From the mid-1940s through the early 1960s, Niso Ramponi's work was everywhere, from collaborating with friend Federico Fellini in Italy's animation industry to drawing newspaper strips to creating movie posters for Walt Disney. Volume 1 collects over 200 of Kremos' bodacious black & white cartoons and illustrations, while Volume 2 adds 250 of his curvaceous color comics and covers to the set. Multiple Factor Analysis by Example Using R Jérôme Pagès,2014-11-20 Multiple factor analysis (MFA) enables users to analyze tables of individuals and variables in which the variables are structured into quantitative, qualitative, or mixed groups. Written by the co-developer of this methodology, Multiple Factor Analysis by Example Using R brings together the theoretical and methodological aspects of MFA. It also includes examples of applications and details of how to implement MFA using an R package (FactoMineR). The first two chapters cover the basic factorial analysis methods of principal component analysis (PCA) and multiple correspondence analysis (MCA). The next chapter discusses factor analysis for mixed data (FAMD), a little-known method for simultaneously analyzing quantitative and qualitative variables without group distinction. Focusing on MFA, subsequent chapters examine the key points of MFA in the context of quantitative variables as well as qualitative and mixed data. The author also compares MFA and Procrustes analysis and presents a natural extension of MFA: hierarchical MFA (HMFA). The final chapter explores several elements of matrix calculation and metric spaces used in the book.
