Church Publishing,1993-01-21 This popular collection of 280 musical pieces from both the African American and Gospel traditions has been compiled under the supervision of the Office of Black Ministries of the Episcopal Church. It includes service music and several psalm settings in addition to the Negro spirituals, Gospel songs, and hymns.

Singing Culture Ezra Chitando,2002 This study examines the historical development, social, political and economic significance of gospel music in Zimbabwe. It approaches music with Christian theological ideas and popular appeal as a cultural phenomenon with manifold implications. Applying a history of religious approach to the study of a widespread religious phenomenon, the study seeks to link religious studies with popular culture. It argues that gospel music represents a valuable entry point into a discussion of contemporary African cultural production. Gospel music successfully blends the musical traditions of Zimbabwe, influences from other African countries, and music styles from other parts of the world.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Freedom in the World 2006 Freedom House,2006 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global

political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.
