**Innovative Internet Secrets** Doug Knell, 2018-01-11 There are so many secrets packed in here, I have to wonder if the Illuminati will have this author assassinated - Derrick Mennings, Marxist Internet Weekly Digest Written by an engineering expert with comprehensive knowledge of SEO marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-

hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: Basic competence is good enough for me. Why would I want or need to do more than that? You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Every single one of these internet secrets will shoot your internet productivity into the stratosphere and leave you head and shoulders above your peers. We're not naive to think you don't know any of these secrets, but we're confident you don't know about most of them. Any of these 100+ internet insights will more than make up for the book's cost

**Language, Literature and Style in Africa** Taiwo Abioye, Arua E. Arua, Kehinde Ayoola, 2014-11-24 This book brings together the seminal contributions of scholars interested in the study of language, literature and style in Africa. It marks a response to the longstanding neglect of stylistic analysis of canonical and emergent fictional and non-fictional African prose and discourse. As a reaction to this neglect of African literary artefacts, the book provides a welcome and timely deviation from the norm. The contributions to this volume include discussions that are both analytical and theoretical; analyses of style at the levels of lexis and semantics; newer and more innovative analyses that highlight the relationship between style, pedagogy and technology-mediated discourse; and a final discussion that provides an appropriate background against which issues related to language, literature and style can be understood. In terms of the volumes representation of diverse geographical contexts, the papers included here bridge the North-South divide in Africa, and there are contributions from Libya, Nigeria, South Africa and Zimbabwe. As such, the book is an interesting collection of papers that illuminate the study of literary style in Africa and highlight the need for a greater revival of it on a larger scale.

Drawing on a corpus of nearly 45,000 text messages donated by bilingual young adults in New York City, this volume explores the ways in which the use of texting features such as 'lol,' emojis, abbreviations, and acronyms is systematic and essential. Since empowerment is a very vital act of mentorship that fosters self-identity and ameliorates an individuals quality of life, ignorance is bliss only when the knowledge of God is not involved. Its through our relationship with God that we come to find our purpose, gain confidence, become courageous and suppress our fears in life as we progress towards our destiny. As we seek to find our God mandated purpose in our lives, its very imperative to know that life comes in phases where victory of your present stage invigorates your progress in the next stage. Nevertheless, our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. Its our light, not our darkness that most frightens us. Most of the times we ask ourselves; who am I to be brilliant, gorgeous, talented and successful? Actually, who are you not to be? You are a child of God. Your constrained thinking does not serve or impact the world. Your life is not a mistake. Every human being has a purpose which should dictate him or her to live a purpose driven life. We were born to make manifest the glory of God that is within us. Its not just in some of us; its in everyone. As we let our own light shine, we unconsciously give others permission to follow suit. As we are emancipated from our own fear, our presence and perseverance automatically emancipates others.
