Earle Rice, Jr.

*Air Warfare in the Missile Age* Lon O. Nordeen, 2014-12-02 Lon O. Nordeen has completely updated his 1985 chronicle of military aviation's evolving role in warfare, now covering the major conflicts of the past four decades. He presents the historical and political background of each conflict and includes in-depth discussions of the aircraft, weapons, tactics, training, new systems, and other factors that influenced the outcome of each war. New and existing chapters have been enhanced with information based on recently declassified material—especially regarding Vietnam—and new sources in Egypt, Israel, and the former Soviet Union. As “smart” bombs have become more successful in reducing the risks for pilots and frontline troops, air-missile warfare has become the central player in military conflicts. *Air Warfare in the Missile Age, Second Edition*, is a valuable resource for understanding the evolution of modern air warfare.

**Pershing!** Donald Hawkins, 2021-05-12 This book is one of honor and patriotism and is a true story. This book tells of one man's many struggles manning three of the United States nuclear missiles. The time period of this epic story takes place during the late 1970s and during the Cold War. The struggle was caused by the many social pressures of the day. The pressures also came from the lack of qualified personnel crewing those missiles. The

Cold War was won by the United States due in part to the mighty Pershing missile, without firing a shot!

Congressional Budget Office,2009 Examines the cost and potential defensive capability of the proposed European ground-based midcourse defense system. Also explores alternatives.

**The HAWK Air Defense Missile System** Marc Romanych, Jacqueline Scott, 2022-08-18 This is the first history of the legendary US Army's HAWK missile system, the world's first mobile air-defense missile system, which saw service and combat around the world. Designed to counteract the threat posed by advanced 1950s Soviet-built aircraft, the first HAWK unit became operational in 1959. At its peak, it saw frontline service in the Far East, Panama, Europe, and in the Middle East. Units were also used during the Cuban Missile Crisis, Vietnam War, and Persian Gulf War. In the hands of other nations, HAWK proved its efficacy in combat during the Arab-Israeli Wars, Iran-Iraq War, Chadian-Libyan War, and the Iraqi invasion of Kuwait. Credited with shooting down more than 100 aircraft during its combat career, the HAWK system was respected for its lethality. Such was Soviet concern, that the USSR developed electronic jammers, anti-radiation missiles, and other countermeasures specifically to degrade its effectiveness. The US retired its HAWK systems soon after the Cold War ended in 1991 when air defense priorities shifted from aircraft to ballistic missile defense, yet a modernized version of the system remains in service to this day in many nations. Packed with archive photos and original artwork, this is the first book about the HAWK system. Featuring research from HAWK technical and field manuals, interviews with HAWK veterans, and detailing the authors' personal experiences with HAWK missile units, it provides a comprehensive study of one of the most lethal and effective air missile systems of all time.

U.S. Air Force Tactical Missiles George Mindling, Robert Bolton, 2008 The U.S. Air Force Tactical Missiles, 1949-1969, The Pioneers offers the rich, fascinating history of the first surface-to-surface tactical missiles of the U.S. Air Force, the winged, nuclear-capable Matador and Mace missiles, and their units and personnel in West Germany, Taiwan, Korea, Okinawa and the United States. The U.S. Air Force Tactical Missiles, 1949-1969, The Pioneers ties that unique era and those of other tactical missiles together in a remarkably broad, deep and valuable perspective that also includes the World War II German V-1 and reaches back all the way to the first flight in the United States in 1916 of an aircraft not controlled by a pilot.
