⯃ Run Like a Champion Alan Culpepper,2015-03-05 In Run Like a Champion, one of America's most versatile and accomplished runners, Alan Culpepper, reveals the best practices of the best runners. Over his 25-year racing career, Culpepper won national titles from 5K to marathon, a span of race distances so wide that just a few runners can claim the same impressive versatility. Culpepper sets out his approach--and the lessons he learned from his competitors--so that all runners can fully realize their potential. As a two-time Olympic competitor, Culpepper has a unique understanding of what it takes to compete at the highest level. His running career has put him on the start line alongside the world's best runners, and he has found that despite their many differences, talents, and approaches to training, among them they share a common understanding: the best athletes know that the secret to success in running lies in understanding a bigger picture of training. Not everyone has the physiology to run at the highest level, but everyone can benefit from implementing an Olympic approach to training. Run Like a Champion shares a big-picture view of running, looking at not only the essential training elements but also other key pieces of the puzzle: identifying motivation; finding a proper work/life/family balance; and understanding complementary aspects of training such as stretching, how much to drink, diet, and how to avoid and treat injuries. Run Like a Champion reveals all the guidelines, tips and tricks, workouts, mental training, and nutritional practices that Olympic runners use. By making this Olympic approach part of their running, runners of all levels will make their goals achievable from 5K to marathon.

⯃ Long-Run Economic Growth Steven Durlauf,John F. Helliwell,Baldev Raj,2012-12-06 One of the most enduring questions in economics involves how a nation could accelerate the pace of its economic development. One of the most enduring answers to this question is to promote exports -either because doing so directly influences development via encouraging production of goods for export, or because export promotion permits accumulation of foreign exchange which permits importation of high-quality goods and services, which can in turn be used to expand the nation's production possibilities. In either case, growth is said to be export-led; the latter case is the so-called two-gap hypothesis (McKinnon, 1964; Findlay, 1973). The early work on export-led growth consisted of static cross-country com parisons (Michaely, 1977; Balassa, 1978; Tyler, 1981; Kormendi and Meguire, 1985). These studies generally concluded that there is strong evidence in favour of export-led growth because export growth and income growth are highly correlated. However, Kravis pointed out in 1970 that the question is an essen tially dynamic one: as he put it, are exports the handmaiden or the engine of growth? To make this determination one needs to look at time series to see whether or not exports are driving income. This approach has been taken in a number of papers (Jung and Marshall, 1985; Chow, 1987; Serletis, 1992; Kunst and Marin, 1989; Marin, 1992; Afxentiou and Serletis, 1991), designed to assess whether or not individual countries exhibit statistically significant evidence of export-led growth using Granger causality tests.

⯃ *Advances in Conceptual Modeling* Peter P. Chen,David W. Embley,Jacques Kouloumdjian,Stephen W. Liddle,John F. Roddick,2007-07-16 The objective of the workshops associated with the ER'99 18th International Conference on Conceptual Modeling is to give participants access to high level presentations on specialized, hot, or emerging scientific topics. Three themes have been selected in this respect: — Evolution and Change in Data Management (ECDM'99) dealing with handling the evolution of data and data structure, — Reverse Engineering in Information Systems (REIS'99) aimed at exploring the issues raised by legacy systems, — The World Wide Web and Conceptual Modehng (WWWCM'99) which ana lyzes the mutual contribution of WWW resources and techniques with con ceptual modeling. ER'99 has been organized so that there is no overlap between conference ses sions and the workshops. Therefore participants can follow both the conference and the workshop presentations they are interested in. I would like to thank the ER'99 program co-chairs, Jacky Akoka and Mokrane Bouzeghoub for having given me the opportunity to organize these workshops. I would also like to thank Stephen Liddle for his valuable help in managing the evaluation procedure for submitted papers and helping to prepare the workshop proceedings for publication. August 1999 Jacques Kouloumdjian Preface for ECDM'99 The first part of this volume contains the proceedings of the First International Workshop on Evolution and Change in Data Management, ECDM'99, which was held in conjunction with the 18th International Conference on Conceptual Modehng (ER'99) in Paris, France, November 15-18, 1999.

⯃ *The Irreconcilable Inconsistencies of Neoclassical Macroeconomics* John Weeks,2012-02-23 In the course of this book it is argued that the loss of what is essentially macro in Keynes is the result of a preference for a form of equilibrium analysis that gives unqualified support to the ideology of free markets. In the case of Marx, his theory of exploitation and from this the stress on class struggle, led to an almost complete neglect of his contribution to the analysis of the aggregate demand and supply of commodities.
