Rare Order and Rules in Chaos of Lottery Outcomes Yury Goldyrev,2019-09-03

Have you ever wanted to get anything for nothing? Have you ever noticed a temporary order inside the outcomes of absolutely accidental events? Are you among those who have ever tried to reveal an enigma? Well, join the community in that cause. This book is about my unique and, on the whole, victorious ways into the world of lotteries. Up to the summer of 2019 playing lotteries and collecting their prizes have always been more like my hobby than a kind of business because, limitedly, for 3 summer months can I be a lotto player and the rest of the time a successful English tutor, busy with numerous students. Once, on a 1985 spring day, I took part in a Pick 5 in 35 draw. A few months later I won my first 4 in 5 prize with a payout of RR. Today, with all my lotto background summarized in this book, I agree wholeheartedly with my Canadian friend Derek's opinion at the end of his June 22, 2019 email: "With each email I follow your fantastic progress in TOP 3,...the hunch Yury, you have to play the hunch. ...Yes, APS is strong like MOG if 'CHANCE' is out to play and if MOG confirms APS. Confirmation is what I seek using MOG-APS and various strategies in GH. Use your inner talent, Yury. I've seen it for years, now bet on it. You are a strong player. Your MOG and my APS in KENO are fantastic player strategies no one else has." In 2005 Derek came across my "The Proven Lotto System" document on eBay and he turned out to be a KENO winner with his own APS lotto system.

Mr. Lotto Keith Flash, 2012-10-01 The contents of this book detail my Lottery System which is a Full Proof System for selecting the Winning Numbers when playing the Mega Millions Lottery. I have traced and calibrated the entire Mega Millions Lottery Games and all of the drawings since its inception back in May of 2002. My book features detailed spreadsheets that contain the methods of how and why my system works. Of the 230 some pages, there is only about 70 pages (if combined for text only), the remainder are of graphics that show how the system works. Throughout the course of my research, I have created a system that has detected the following: In 2005, my system correctly selected the winning numbers with the Mega Ball (MB) 16 times and 25 times without the MB. In 2006, the system selected the winning

numbers with the MB 17 times and also hit 17 times without the MB. In 2007, 19 times with the MB and 18 times without the MB. In 2008, it selected the winning numbers 21 times with the MB and 26 times without the MB. In 2009, it selected the winning numbers 20 times with the MB and 19 times without the MB. In 2010, it selected the winning numbers 27 times with the MB and 17 times without the MB. In 2011, it selected the winning numbers 18 times with the MB and 20 times without the MB. Currently, to date in 2012, my floating system-select process has picked the winning numbers 12 times with the MB and 14 times without the MB. It is important to note that for the instances where the MB was not detected, the payout is \$250,000.00 (before taxes, needless to say). My system has no need for Wheeling - Statistics - Combinatronics - Boolean - Logic or even Binary Adaptive Configurations.
