*Becoming Bob* Patricia E. Linson,2019-05-31 Satisfied with a Grade 8 education? Not fourteen-year-old Allister McRuer. The first step to realizing his dreams requires high school, but will his father ever allow him to leave the farm and live in town to attend? Allister's one thread of hope for more education involves waiting for their one-room school to get a teacher with a high school diploma, and then persuading that teacher to help him study Grade 9. However, when fire spreads from Turtle Mountain towards the McRuers' farm and the school, Allister must work quickly to prevent this hope from disappearing into ashes. In the midst of his fight for an education, Allister meets Sam Pollack in the fall of 1896, an itinerant worker from Ontario who comes to the farm. He asks Allister a pointed question: "What do you want to do with your life?" Will answering truthfully change anything? And if he ever gets his wish to attend high school in Cherry Creek, what name should he ask his classmates and teachers to call him by? Certainly not Allister!

**Beautiful, Simple, Exact, Crazy** Apoorva Khare,Anne Lachowska,2015-08-25 Two mathematicians explore how math fits into everything from art, music, and literature to space probes and game shows. In this vibrant work, which is ideal for both teaching and learning, Apoorva Khare and Anna Lachowska explain the mathematics essential for understanding and appreciating our quantitative world. They show with examples that mathematics is a key tool in the creation and appreciation of art, music, and literature, not just science and technology. The book covers basic mathematical topics from logarithms to statistics, but the authors eschew mundane finance and probability problems. Instead, they explain how modular arithmetic helps keep our online transactions safe, how logarithms justify the twelve-tone scale commonly used in music, and how transmissions by deep space probes are like knights serving as messengers for their traveling prince. Perfect for coursework in introductory mathematics and requiring no knowledge of calculus, Khare and Lachowska's enlightening mathematics tour will appeal to a wide audience. "A whirlwind tour through mathematics and its applications to the real world, laced with stimulating exercises and fascinating historical insights. Destined to become a classic of mathematical exposition." —Eli Maor, author of *e: the Story of a Number* and *Trigonometric Delights* "Khare and Lachowska introduce bite-size pieces of important math by surrounding them with interesting context, from the Monty Hall problem for probability to a story by Dino Buzzati for velocity. Math treated with seriousness and fun." —Michael Frame, co-author, with Benoit Mandelbrot, of *Fractals, Graphics, and Mathematics Education* "An excellent book, well-suited for a thoughtful, quantitatively-rigorous 'Math for Humanists' course." —William Goldbloom Bloch, author of *The Unimaginable Mathematics of Borges' Library of Babel*

*A Walk In Connection* Tracy Ane Brooks,2014-12-16 Living with wolves has provided Tracy with countless experiences that have changed her life in unimaginable ways. As a cofounder of Mission: Wolf, a wolf sanctuary in Colorado, Tracy has spent half her life studying wolf behavior and body language. Tracy has learned to leash train and walk wolves, often with painful consequences. Join Tracy as she develops a special bond with an intense British Columbian gray wolf named Shaman. Shaman becomes a great wolf teacher, and eventually the shy wolf grows to trust her. Tracy relies on her instinct and intuition as she moves to calm sensitive wolves like Shaman. She does well but believes in her heart that she can do better. A horse named Ikus comes into Tracy's life and dramatically changes her understanding of horse-to-person communication. Driven to find her own way to connect with horses, Ikus becomes a professor in nature's university as Tracy embarks on a journey of learning to speak horse language. Something profound happens when Ikus, a horse with an attitude and a dislike of being haltered, gives Tracy an unexpected lesson in resolving feral behavior. Not only does Ikus teach Tracy how to stop his run-away glitch but Tracy discovers a missing link in her previous wolf-handling life that will forever change her approach to resolving feral behavioral problems in both species. This experience ultimately provides Tracy with a foundation for clear communication, and it awakens in her an effective and natural way to connect with animals. Tracy's world of wolves and horses is forever inspired as she moves to a new level of connection beyond anything she believed possible, and she strives to share what she has learned. Sally, a young woman from the UK, comes to volunteer at the sanctuary and learns to calm a very frightened eighteen-year-old horse who is going blind and in danger of injuring himself.
