The Boyfriend App 2.0: Jailbreak Phenomenal Pen ,2023-04-30 THEIR LOVE WILL BREAK ALL THE RULES. The apocalyptic after-prom fight with Josh resulted in the destruction of Kate's phone and the severance of her one and only link to Ecto, her virtual boyfriend. Ecto is presumed lost for good but, unbeknown to Kate, is trapped inside an RPG. Weeks later, Kate finally summons the courage to confess to her ma the true events leading to the fateful prom night. The next thing she knows, she's stuck in an Internet addiction rehab facility called Camp Unplugged. There, she meets all sorts of characters: Ms Blanca a.k.a. Ms. Perfect: the perfectionist camp counsellor Yssy: Kate's fashionista and caffeine-junkie roomie Nathan: a handsome and brooding gamer With Kate's debut (18th birthday) drawing close, will she allow herself a glimmer of hope and attempt to break out? But who can she trust with her escape plan? And why was Kate sent to Camp Unplugged anyway? The answer lies in a mysterious past relationship of her ma.

Seascape Ecology: from characterization to evaluation of state and change over time Monica Montefalcone,Carlo Nike Bianchi,2023-08-22 Landscape ecology has been a discrete, established discipline since at least 1980. Its marine counterpart, seascape ecology, is barely a decade old, its first applications dating from the early 2010s. Lack of perception of the marine environment hampers the adoption of many landscape ecology approaches to the sea. Seascape ecology relies on special technologies such as remote sensing (either acoustic or optical), robotics, and scuba diving. Both disciplines deal with the spatial configuration of ecosystems and consider environmental heterogeneity and dynamics as the main subjects of study and the key for ecosystem functioning and persistence. Seascape is here intended as the totality of natural and anthropogenic characters of a marine region. To the geologist, it is defined by sedimentology and underwater geomorphology, to the biologist by the nature of the living cover of the seafloor, to the ecologist by the relationships among functional processes and the spatial organization of ecosystems. The goal of this research topic is to encourage original research, case studies, reviews, and viewpoints to identify research priority gaps and possibly contribute to filling them in. We will appreciate, in particular, manuscripts dealing with recent advances such as high-resolution habitat mapping; underwater soundscape and biophony; development, application and validation of biotic indices to assess seafloor integrity (as requested, for instance, by recent European Directives). Papers of interest may discuss the multivarious facets of stability and describe resistance and resilience patterns, the role of stress and disturbance, regime shift and phase shift, or may take up the challenge of integrating coastal landscape and seascape analyses. Studies of long-term series are welcome, as well as methodological improvements, and macroecological approaches on the importance of species diversity and connectivity in seascape organization.

Eve 2.0: Night Terrors Winter Lawrence,2020-05-05 Mondays are never easy for an introvert like Gwen, but the Monday right after spending a harrowing weekend trapped in a government simulator is especially difficult, and that's saying a lot given that she just spent days dealing with life-or-death situations and a twisted love triangle. It's hard to take in, and it doesn't help that the school is abuzz with rumors. She hates being the center of attention, and she wishes it would all just go away, but the day goes from bad to worse when she and Ryan begin exhibiting troubling symptoms...hallucinations and haunting visions, and that night, the dreams begin. At first, they aren't so bad, but as days go by and their symptoms worsen, Gwen begins to suspect that the government simulator may have somehow tricked them into believing they made it out okay, but in reality, they're still trapped in Eve 2.0.
