Sharing Photos Online Amber Lovett,2020-01-01 Using the AASL Standards Framework for Learners, the Create and Share: Thinking Digitally series provides younger readers with the necessary tools to successfully and safely navigate the digital world. In *Sharing Photos Online*, readers learn how to creatively take photos and safely share them online with friends and family. Activities throughout the book prompt students to think more deeply, be creative, share information and resources, and grow their knowledge. Book includes a table of contents, glossary, index, author biography, sidebars, and educational matter.

Flickr Hacks Paul Bausch,Jim Bumgardner,2006-02-21 Over two million registered Flickr users and counting have discovered the ease and fun of organizing their photo libraries, showing off their favorite pictures to the world, and securely sharing their private pictures with friends, family, or ad hoc groups. But Flickr's own plethora of intuitive menus, options, and features just scratches the surface. *Flickr Hacks* goes beyond the basics of storing, sorting, and sharing your photos to the much bigger playground of what's possible. Whether you're a beginner looking to manage your metadata and play with tags, or a programmer in need of a detailed reference of Flickr API methods, you'll find what you're looking for here. In addition to getting under the hood of some of the most popular third-party Flickr toys already in the wild, you'll learn how to: Post photos to your blog directly from your cameraphone Mash up your own photos or others' public pictures into custom mosaics, collages, sliding puzzles, slideshows, or ransom notes Back up your Flickr library to your desktop, and save the comments too Set random desktop backgrounds and build your own Flickr screensaver Geotag your photos and map your contacts Download a list of photos and make a contact sheet Make your own Flickr-style tag cloud to visualize the frequency of common tags Build a color picker with a dynamic color wheel of Flickr photos Feed photos to your web site and subscribe to custom Flickr feeds using RSS Talk to the Flickr API using your web browser, Perl, or PHP; authenticate yourself and other users; and build custom API applications

What's a Picture Worth? James A. White,2015-02-09 How many digital photos do you have jumbled on your computer? A picture is worth a thousand words, but if you're not managing your photos, they're just wasting space on your computer hard drive. Or worse yet, you risk losing those priceless photos forever. *What's a Picture Worth?* is a user-friendly guide to help walk you through how to organize, rename, and tag your photos so you can find any photo in mere seconds. You'll learn to leverage free software to fix a so-so photo and turn it into one that really pops. The author will show you the best method to back up your photos and how to share and collaborate on those memories so they're not gathering dust in your computer. Plus, you'll gain useful tips on taking better pictures and scanning old photos. With over 15 years in the computer industry, Jim White knows the important balance of taking something technical and making it less complicated for the everyday computer user. He loves to learn the intricacies of how things work and then find ways to make them easier for everyone to understand. With thousands of his own photos, Jim has perfected ways to organize, fix, and share his photos and now wants to pass that knowledge onto you! Teaching Online Claire Howell Major, 2015-03-15 Demystifies online teaching for both enthusiastic and wary educators and helps faculty who teach online do their best work as digital instructors. It is difficult to imagine a college class today that does not include some online component—whether a simple posting of a syllabus to course management software, the use of social media for communication, or a full-blown course offering through a MOOC platform. In *Teaching Online*, Claire Howell Major describes for college faculty the changes that accompany use of such technologies and offers real-world strategies for surmounting digital teaching challenges. Teaching with these evolving media requires instructors to alter the ways in which they conceive of and do their work, according to Major. They must frequently update their knowledge of learning, teaching, and media, and they need to develop new forms of instruction, revise and reconceptualize classroom materials, and refresh their communication patterns. Faculty teaching online must also reconsider the student experience and determine what changes for students ultimately mean for their own work and for their institutions. *Teaching Online* presents instructors with a thoughtful synthesis of educational theory, research, and practice as well as a review of strategies for managing the instructional changes involved in teaching online. In addition, this book presents examples of best practices from successful online instructors as well as cutting-edge ideas from leading scholars and educational technologists. Faculty members, researchers, instructional designers, students, administrators, and policy makers who engage with online learning will find this book an invaluable resource.

The Best Camera Is The One That's With You Chase Jarvis, 2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In *The Best Camera Is The One That's With You*, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, “Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you.” This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press of a button. Readers of *The Best Camera Is The One That's With You* will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named *Best Camera*. *Best Camera* has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. *Best Camera* also allows you to share directly to a host of social marketing sites via www.thebestcamera.com, a new online community that allows you to contribute to a living, breathing gallery of the best iPhone photography from around the globe. Together, the book, app, and website, represent a first-of-its-kind ecosystem dedicated to encouraging creativity through picture taking with the camera that you already have. *The Best Camera Is The One That's With You—shoot!*

Online Communities for Doctoral Researchers and their Supervisors Julie Sheldon, Victoria Sheppard, 2021-11-10 Bringing together accounts of online community engagement from a range of perspectives, this book considers how the changing landscape of doctoral communities might be used to inform institutional level decisions about doctoral provision and support. Despite the increasing availability of online communities dedicated to doctoral supervisors, there has been little consideration of how they form and operate. This book surveys the landscape of these online communities and examines their impact on the production of the doctorate, and on the experience of doctoral researchers and supervisors. Bringing together accounts of online community engagement from a range of perspectives – doctoral students, supervisors, content curators, and research support practitioners, one of the overarching aims of this volume is to explore these communities in action. With the supporting doctoral research through online media catalysed as the 'new normal', this book allows stakeholders in doctoral education to better understand how students are using social media in their PhD studies, how online communities of practice impact upon researcher/supervisor relationships and support, and ways in which student experiences of various platforms might converge to create an augmented experience.

Online Communication and Collaboration Helen Donelan,Karen Kear,Magnus Ramage,2012-07-26 Communication and collaboration via the Internet has risen to great prominence in recent years, especially with the rise of social networking, Web 2.0 and virtual worlds. Many interesting and worthwhile studies have been conducted on the technology involved and the way it is used and shaped by its user communities. From some of the more popular coverage of these interactions, it might be thought that these are new phenomena. However, they draw on a rich heritage of technologies and interactions. Online communication and collaboration presents a very timely set of articles that cover a range of different perspectives upon these themes, both classic and contemporary. It is unusually broad in the range of technologies it considers - many books on these topics cover only a few forms of collaboration technology - and in considering well-established technologies as well as recent ones. It blends academic and popular articles to combine scholarly rigour with readability. The book is divided into eight sections, covering the foundations of online communication and collaboration, together with current collaboration technologies such as wikis, instant messaging, virtual worlds and social network sites. These modern communication tools are considered in terms of their interactions but also looking back at lessons to be learnt from their technological 'ancestors'. The book also contains an extended case study of online collaboration, taking open-source software as its example. Online communication and collaboration will be of relevance in a wide range of higher education courses in fields related to soft computing, information systems, cultural and media studies, and communications theory.
