Why Customers Would Rather Have a Smartphone than a Car Cor Molenaar,2016-03-03 Why Customers Would Rather Have a Smartphone than a Car explores some of the fundamental changes in consumer behaviour: Why do we buy less in shops and more on the internet? Why do we spend more on gadgets, smartphones and apps and not more on food, holidays or clothing? Why do most business people only look at symptoms and not the causes of changing customer behaviour? The new generation buys differently from the baby boomers; they have different priorities and preferences. The internet has changed us in the way we think, act and communicate. Whilst many retailers now understand the need for change, few of them have established convincing or sustainable models for the future. Cor Molenaar argues that by understanding the drivers behind these new consumer behaviours, retailers can identify the opportunities this represents and adapt their offering accordingly. The kind of relationship retailing he advocates involves the way the retailer interacts with their customer; the new environment that they need to sustain along with their ability to relate customer data, technology and new services. The author interweaves examples from traditional and virtual retailing with his research on consumer psychology and buying behaviour to offer a sophisticated and at times challenging guide for all those involved in retailing, as well as those responsible for planning and designing social and retail space.

Look Who's Watching Fen Osler Hampson,Eric Jardine,2016-10-17 The Internet ecosystem is held together by a surprisingly intangible glue — trust. To meet its full potential, users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking, while also being secure, private and safe. When trust in the Internet wanes, the network's stock of “digital social capital” falls and users begin to alter their online behaviour. These often subtle changes in behaviour tend to be collectively highly maladaptive, hindering the economic, developmental and innovative potential of the globe-spanning network of networks. Look Who's Watching: Surveillance, Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced. Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users, the proliferation of cybercrime and the growing commodification of user data and regulatory changes — which threaten to fragment the system — are all rapidly eroding the confidence users have in the Internet ecosystem. Based on a combination of illustrative anecdotal evidence and analysis of new survey data, Look Who's Watching clearly demonstrates why trust matters, how it is being eroded and how, with care and deliberate policy action, the essential glue of the Internet can be restored.

Bad with Money Gaby Dunn, 2019-01-01 “Humorous and forthright...[Gaby] Dunn makes facing money issues seem not only palatable but possibly even fun....Dunn’s book delivers.” —Publishers Weekly The beloved writer-comedian expands on her popular podcast with an engaging and empowering financial literacy book for Millennials and Gen Z. In the first episode of her “Bad With Money” podcast, Gaby Dunn asked patrons at a coffee shop two questions: First, what’s your favorite sex position? Everyone was game to answer, even the barista. Then, she asked how much money was in their bank accounts. People were aghast. “That’s a very personal question,” they insisted. And therein lies the problem. Dunn argues that our inability to speak honestly about money is our #1 barrier to understanding it, leading us to feel alone, ashamed and anxious, which in turns makes us feel even more overwhelmed by it. In *Bad With Money*, she reveals the legitimate, systemic reasons behind our feeling of helplessness when it comes to personal finance, demystifying the many signposts on the road to getting our financial sh*t together, like how to choose an insurance plan or buy a car, sign up for a credit card or take out student loans. She speaks directly to her audience, offering advice on how to make that #freelancelife work for you, navigate money while you date, and budget without becoming a Nobel-winning economist overnight. Even a topic as notoriously dry as money becomes hilarious and engaging in the hands of Dunn, who weaves her own stories with the perspectives of various comedians, artists, students, and more, arguing that—even without selling our bodies to science or suffering the indignity of snobby thrift shop buyers—we can all start taking control of our financial futures.

Health Care in the Information Society David Ingram, 2023-11-17 In this fascinating book David Ingram traces the history of information technology and health informatics from its pioneers in the middle of the twentieth century to its latest developments. The book is distinctive in its broad scope and coverage and as the eyewitness account of an author who became the first UK professor appointed with the mission to bridge information technology with everyday medicine, health, and care. In this role, he has been a co-founder and leader of two rapidly growing initiatives, openEHR and OpenEyes, which stem from international collaborations of universities, health services and industries. These open source and open platform technologies have struck a widely resonant chord worldwide through their focus on community interest endeavours and open access to their methods and outputs. Set against the history of extremely costly, burdensome, and serially unsuccessful top-down attempts of governments to tackle the domain, the book argues for a greater focus on shared endeavours of this kind, contributing towards a standardized care information utility that incorporates methods and resources evolved, shared, and sustained in the public domain. As information technologies are now at the very core of health care, shaping the relationship between medical services and communities, professions, organisations and industries this book is important reading for politicians, health care academics, administrators and providers, and to anybody interested in the future of health services in the digital age.
