounced, long-distance attacks. At the same time, rockets made possible one of the great triumphs of the modern age—the exploration of space. Beginning with the origins of rocketry in medieval and early modern Asia, *Rockets and Missiles* traces the history of the technology that led to both the great fear of global warfare and the great excitement of the Space Age. This volume focuses on rocketry in late-twentieth-century Western Europe, Russia, and the United States, as well as the spread of rocket technology to East Asia and the Middle East. It covers the full history of rocket technology—including how rockets improved in performance, reliability, and versatility and how they affected everyday life.

The Rocket Book Ellen Merriwether, 2016

Vengeance Philip Henshall, 1998 From 1943 onwards, Hitler and the Nazi propaganda machine poured forth a torrent of warnings to the Allies that vengeance and retribution were imminent. Historians have always assumed that Hitler

was referring to the V1 and V2 weapons. But this book reveals that a far more lethal weapon existed in the form of a cargo of highly radioactive material carried in a modified V2 rocket. Designed to be launched from special sites in France, these weapons of mass destruction had the potential to turn Britain and the eastern seaboard of the USA into radioactive wastelands.
