Sibelius Glenda Dawn Goss,2009-12-15 One of the twentieth century's greatest composers, Jean Sibelius (1865–1957) virtually stopped writing music during the last thirty years of his life. Recasting his mysterious musical silence and his undeniably influential life against the backdrop of Finland's national awakening, Sibelius will be the definitive biography of this creative legend for many years to come. Glenda Dawn Goss begins her sweeping narrative in the Finland of Sibelius's youth, which remained under Russian control for the

first five decades of his life. Focusing on previously unexamined events, Goss explores the composer's formative experiences as a Russian subject and a member of the Swedish-speaking Finnish minority. She goes on to trace Sibelius's relationships with his creative contemporaries, with whom he worked to usher in a golden age of music and art that would endow Finns with a sense of pride in their heritage and encourage their hopes for the possibilities of nationhood. Skillfully evoking this artistic climate—in which Sibelius emerged as a leader—Goss creates a dazzling portrait of the painting, sculpture, literature, and music it inspired. To solve the deepest riddles of Sibelius's life, work, and enigmatic silence, Goss contends, we must understand the awakening in which he played so great a role. Situating this national creative tide in the context of Nordic and European cultural currents, Sibelius dramatically deepens our knowledge of a misunderstood musical giant and an important chapter in the intellectual history of Europe.

Symphony no. 7, op. 105 Jean Sibelius,1992 A symphony in one movement, composed by Jean Sibelius (1865-1957) in 1924. --

Jean Sibelius Daniel M. Grimley,2021-10-13 An illuminating investigation into the interdisciplinary impact of the beloved modern classical composer. Few composers have enjoyed such critical acclaim—or longevity—as Jean Sibelius, who died in 1957 aged ninety-one. Always more than simply a Finnish national figure, an “apparition from the woods” as he ironically described himself, Sibelius's life spanned turbulent and tumultuous events, and his work is central to the story of late-nineteenth- and early-twentieth-century music. This book situates Sibelius within a rich interdisciplinary environment, paying attention to his relationship with architecture, literature, politics, and the visual arts. Drawing on the latest developments in Sibelius research, it is intended as an accessible and rewarding introduction for the general reader, and it also offers a fresh and provocative interpretation for those more familiar with his music.

Symphonies nos. 3 and 4 in full score Jean Sibelius,2003-01-01 These revolutionary works brought a strikingly organic almost architectural unity to the symphony that music historians recognized as far in advance of anything in the classical masters. Planted with seeds of change already evident in the beautiful, dark third symphony, the fourth symphony presented the most individual work in this form that the 20th century had yet witnessed. Harmonically new, boldly innovative, and structured on a subtle continuity of line, this was a kind of music previously unheard in the concert hall. Austere and intensely concentrated, Sibelius's symphonies of 1907 and 1911 are frequently performed around the world by major orchestras. It is hard to think of any music in which the composer is more spontaneous and masterful, and uncompromising in his thought. Olin Downes, Thompson's International Cyclopedia.

Sibelius: Symphony No. 5 James Hepokoski,1993-04 Sibelius's Fifth is one of the great late-Romantic symphonies. In this searching account, based on a wealth of new information, James Hepokoski takes a fresh look at the work and its composer. His findings have implications beyond Sibelius himself into the entire repertory of Post-Wagnerian symphonic composition. The early chapters place the Fifth Symphony squarely within the general culture of European musical 'modernism' and focus in particular on the problem of the clash of that culture with the more radical 'New-Music' experiments of an emerging younger generation of composers. Subsequent chapters include a probing consideration of Sibelius's style and meditative aesthetic; an account of how the symphony was composed; and a descriptive analysis of the final, familiar version. The book concludes with a discussion of the composer's own prescribed tempos for the Fifth Symphony, along with a comparison of several different recordings.

Jean Sibelius and His World Daniel M. Grimley,2011-08-08 New perspectives on the greatest Finnish composer of all time Perhaps no

twentieth-century composer has provoked a more varied reaction among the music-loving public than Jean Sibelius (1865–1957). Originally hailed as a new Beethoven by much of the Anglo-Saxon world, he was also widely disparaged by critics more receptive to newer trends in music. At the height of his popular appeal, he was revered as the embodiment of Finnish nationalism and the apostle of a new musical naturalism. Yet he seemingly chose that moment to stop composing altogether, despite living for three more decades. Providing wide cultural contexts, contesting received ideas about modernism, and interrogating notions of landscape and nature, *Jean Sibelius and His World* sheds new light on the critical position occupied by Sibelius in the Western musical tradition. The essays in the book explore such varied themes as the impact of Russian musical traditions on Sibelius, his compositional process, Sibelius and the theater, his understanding of music as a fluid and improvised creation, his critical reception in Great Britain and America, his late style in the incidental music for *The Tempest*, and the parallel contemporary careers of Sibelius and Richard Strauss. Documents include the draft of Sibelius's 1896 lecture on folk music, selections from a roman à clef about his student circle in Berlin at the turn of the century, Theodor Adorno's brief but controversial tirade against the composer, and the newspaper debates about the Sibelius monument unveiled in Helsinki a decade after the composer's death. The contributors are Byron Adams, Leon Botstein, Philip Ross Bullock, Glenda Dawn Goss, Daniel Grimley, Jeffrey Kallberg, Tomi Mäkelä, Sarah Menin, Max Paddison, and Timo Virtanen.

Jean Sibelius's Legacy Tim Howell, Anna Krohn, Veijo Murtomäki, 2017-08-21 In 2015, at the 150th anniversary of Jean Sibelius' birth, research about his music and personality is more active than ever. Recent discoveries about the musical, literary, artistic, political, and social life around him have decisively widened the scope of scholarly discussion. As part of the anniversary celebrations, a great number of Sibelius scholars gathered in Hämeenlinna, his birth town, for a conference leading up to his birthday on December 8. This volume draws upon the most current achievements of Sibelius research. It brings together the diverse – and sometimes even divergent – viewpoints that emerged from this international meeting. These studies cover all of the genres in Sibelius' production: orchestral works, incidental music, piano and chamber music, and songs, including both well-known works and rarities, and even some fresh discoveries. The chapters in this book are also a welcome reminder of the manifold sources of inspiration: the music of his contemporaries, nature, literature, and visual art. The versatility of Sibelius' output, and the richness of his creative imagination are presented here to any reader interested to learn more about the music of the Finnish master.
