Map Skills - Europe R. Scott House,Patti M. House,2010-09-01 Color overheads included! Explore the varied features of the European continent while reinforcing basic map reading skills. Sixteen student pages and accompanying blackline and full-color maps coordinate to provide a relational study of the elevation, vegetation, products, population, and peoples of Europe. Student pages challenge students to combine maps and additional resources in order to answer questions and make judgments. Question topics follow the Five Themes of Geography as outlined by the National Geographic Society: finding absolute and relative locations on a map, relating physical and human characteristics to an area, understanding human relationships to the environment, tracing movement of peoples and goods throughout an area, and organizing countries and continents into regions for detailed study.

The Golden Age of Maritime Maps Catherine Hofmann,Hélène Richard,Emmanuelle Vagnon,2013 Portolan charts, so called from the Italian adjective portolano, meaning 'related to ports or harbours', were born during the 12th century in the maritime community. These charts, drawn on parchment and crisscrossed with lines referring to the compass directions, indicated the succession of ports and anchorages along the shores, and were used by European sailors exploring the world up until the 18th century. Not only used as navigational instruments on boats, they were also produced for wealthy sponsors in the form of illuminated images of the world, to illustrate the economic and political interests of the major European sea powers. This book takes stock of the state of knowledge on these maps, bringing together contributions from a dozen European specialists, who trace the history and diversity of styles and places of production of these charts. This type of mapping is approached from three angles. The first part, 'The Mediterranean', refers to the manufacture and use of the first charts, centred on the Mediterranean, and the persistence of this tradition in the Mediterranean basin until the 18th century. The second part, 'The Open Sea', shows how these regional charts have evolved from a technical and iconographical point of view at the time of the great European voyages, in order to include the oceans and new worlds. The third part, 'The Indian Ocean', shows how these charts, in a maritime area where ancient civilizations coexisted, were dependent on other cartographic traditions (ancient, Arab, Asian) before joining the information reported by Portuguese sailors and European trading companies in the modern era. AUTHORS: Catherine Hofmann, a palaeographic archivist, is chief curator in the Department of Maps and Plans of the National Library of France. She is a board member of the journal *Imago Mundi*, and has published fifteen articles on the history of cartography in the modern era. Helene Richard, a palaeographic archivist, is a former director of the Department of Maps and Plans at the National Library of France. In addition to her research on the history of books and libraries, she has published works on the history of maritime exploration in the 18th and 19th centuries and the associated nautical science. Emmanuelle Vagnon holds a PhD in history, specialising in maps of the Middle Ages. She is senior researcher at the French National Centre for Scientific Research and the University of Paris. ILLUSTRATIONS: 300 colour illustrations

Europe - What's in a Name Peter H. Gommers,2001 Europe is a word that is almost daily on our lips. But how far do we have to go back in order to find the origins of its name? The first part of this beautifully illustrated book traces the geographical and mythological basis of Europe's name. Who came up with the idea to distinguish the world in continents with proper names? The search will bring the reader back to the early history of mankind. How did the ancient Egyptians see the world and populations around them? Where did the Hebrews get the idea to split the world in three? And what was the world-picture in ancient Greece, laid down in geographic treatises and fragments? Where did the name 'Europe' originate from? Could it be from a person, either mortal or divine? In ancient Greek literature the name 'Europa' appears quite frequently for Greek goddesses and Greek women. Strangely enough, the best known Europa myth concerns a Phoenician princess, loved by the Greek god Zeus. Many mythographs doubt the Asian descent of the Phoenician Europa. Is her real origin to be located on mainland Greece? How can the contradicting Greek myths be interpreted, and was the name universally accepted as the name for the continent? In the second part of this book, the author tells the amazing story of how the Arts have treated the Europa myths for almost three millennia. He shows the extraordinary influence of the personification of the geographic continent Europe on literature, music, sculpture, painting, tapestry and other applied arts. All this clearly demonstrates the vivid interest in Europe for the subject throughout the ages and illustrates, according to Karel van Miert in his Foreword, our common European culture.

Freshwater in Europe United Nations Environment Programme. Division of Early Warning and Assessment. Office for Europe,2004 Although few Europeans suffer the poor water quality and shortages experienced by people in many other parts of the world, water resources in Europe are unevenly distributed between and within countries. Climate change may also play a role, especially in coastal areas where flooding may disrupt sanitation infrastructure and thereby contaminate watercourses. This publication reviews the current state of freshwater resources in Europe and progress made towards the integrated management of water resources. It is produced in support of UNEP's reporting work and the International Year for Freshwater in 2003; and uses a range of data, graphics and maps to provide easily accessible information on this important topic. Sections deal with: freshwater resources and consumption; freshwater quality and ecosystems; major European watersheds; water policy, regulation and institutions.

Antique Map Price Guide No. 10 Jeffrey Sharpe,2011-11-28 In this catalogue, collectors will find details of more than 1700 different antique maps of Europe (whole), Eastern Europe, Balkans, Western European Sea Charts, Mediterranean Sea, Malta and Switzerland. The maps are listed by region in date order, from 1477 to 1850. The prices given are the 2014 rated values, all of which are for maps in fine condition. This enables collectors, for the first time, to compare, at a glance, the importance of all the available maps of any region. Please note that if condition was not standardized, such comparisons could not be made. There is also more information on individual maps, many of which are illustrated in colour. Prices of maps are continuously updated.

The Charting of the Oceans Peter Whitfield,1996 This book from the Peter Whitfield cartographic series traces the history of humankind's relation to the sea as revealed in ten centuries of maritime maps. Presenting sixty maps reproduced in color over double-page spreads, and commentary describing their special features and their significance in the history of navigation, the book explores ancient navigation; the Middle Ages and the Age of Discovery; the printed sea chart, 1600-1800; and the modern sea chart.

New Silk Road: China Meets Europe In The Baltic Sea Region, The - A Business Perspective Larcon Jean-paul,2017-05-24 The Belt and Road initiative announced by Chinese President Xi Jinping in 2013 aims at reviving the ancient trade routes connecting China to Europe and Africa: the 21st Century Maritime Silk Road and the inland Silk Road Economic Belt. Both maritime and land routes of the New Silk Road meet Europe in the Baltics — a region accounting for some 150 million inhabitants representing 30% of the total EU population. The maritime route enters Europe through the Mediterranean Sea before reaching the largest European seaports of the North Sea and the Baltic Sea up to Saint Petersburg in Russia. The land route starting from West China crosses Central Asia, Russia and Belarus before reaching the shores of the Baltic Sea. This book focuses on the business and economic dimensions of China's initiative: Chinese government objective and policies, the strategies of Chinese and foreign firms along the Silk Road, trade and investment between China and Nordic-Baltic countries, the Eurasia Land Bridge corridors and logistics, the impact of the New Silk Road on the economies of Central Asia, new institutions financing the Belt and Road, cross-cultural challenges and Sino-

foreign joint ventures along the New Silk Road. The direct impact of China's initiative on economic sectors such as logistics services; the shipping, port management and maritime industry; construction and high-speed train; energy and engineering; and e-commerce, information technology and tourism will be assessed. Readers will be provided with an in-depth analysis of the opportunities and challenges for companies and regions along the New Silk Road as well as 17 short case studies focusing on China-led projects currently developed along the Belt and Road and 15 maps of the New Silk Road, the Baltic Sea Region and Central Asia to help in understanding China's vision and strategic moves.

Remote Sensing of the European Seas Vittorio Barale,Martin Gade,2008-03-15 Here is a review of the current potential of Earth Observations that devotes particular attention to the challenges posed by the European Seas. The assessment of surface parameters by means of passive techniques – which measure reflected visible and near-infrared sunlight, or surface emissions in the thermal infrared or microwave spectral regions – is addressed. Active techniques – which use transmitted impulses of visible or microwave radiation – are covered as well.
