better decisions—by the author of Gut Feelings In this age of big data we often trust that expert analysis—whether it's about next year's stock market or a person's risk of getting cancer—is accurate. But, as risk expert Gerd Gigerenzer reveals in his latest book, Risk Savvy, most of us, including doctors, lawyers, and financial advisors, often misunderstand statistics, leaving us misinformed and vulnerable to exploitation. Yet there's hope. In Risk Savvy, Gigerenzer gives us an essential guide to the science of good decision making, showing how ordinary people can make better decisions for their money, their health, and their families. Here, Gigerenzer delivers the surprising conclusion that the best results often come from considering less information and listening to your gut.

It provides guidelines to innovation in a new technical environment, including prototyping and testing, within the cultural or financial parameters of a business. The book is divided into two parts. Part 1 discusses the history and the basic properties of digital products; the different approaches to innovation; the concept of grounded innovation; and concepts and processes that are important for creating successful innovations such as inquiry, invention, and prototyping. Part 2 demonstrates how the basic properties of digital products can be used as raw material for new innovations, including interaction, networking, sensing, and proactivity. There is also a discussion on recent technology, such as rapid prototyping and mobile mash-ups. A wide variety of examples show how novel technical and conceptual innovations became commercial breakthroughs. Grounded Innovation is ideal for product designers, interaction designers, and design-oriented engineers. It will also be a valuable resource for anyone interested in understanding how digital products are created and in a general approach to information technology.
