Mastering the Nikon Z6 II / Z7 II Darrell Young, 2021-07-12

Learn to master your Nikon Z6 II / Z7 II and take full advantage of all its capabilities!

Mastering the Nikon Z6 II / Z7 II by Darrell Young provides a wealth of experience-based information and insights for owners of the new Z6 II or Z7 II camera. Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera equipment.

This book explores the features and capabilities of the cameras in a way that far surpasses the user's manual. It guides readers through the cameras' features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles.

Darrell's friendly and informative writing style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The information in this book goes beyond the camera itself and also covers basic photography technique.

Managing Medical Authority Daniel A. Menchik, 2021-11-30 How the authority of medicine is continuously shaped by relationships among physicians, industry, colleagues, and organizations Exploring how the authority of medicine is controlled, negotiated, and organized, Managing Medical Authority asks: How is knowledge shared throughout the profession? Who makes decisions when your heart malfunctions—physicians, hospital administrators, or private companies who sell pacemakers? How do physicians gain and keep their influence? Arguing that medicine's authority is managed in collegial competition across venues, Daniel Menchik examines the full range of stakeholders driving the direction of the field: medical trainees, clinicians, researchers, administrators, and even the corporations that develop groundbreaking technologies enabling longer and better lives. Menchik takes us into Superior Hospital to witness surgeries and executive negotiations. He moves outside the hospital to watch professional committees craft standards for treatments, case management, and professional ethics. At industry-sponsored meetings, he observes company representatives who train some experienced doctors on their technologies, while deterring others who they think might injure patients. Using an innovative ethnographic approach tying individual actions and their collective consequences, he considers how stakeholders ally across the various venues of medicine, even as they are sometimes pressed into competition within those venues. Menchik finds that these alliances and rivalries strengthen the authority of medicine as a whole. From place to place, and group to group, we see how a medical specialty renews and reinvigorates itself. Beginning within the walls of the hospital, and moving to the professional and commercial venues that shape it, Managing Medical Authority offers an agenda-setting take on the social organization of medical authority.

From Concept to Screen Robert L. Benedetti, 2002 Written by an Emmy-award-winning producer and director, this book focuses on the underlying principles of film and television production, emphasizing the creative rather than the technical aspects. The book describes how a film is created – from conception to screen – and provides a comprehensive overview of the entire production process. Not intended as a how-to book, this book presents only a limited amount of detailed technical information. Instead, it emphasizes the underlying principles and processes of primarily four kinds of films: feature, independently financed, made-for-network-television, and made-for-cable movies. For anyone interested in writing, directing, producing or acting for film/TV.
