**Manteca** Melinda Pacheco Patrick,2019 In the heart of California's Central Valley, immigrants arrived in earnest on the heels of the Gold Rush, ranching and farming the land, including the Father of Manteca, Joshua Cowell, who traversed the Sierras on foot in 1863. Although the town was originally known as Cowell Station, the name Monteca (adapted from the Spanish word for butter) was proposed to distinguish the railroad stop and celebrate the dairy industry. The first tickets printed by the railroad labeled the town as Manteca--the Spanish word for lard. Manteca is known for one of the oldest landmarks in the county, East Union Cemetery (established in 1872); the family-owned and -operated Delicato Winery (established in 1924); and notable figures such as baseball great Milo Candini and Rep. John J. McFall. Today, Manteca boasts a population of 80,000; growth has been stimulated over the last 40 years by commuters who work in the Bay Area or Sacramento in exchange for life in a smaller community. This Family City is home to Big League Dreams, Bass Pro Shop, and the future Great Wolf Lodge, which will bring back waterslides to Manteca!

**The Enterprise of Death** Jesse Bullington,2011-03-24 As the witch-pyres of the Spanish Inquisition blanket Renaissance Europe in a moral haze, a young African slave finds herself the unwilling apprentice of an ancient necromancer. Unfortunately, quitting his company proves even more hazardous than remaining his pupil when she is afflicted with a terrible curse. Yet salvation may lie in a mysterious tome her tutor has hidden somewhere on the war-torn continent. She sets out on a seemingly impossible journey to find the book, never suspecting her fate is tied to three strangers: the artist Niklaus Manuel Deutsch, the alchemist Dr. Paracelsus, and a gun-slinging Dutch mercenary. As Manuel paints her macabre story on canvas, plank, and church wall, the young apprentice becomes increasingly aware that death might be the least of her concerns.

**Lee de Forest** Mike Adams,2011-10-17 The life-long inventor, Lee de Forest invented the three-element vacuum tube used between 1906 and 1916 as a detector, amplifier, and oscillator of radio waves. Beginning in 1918 he began to develop a light valve, a device for writing and reading sound using light patterns. While he received many patents for his process, he was initially ignored by the film industry. In order to promote and demonstrate his process he made several hundred sound short films, he rented space for their showing; he sold the tickets and did the publicity to gain audiences for his invention. Lee de Forest officially brought sound to film in 1919. Lee De Forest: King of Radio, Television, and Film is about both invention and early film making; de Forest as the scientist and producer, director, and writer of the content. This book tells the story of de Forest's contribution in changing the history of film through the incorporation of sound. The text includes primary source historical material, U.S. patents and richly-illustrated photos of Lee de Forest's experiments. Readers will greatly benefit from an understanding of the transition from silent to audio motion pictures, the impact this had on the scientific community and the popular culture, as well as the economics of the entertainment industry.

*Bay Area Radio* John F. Schneider,2012 The San Francisco Bay Area was a key national radio-broadcasting center during the first three decades of commercial radio. In

1909, it was home to the very beginnings of the art and science of broadcasting, when Charles Doc Herrold began sending out weekly voice and music programs from his radio school in San Jose. Dozens of other radio pioneers soon followed. In 1926, big broadcasting came to San Francisco when the newly formed National Broadcasting Company (NBC) established its West Coast headquarters on Sutter Street. Other national and regional networks soon set up their own broadcast production centers, and for the next 20 years, thousands of actors, musicians, announcers, and engineers were creating important programs that were heard on the West Coast as well as nationwide. During World War II, San Francisco became the key collection center for Pacific war news, and bulletins received in San Francisco were quickly relayed to an anxious nation. Conversely, powerful shortwave stations broadcast war news and propaganda back to the Pacific and entertained American troops overseas.
