Protecting Pollinators Jodi Helmer,2019-04-18 We should thank a pollinator at every meal. These diminutive creatures fertilize a third of the crops we eat. Yet half of the 200,000 species of pollinators are threatened. Birds, bats, insects, and many other pollinators are disappearing, putting our entire food supply in jeopardy. Protecting Pollinators breaks down the latest science on environmental threats and takes readers inside the most promising conservation efforts. Efforts range from cities creating butterfly highways to citizen scientists monitoring migration. Along with inspiring stories of revival and lessons from failed projects, readers will find practical tips to get involved. And they will be reminded of the magic of pollinators--the iconic monarchs, dainty hummingbirds, and homely bats alike who bring food to our tables.

Dracula's Vault - A Collection of Vampiric Tales from the Pen of Bram Stoker Bram Stoker,2019-02-15 A chilling collection of classic gothic short stories written by Bram Stoker, all connected through the theme of vampires. "Gothic fiction" is a subgenre of Gothic horror that is defined by a combination of fiction writing with horror,

death, and sometimes romance. It arguably originated from the 1764 novel "The Castle of Otranto" by English author Horace Walpole, which was subtitled "A Gothic Story" after the second edition. Abraham Bram Stoker (1847 – 1912) was an Irish author. He is best remembered for his 1897 Gothic novel "Dracula", which introduced the world-famous character of Count Dracula and is responsible for various conventions of vampire fantasy that persist to this day. The tales include: 'Dracula', 'The Judge's House', 'The Burial of the Rats' and 'The Squaw'. Other notable works by this author include: "The Primrose Path" (1875), "The Snake's Pass" (1890), and "Seven Golden Buttons" (1891). This volume will appeal to lovers of Gothic literature and classic vampire literature. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

Handheld and Ubiquitous Computing Hans-W. Gellersen, 1999-09-15 Truly personal handheld and wearable technologies should be small and unobtrusive and allow access to information and computing most of the time and in most circumstance. Complimentary, environment-based technologies make artifacts of our surrounding world computationally accessible and facilitate use of everyday environments as a ubiquitous computing interface. The International Symposium on Handheld and Ubiquitous Computing, held for the first time in September 1999, was initiated to investigate links and synergies in these developments, and to relate advances in personal technologies to those in environment-based technologies. The HUC 99 Symposium was organised by the University of Karlsruhe, in particular by the Telecooperation Office (Tec0) of the Institute for Telematics, in close collaboration with ZKM Karlsruhe, which generously hosted the event in its truly inspiring Center for Arts and Media Technology. The symposium was supported by the Association of Computing Machinery (ACM) and the German Computer Society (Gesellschaft für Informatik, GI) and held in cooperation with a number of special interest groups of these scientific societies. HUC 99 attracted a large number of paper submissions, from which the international programme committee selected 23 high-quality contributions for presentation at the symposium and for inclusion in these proceedings. In addition, posters were solicited to provide an outlet for novel ideas and late-breaking results; selected posters are also included with these proceedings. The technical programme was further complemented by four invited keynote addresses, and two panel sessions.

This key part of controlling risk escalation can lead to the contamination of medicinal products, hence necessary tracking precautions are essential. Regulatory authorities have challenged pharmaceutical companies, healthcare providers, and those in manufacturing practice to adopt a holistic approach to contamination control. New technologies are needed to introduce barriers between personnel and the environment, and to provide a rapid and more accurate assessment of risk. This book offers guidance on building a complete biocontamination strategy. Provides the information necessary for a facility to build a complete biocontamination strategy Helps facilities understand the main biocontamination risks to medicinal products Assists the reader in navigating regulatory requirements Provides insight into developing an environmental monitoring program Covers the types of rapid microbiological monitoring methods now available, as well as current legislation
