Some kids' hopes are familiar while others are off-the-wall. Whether it's looking good on picture day or skateboarding at school, everyone's wishes are shown in humorously exaggerated illustrations. As the first day draws to a close, there can be no doubt—this school year will definitely be the best!

Investing in Kids Timothy J. Bartik, 2011 This book presents arguments for the following propositions: Local economic development strategies in the United States should include extensive investments in high quality early childhood programs, such as prekindergarten (pre K) education, child care, and parenting assistance. Economic development policies should also include reforms in business tax incentives. But economic development benefitsChigher earnings per capita in the local communityCcan be better achieved if business incentives are complemented by early childhood programs. Economic development benefits can play an important role in motivating a grassroots movement for investing in our kids.

Grit Angela Duckworth, 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-geniuses everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she’s learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among *Grit*’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

Student Capital Investing in Kids and their Needs Dr. Virginia Krolczyk, 2018-04-23 Through the years I noticed as curriculum requirements increased student's knowledge base decreased. I couldn't help but wonder how this could be, so I started inquiring. I did not explore the margins of my inquisitiveness though those implementing the rigor, rather, I probed those on the receiving end; the students. That is to say the output and rationale behind it was more important to me than input. The implication of poor educational curriculum has yielded profound disconnects which negatively impact young adults and adults alike. Student's all over the country are suffering unnecessarily and do not need to. Student Capital addresses emotional intelligence, teacher abuse, excessive testing in schools, lack of career guidance, need for skilled trades, role technology plays, role parents play, increase in low self-esteem, why so many teens are abusing substances, abilities lacking

post high school, and finally draws a connection to student struggles in higher education and society.

Ethical Leadership and Decision Making in Education Joan Poliner Shapiro,Jacqueline A. Stefkovich,2021-11-29 The fifth edition of the best-selling text, *Ethical Leadership and Decision Making in Education*, continues to address the increasing interest in ethics and assists educational leaders with complex dilemmas in today's challenging, divided, and diverse societies. Through discussion and analysis, Shapiro and Stefkovich demonstrate the application of four ethical paradigms – the ethics of justice, critique, care, and the profession. After illustrating how the Multiple Ethical Paradigms may be applied to authentic dilemmas, the authors present cases written by graduate students, practitioners, and academics representing dilemmas faced by educational leaders in urban, suburban, and rural public and private schools and universities, in the U.S. and abroad. Following each case are questions that call for thoughtful, complex thinking and help readers apply the Multiple Ethical Paradigms to practical situations. New in the Fifth Edition are more than ten new cases that cover issues of food insufficiency, the pandemic's effects on diverse school populations, a student's sexual orientation, transgender students in the university, lock-down drills for young children, refugees in a Swedish school, boundaries in high school sports, generational differences in an adult diploma school, acceptance of animals on campus, and hate speech in the academy. This edition also includes teaching notes for the instructor stressing the importance of self-reflection, use of new technologies, and global appeal of ethical paradigms and dilemmas. This book is a critical resource for aspiring and practicing administrators, teacher leaders, and educational policy makers.

Restorative Justice Tribunal Zachary Scott Robbins,2021-05-09 Learn how to implement a restorative justice approach that reduces suspension and expulsion rates, without compromising school safety and classroom order. Author Dr. Zachary Scott Robbins, who has turned around schools in Boston, Massachusetts, and Las Vegas, Nevada, explores the assumptions that underpin school policies that lead to high rates of suspensions and expulsions, especially for African-American students. He shares his experiences using Restorative Justice Tribunals and Restorative Justice Circles, which strike an effective balance between serving consequences to students who misbehave and providing them with therapeutic wraparound supports. This powerful book will help school leaders avoid discriminating based on race, national origin, or disability; will improve school climate; and will help teachers spend less time on discipline, so they can have more time for instruction and preparing students to graduate.
