*Scale* Jeff Hoffman, David Finkel, 2014-08-14 Your concrete road map to rapidly grow your business and get your life back! Have you ever wanted to grow your business but held back because of fear that it would take over your life? As an owner, it's all too common to feel you have to choose between your personal life and the success of your business. But the surprising truth is that the only way to truly scale and grow your company is to reduce its reliance on you. This means that, done right, scaling ensures that you can grow your business without sacrificing your life. Jeff Hoffman, a serial entrepreneur and former CEO in the Priceline (Priceline Yardsale) family of companies, and David Finkel, CEO of Maui Mastermind, a business coaching company with thousands of clients worldwide, offer a concrete road map for rapidly growing your business while also gaining more personal freedom. You'll not only learn the best strategies to generate growth, but you'll also get proven insider tips to sustain that growth through sound systems, empowered teams, and intelligent internal controls. Hoffman and Finkel will also show you how to overcome predictable obstacles in any pillar of your business—including sales, operations, and finance—with insight for building better lead-generation systems, managing cash flow, and retaining talent. You'll learn how to:

- Escape the Self-Employment Trap and build a business, not a job.
- Systematize your business to reduce costs and increase capacity.
- Ensure your company survives the "Hit by a Bus" test.
- Uncover your company's top leverage points (and execution strategies to implement what you discover).
- Fund your growth with the seven cash flow commandments.
- And much more.

Scale offers a game plan to work less and get your business to produce more. Written by two worldclass entrepreneurs who have started, scaled, and successfully exited from multiple businesses, which collectively have generated tens of billions of dollars in sales, it gives you their bottom-line best ideas to effectively grow your company. If you have ever felt stuck in your business, not knowing the best way forward, this book is your mustread guide.

**Markets in Profile** James F. Dalton, Robert B. Dalton, Eric T. Jones, 2011-01-11 Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying

dynamics that influence market activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by rationality when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will improve investors ability to interpret change in markets, enabling better, more confident investment decisions.

*Execution* Larry Bossidy,Ram Charan,Charles Burck,2009-11-10 #1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When *Execution* was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. *Execution* gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. *Execution* shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a "vision" and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—*Execution* provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

*Inspiring Sustainable Behaviour* Oliver Payne, 2013-05-07 What is the answer to inspiring sustainable behaviour? It starts with a question – or nineteen. With this simple and inspiring guide you'll learn how to ask for persistent, pervasive, and near-costless change by uncovering our hidden quirks, judgmental biases, and apparent irrationalities. The only change you'll need to make is how you ask. Businesses, larger or small, will soon have to cut costs and cut carbon, irrespective of the products they sell, or the services they perform. National government has structural policy and legislative needs, and local government has implementation and documentation needs. Indeed, the new UK government coalition's approach to transport is simply 'cut costs and cut carbon'. Set

against this there is an increasing sense that popular culture and popular science are congregating around a desire to understand who we are and how we behave. The recent rise of behavioural economics is a testament to this as well as the relevance of environmental psychology. Allied to this is a sense that big business is forging ahead with plans to account for and mitigate carbon emissions without the marketing and communications departments being able to help or communicate this effectively either through their own efforts or those of their communication agencies. The '19 Different Ways to Ask for Change' offer a solution to all these needs by pulling them together and showing that changing how we ask is near-costless, but its effects could be near-priceless. This book shows that simplification isn't always the solution, an action can be the most successful question, and a default answer can be the most important. It explores why short-term memory tasks change our behaviour, how singing roads regulate speed, and that commitment gaps change outcomes; how our worry-profile is the same as an Argentinean farmer's, why knowledge of what kills you is irrelevant but asking about behaviour that kills is deadly, and what a chimpanzee's tea-party tells us about the effect of ownership on decision-making. This timely book will be of great value to scholars and practitioners whose work relates to reducing carbon emissions with a particular emphasis on environmental psychology, behavioural economics, project design, and psychology. It offers practical solutions for policy makers and professionals in marketing and communications departments.

**The Risk Management of Contingent Convertible (CoCo) Bonds** Jan De Spiegeleer,Ine Marquet,Wim Schoutens,2018-11-02 This book provides an overview of the risk components of CoCo bonds. CoCos are hybrid financial instruments that convert into equity or suffer a write-down of the face value upon the appearance of a trigger event. The loss-absorption mechanism is automatically enforced either via the breaching of a particular

accounting ratio, typically in terms of the Common Equity Tier 1 (CET1) ratio, or via a regulatory trigger. CoCos are non-standardised instruments with different loss-absorption and trigger mechanisms. They might also contain additional features such as the cancellation of coupon payments. Different pricing models are discussed in detail. These models use market data such as share prices, CDS levels and implied volatility in order to calculate the theoretical price of a CoCo bond and its sensitivities, providing the investor with insides to hedge from adverse changes in the market conditions. The audience are professionals as well as academics who want to learn how to risk manage CoCo bonds using cutting edge techniques as well as all the risk involved in CoCo bonds.

*The Cryptopians* Laura Shin, 2022-02-22 The story of the idealists, technologists, and opportunists fighting to bring cryptocurrency to the masses. In their short history, Bitcoin and other cryptocurrencies have gone through booms, busts, and internecine wars, recently reaching a market valuation of more than \$2 trillion. The central promise of crypto endures—vast fortunes made from decentralized networks not controlled by any single entity and not yet regulated by many governments. The recent growth of crypto would have been all but impossible if not for a brilliant young man named Vitalik Buterin and his creation: Ethereum. In this book, Laura Shin takes readers inside the founding of this novel cryptocurrency network, which enabled users to launch their own new coins, thus creating a new crypto fever. She introduces readers to larger-than-life characters like Buterin, the Web3 wunderkind; his short-lived CEO, Charles Hoskinson; and Joe Lubin, a former Goldman Sachs VP who became one of crypto's most well-known billionaires. Sparks fly as these outsized personalities fight for their piece of a seemingly limitless new business opportunity. This fascinating book shows the crypto market for what it really is: a deeply personal struggle to influence the coming revolution in money, culture, and power.
