The No Compromise Black Skin Care Guide C. R. Cooper,2021-06-15 Have you avoided treating black skin, or having your own skin treated due to a lack of skincare confidence for black skin? Would you like to overcome your apprehension to using skincare products? Are you wanting and ready to see real change in skin health equity? Like you, I've been misguided when it came to my skin. Prior to entering the industry, I shunned the use of any professional skincare simply due to the well-meaning, but harmful traditions passed on to me by my family. When I went to the drug stores or beauty counters, I was always let down by the inappropriate products that were recommended for my skin type and skin colour. It is stories such as my own and many others why I entered the industry to effectively bring truth and awareness for change. If you've struggled getting the right care or with caring for black skin, you're not alone. According to the Journal of Investigative Dermatology, only 4 percent of practicing dermatologists identify as Hispanic, and only 3 percent identify as Black or African descent. Alarming. This lack of understanding for darker skin proliferates beyond the skin health industry but also involves the medical field. According to Janice A. Sabin, PhD, 40% of first- and second-year medical students in the US still endorsed the belief that 'black people's skin is thicker than white people's', a relic belief from the early 19thcentury. This work is one small but significant step towards rectifying that malady. In this book you will discover: Surprising truths about black/darker skin. The #1 common misconception and myth surrounding darker skin, plus many more. The illustrious history of the Beauty industry and darker skin. What top tier skin pros from around the world today, had to say about treating black clients. How to level up your know-how on skincare ingredients and skincare routines. Effective treatments for darker skin. The Ten Commandments for black Skin. As a skin professional or as a novice, this book will further support your understanding of darker skin, even if you haven't had much success in the past.

Advanced Dermaplaning Professional Training Manual Christa McDearmon,2017-07-10 Dermaplaning is a simple and safe clinical procedure that exfoliates the epidermis, while removing vellus hair. While the procedure has been around for 35 years or more, it has recently gained popularity in the esthetics field. The procedure is completed by gently gliding a stainless-steel scalpel blade across the skin to remove keratinized cells and peach fuzz. Dermaplaning can help smooth scarring and acne, reduce uneven skin tone, as well as minimize fine lines and wrinkles. This manual covers step-by-step dermaplane procedures as well as protocols incorporating active ingredients and chemical peels.

Renewing Meaning Stephen J Barker,2004-04-15 At the birth of analytic philosophy Frege created a paradigm that is centrally important to how meaning has been understood in the twentieth century. Frege invented the now familiar distinctions of sense and force, of sense and reference, of concept and object. He introduced the conception of sentence meaning as residing in truth-conditions and argued that semantics is a normative enterprise distinct from psychology. Most importantly, he created modern quantification theory, engendering the idea that the syntactic and semantic forms of modern logic underpin the meanings of natural-language sentences. Stephen Barker undertakes to overthrow Frege's paradigm, rejecting all the above-mentioned features. The framework he offers is a speech-act-based approach to meaning in which semantics is entirely subsumed by pragmatics. In this framework: meaning resides in syntax and pragmatics; sentence-meanings are not propositions but speech-act types; word-meanings are not objects, functions, or properties, but again speech-act types; pragmatic phenomena one would expect not to figure in semantics, such as pretence, enter into the logical form of sentences; a compositional semantics is provided by showing how speech-act types combine together to form complex speech-act types; the syntactic structures invoked are not those of quantifiers, open sentences, variables, variable-binding, etc., rather they are structures specific to speech-act forms, which link logical form and surface grammar very closely. According to Barker, a natural language - a system of thought - is an emergent entity that arises from the combination of simple intentional structures, and certain non-representational cognitive states. It is embedded in, and part of, a world devoid of normative facts qua extra-linguistic entities. The world, in which the system is embedded, is a totality of particular states of affairs. There is no logical complexity in re; it contains mereological complexity only. Some truths have truth-makers, but others, logically complex truths, lack them. Nevertheless, the truth-predicate is univocal in meaning. Renewing Meaning is a radical, ambitious work which offers to transform the semantics of natural language.
