Biological Control C. Huffaker, 2013-03-09 The explosive increase in the world's human population, with consequent need to feed an ever-increasing number of hungry mouths, and the largely resultant disturbances and pollution of the environment in which man must live and produce the things he needs, are forcing him to search for means of solving the first problem without intensifying the latter. Food production requires adequate assurance against the ravages of insects. In the last three decades short-sighted, unilateral and almost exclusive employment of synthesized chemicals for insect pest control has posed an enormous and as yet unfathomed contribution to the degradation of our environment, while our insect pest problems seem greater than ever. Properly viewed, pest control is basically a question of applied ecology, yet its practice has long been conducted with little regard to real necessity for control, and in some cases, with little regard to various detrimental side-effects or long-term advantage with respect, even, to the specific crop itself. This book deals fundamentally with these questions. The development of pesticide resistance in many of the target species, against which the pesticides are directed, has occasioned an ever-increasing load of applications and complexes of different kinds of highly toxic materials. This has been made even more necessary as the destruction of natural enemies has resulted, as a side effect, in the rise to pest status of many species that were formerly innocuous. The application of broad-spectrum pesticides thus has many serious and self-defeating features.

Grey Area Scott Jacques, 2019-05-01 Coffeeshops are the most famous example of Dutch tolerance. But in fact, these cannabis distributors are highly regulated. Coffeeshops are permitted to break the law, but not the rules. On the premises, there cannot be minors, hard drugs or more than 500 grams. Nor can a coffeeshop advertise, cause nuisance or sell over five grams to a person in a day. These rules are enforced by surprise police checks, with violation punishable by closure. In Grey Area, Scott Jacques examines the regulations with a huge stash of data, which he collected during two years of fieldwork in Amsterdam. How do coffeeshop owners and staff obey the rules? How are the rules broken? Why so? To what effect? The stories and statistics show that order in the midst of smoke is key to Dutch drug policy, vaporising the idea that prohibition is better than regulation. Grey Area is a timely contribution in light of the blazing reform to cannabis policy worldwide. Praise for Grey Area 'This book is original and highly topical. Logical and well structured, the discussion is firmly located in a large body of contemporary theory. The writing style is conversational, open and accessible. The quality, amount and depth of the empirical work that Jacques has undertaken made me feel that I was there, visiting the coffeeshops with him. Rarely have I seen something as careful and detailed as this work.' Ronald V. Clarke, Rutgers University, USA 'This book examines the intricacies of operating between law and rules in Amsterdam coffeeshops. Based on an extensive fieldwork, it is arguably the most comprehensive criminological analysis of the issue to date. This is an important work, from an excellent writer, that I warmly recommend to both students and researchers.' Kim Møller, Malmö University, Sweden
